

ZONING CHANGE REVIEW SHEET

C2
1

CASE: C14-2010-0057 – East Braker Duplex

Z.A.P DATE: June 1, 2010

ADDRESS: 1120 East Braker Lane

OWNER / AGENT: Mau and Khanh Tran, 512-825-2516

ZONING FROM: DR

TO: SF-6

SITE AREA: 1.91 acres

SUMMARY STAFF RECOMMENDATION: The staff recommendation is to grant the change from DR (Development Reserve) district zoning to SF-6 (Townhouse and Condominium Residence) district zoning.

If the requested zoning is granted for this site, then 70 feet of right-of-way from the existing centerline should be dedicated for Braker Lane according to the Transportation Plan. [LDC, Sec. 25-6-51 and 25-6-55].

ZONING AND PLATTING COMMISSION RECOMMENDATION: Pending. This case is scheduled for the Zoning and Platting Commission meeting of June 1, 2010.

DEPARTMENT COMMENTS: The subject property is undeveloped and moderately vegetated. The site is located on East Braker Lane, a major arterial roadway, just west of its intersection with Dessau Road. There is an elementary school to the south, single family residences to the north and east and duplexes to the west. The applicant would like to rezone the property to construct approximately 16 condominiums on the site.

The subject tract is relatively small in size and is irregularly shaped. It also has a fairly large proportion of frontage on East Braker Lane. Given these characteristics, the flexibility of site design for SF-6 zoning would allow for a better infill project and land use than would single-family or duplex zoning. In addition, fewer driveways suggested by townhouse and condominium development will benefit the overall traffic pattern in the area.

Staff recommends the applicant's request because the proposed zoning will meet the purpose statement and intent of the requested zoning district. The townhouse and condominium residence district zoning is appropriate in proximity to the major intersection of Dessau Road and East Braker Lane. The increased residential density supports public and commercial sites at the intersection as well as arterial corridors. Additionally, the townhouse and condominium residence district zoning is compatible with the residential uses in the area.

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	DR	Undeveloped
<i>North</i>	SF-2	Single-Family Residences
<i>East</i>	SF-2	Single-Family Residences
<i>South</i>	SF-2	Elementary School
<i>West</i>	SF-2	Duplexes; Single-Family Residences

**C14-2010-0057 1120 E. Braker Ln.
From Development Reserve (DR) to
Townhouse and Condominium Residence
(SF-6) District Zoning**

C2/6

SUMMARY STAFF RECOMMENDATION

The staff recommendation is to grant the change from DR (Development Reserve) district zoning to SF-6 (Townhouse and Condominium Residence) district zoning.

If the requested zoning is granted for this site, then 70 feet of right-of-way from the existing centerline should be dedicated for Braker Lane according to the Transportation Plan. [LDC, Sec. 25-6-51 and 25-6-55].

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

1. *The proposed zoning should be consistent with the purpose statement of the district sought.*

Townhouse and Condominium Residence district is intended as an area for moderate density single family, duplex, two family, townhouse, and condominium use. SF-6 is appropriate in selected areas where transition from single-family to multifamily use is appropriate.

The proposed condominiums will provide a transition from the single-family to the elementary school located to the south.

2. *Zoning changes should promote an orderly and compatible relationship among land uses.*

The proposed SF-6 zoning will allow for reasonable use of the site while maintaining the character of the surrounding area. The townhouse and condominium residence district zoning is appropriate in proximity to the major intersection of Dessau Road and East Braker Lane. The increased residential density supports public and commercial sites at the intersection as well as arterial corridors. Additionally, the townhouse and condominium residence district zoning is compatible with the residential in the area.

EXISTING CONDITIONS

Site Characteristics

The site under consideration is undeveloped. The property is relatively flat and sparsely to moderately vegetated. There is an elementary school to the south, single family residences to the north and east and duplexes to the west.

Impervious Cover

The maximum impervious cover allowed by the SF-6 zoning district would be 55%, which is a consistent figure between the zoning and watershed regulations.

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is in the Desired Development Zone. The site is in the Walnut Creek Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code. Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<i>Development Classification</i>	<i>% of Net Site Area</i>	<i>% with Transfers</i>
Single-Family	50%	60%

C2
7

(minimum lot size 5750 sq. ft.)		
Other Single-Family or Duplex	55%	60%
Multifamily	60%	70%
Commercial	80%	90%

According to flood plain maps, there is no floodplain within or adjacent to the project boundary.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Numerous trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development's requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

- Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.

At this time, no information has been provided as to whether this property has any pre-existing approvals that preempt current water quality or Code requirements.

Transportation

The Austin Metropolitan Area Transportation Plan calls for 140 feet of right-of-way for Braker Lane. If the requested zoning is granted for this site, then 70 feet of right-of-way from the existing centerline should be dedicated for Braker Lane according to the Transportation Plan. [LDC, Sec. 25-6-51 and 25-6-55].

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

Water and Wastewater

The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing the water and wastewater utility improvements, offsite main extensions, system upgrades, utility relocations and or abandonments required. The water and wastewater plan must be in accordance with the City of Austin utility design criteria. The water and wastewater utility plan must be reviewed and approved by the Austin Water Utility. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

Site Plan

Site plans will be required for any new development other than single-family or duplex residential.

C2/8

Any development which occurs in an SF-6 or less restrictive zoning district which is located 540-feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.

Compatibility Standards

- a. The site is subject to compatibility standards. Along all property line, the following standards apply:
- b. No structure may be built within 25 feet of the property line.
- c. No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
- d. No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
- e. No parking or driveways are allowed within 25 feet of the property line.
- f. A landscape area at least 15 feet wide is required along the property line. In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection.
- g. for a structure more than 100 feet but not more than 300 feet from property zoned SF-5 or more restrictive, 40 feet plus one foot for each 10 feet of distance in excess of 100 feet from the property zoned SF-5 or more restrictive.
- h. An intensive recreational use, including a swimming pool, tennis court, ball court, or playground, may not be constructed 50 feet or less from adjoining SF-3 property.
- i. Additional design regulations will be enforced at the time a site plan is submitted.
