A photograph of a river with a waterfall, used as a background for a water quality update. The text "Water Quality Update" is overlaid in white at the top. Below the title, there is a list of bullet points. The background image shows a river with a waterfall and people swimming in the water.

Water Quality Update

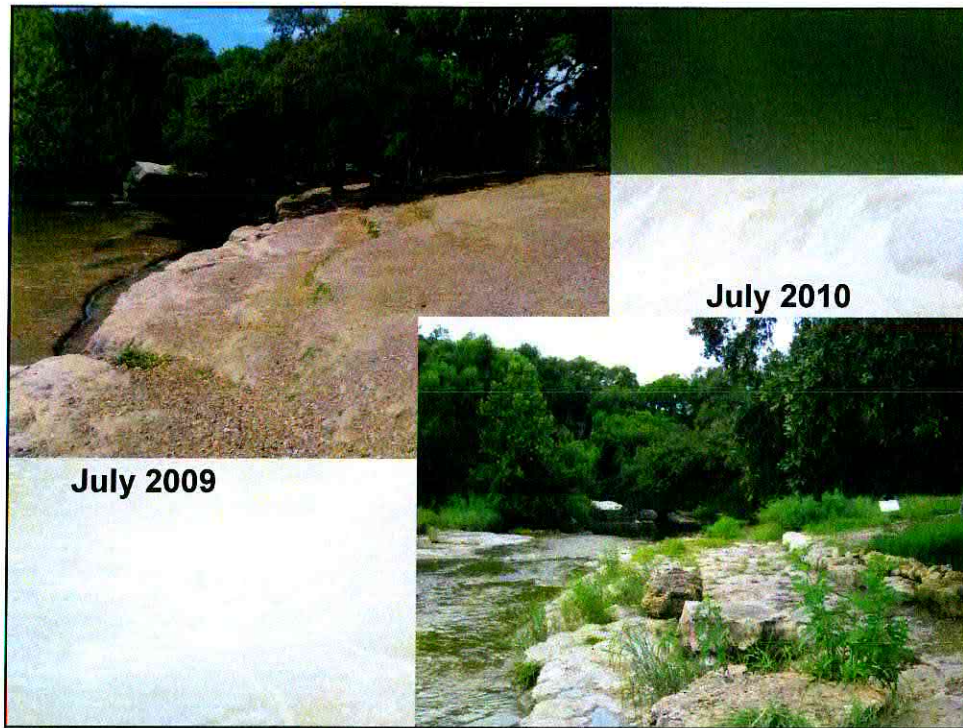

- WPD and Health Dept. monitoring biweekly
- Results posted in park
- Improvement in bacteria during closure
- Bacteria levels increasing again
- UT interlocal for genetic testing in progress

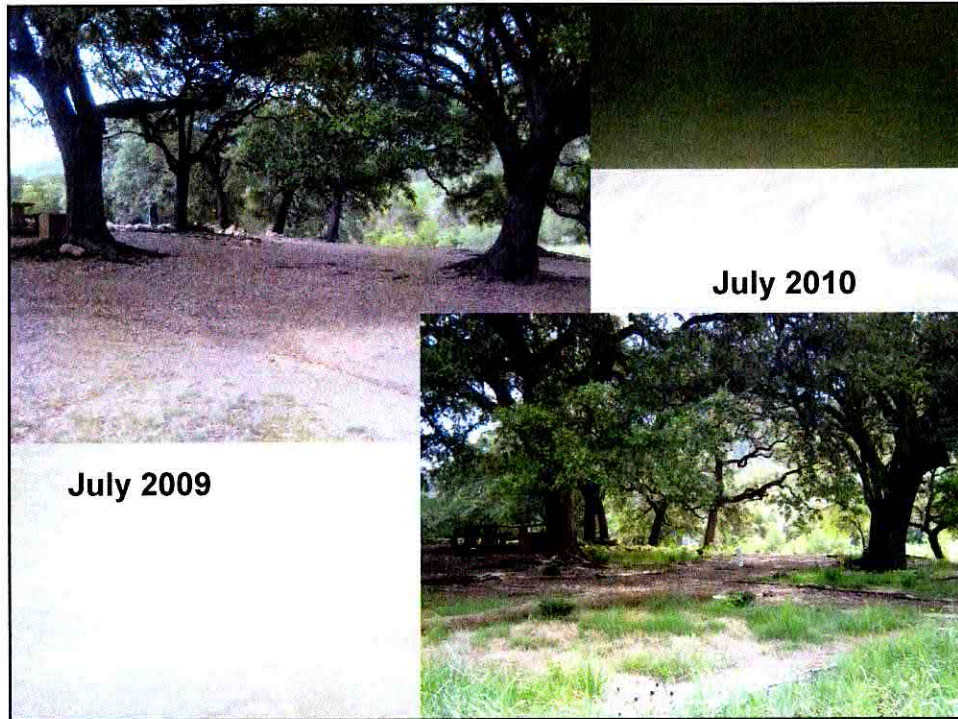

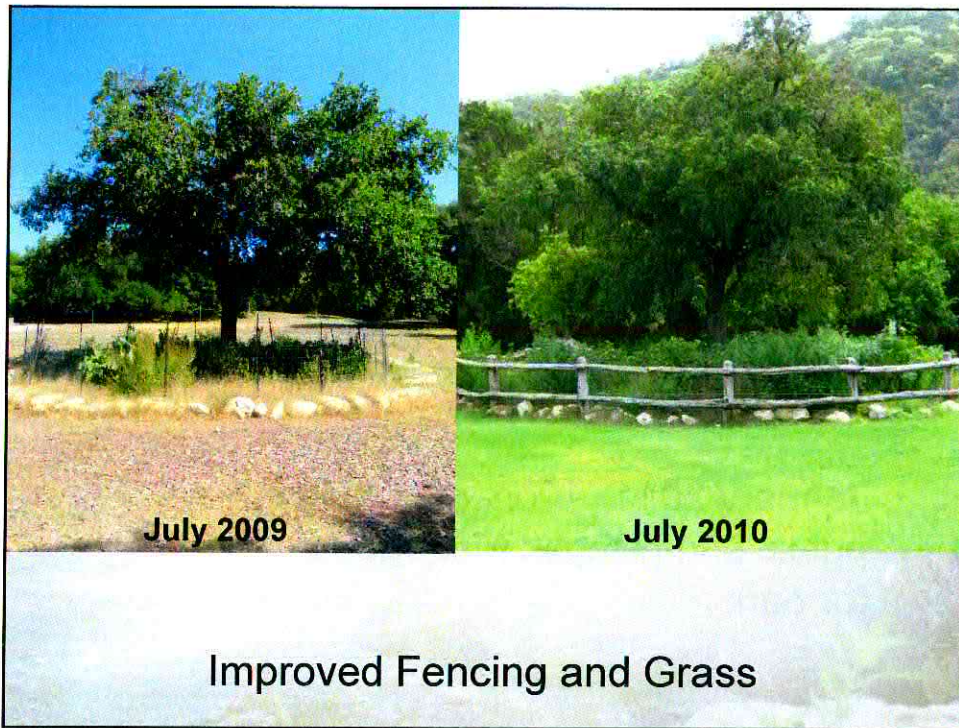

Water Quality Update

- Improvement in bacteria during closure
- Bacteria levels increasing again
- Bacteria elevated throughout park
- High bacteria “recent” phenomena
- Genetic testing soon

Next Steps

- June 2010-December 2010: continue monitoring for bacteria levels and for impact to restored areas
- January 2011: present findings to the public and discuss management strategy for park
