

CMR Exhibit C

New Resource Template

Information to be provided by AE before RFP or solicitations are issued for resources above 10 MW to include:

- Update on any outstanding Resource Acquisitions
- Current Energy Efficiency achieved since 2007
- Current Renewable Energy split between Green Choice & Fuel Charge
- Expected technology and costs
- Status of Federal or Local environmental legislation
- Proposed Overview of resource(s) being sought

Information to be presented with staff recommended action, after staff evaluation

- Technology – wind, solar, gas plant, etc.
- Description of Operational need and fit
- Discussion and cost for alternate opportunities – RECs in lieu of contracts, ownership, PPAs
- Expected energy available date
- Cost discussion – fixed, variable, within expected range, etc.
- Impact on Resource Plan - Renewable Percent, Energy Efficiency, Carbon and Affordability
 - Carbon Impact/Reduction
 - Impact and timing on Customer bill – fuel charge or potential base rate impact
 - Renewable %
 - Total Energy Efficiency savings achieved since 2007

Public Review and Recommendation

- Request for approval will be included on Electric Utility Commission (EUC) and Resource Management Commission and two Council agendas
- Public materials will include the list above for EUC, RMC and Council materials will include the same elements as listed above plus the specific Request for Council Action (RCA)
- Council presentation at 1 meeting , possible executive session for competitive information
- Council Approval at following meeting
