

December 23, 2010

To Whom It May Concern:

Our case #C15-2010-0133 came before your board at the last meeting in December. At that time the board voted to deny our variance request for our 8 foot fence. We believe that we have additional evidence to show why the granting of the variance would be justified. We can show that there is an elevation change of at least two feet on the property where the fence is thus making the height of the fence appear less than six feet from inside the yard. We appreciate your consideration in giving our case another assessment.

Thank you for your time.
