CIS-2011-0019

Susan,

Per your request, we are asking for reconsideration based on new information as follows:

- 1) Our project as proposed will require 41.67% BC, Since the existing BC is 38.5% and we believed the SF-2 to be 40%, we are asking for less than 2% additional.
- 2) The proposed gable style roof would collect rain water through a gutter and rain-barrel system to be dispersed in a more controlled manner.
- 3) The Mc Lean's purchased their home with the existing patio. They didn't create the situation but they are attempting to correct it in an environmentally responsible manner while protecting their investment.

Respectfully,

Todd Adams
Division Manager
Champion
