

Planning Considerations for a BCP Trail Master Plan Proposal (Modified for Mount Bonnell View Restoration)

Use

1. What uses are being sponsored?
2. Who is/are the sponsors?
3. What resources is/are sponsor(s) offering to provide?
4. What resources is/are the sponsor(s) seeking from the land managers?
5. How will this vegetation modification comply with the *Streptanthus* MOA?
6. How will user conflicts be avoided?

Vegetation Modification

1. What is the approximate area of the proposed vegetation modification?
(Please provide a map.)
2. Are there any potential structural components?
3. What is the type and expected extent of vegetation clearing? Please
4. What type of habitat is expected to be affected? (*Streptanthus bracteatus*)
 - a. Can occupied habitat and plants be avoided by > 100 meters?
 - b. If habitat cannot be avoided by > 100 meters, what are the proposed actions to mitigate?
5. What oak wilt prevention methods will be used?
6. How will cultural and other sensitive resources be protected?

Operations

1. User management
 - a. How will intensity of use be managed and/or maintenance be adjusted to address intensity?
 - b. How will enforcement and security be addressed?
 - c. What design and education components are proposed to keep users out of the cleared area.
2. Resource impacts (protected species, soil, water, and plant communities)
 - a. What design and/or management components are proposed to avoid impacts to protected species, soil, water, and plant communities?
3. How do you propose to provide long-term maintenance and repairs, enforcement, and monitoring?
4. How do you propose to support monitoring of the potential impacts from this vegetation clearing on protected species, soil, water, and plants?
