ZONING CHANGE REVIEW SHEET

CASE: C14-2012-0009 (11711 North Lamar Re-Zoning) **Z.A.P. DATE:** February 21, 2012

ADDRESS: 11711 North Lamar Boulevard

OWNER/APPLICANT: Griffin Engineering Group, Inc. (Gregory Griffin)

ZONING FROM: LO

TO: LO-MU*

AREA: 0.895 acres

*On January 30, 2012, the applicant confirmed via e-mail that they would like to provide a conditional overlay that would limit the MU Combining District to single-family residential uses only on this site.

SUMMARY STAFF RECOMMENDATION:

The staff's recommendation is to grant LO-MU-CO, Limited Office-Mixed Use-Conditional Overlay Combining District, zoning. The conditional overlay will limit the MU Combining District to single-family residential uses.

ZONING & PLATTING COMMISSION RECOMMENDATION:

DEPARTMENT COMMENTS:

The property in question currently contains an office and a single-family residential use (Please see Site Plan Model – Attachment A). This tract of land was annexed by the City in November of 1984 and designated with the LO, Limited Office District, zoning category in August of 1985. The applicant has submitted a letter, dated June 5, 1992, from the City that states that the single-family structure is considered a legal, nonconforming use as it was constructed on the site prior to annexation (Please see Letter from the City of Austin - Attachment B). The applicant has applied for LO-MU district zoning to bring the existing residential use into conformance with City of Austin Land Development Code use regulations. The applicant proposes to limit the MU Combining District to single-family residential uses on this site.

The staff recommends the applicant's request for LO-MU-CO zoning because the property meets the intent of the LO-MU combining district. The site under consideration was zoned LO through the North Lamar Area Study in zoning case C14-85-149. The staff recommends adding an MU to the existing office zoning because the proposed Mixed Use Combining District will bring the single-family residential use on the site into conformance with land use regulations in the City of Austin Land Development Code. The proposed LO-MU-CO district zoning is compatible with the zoning and land uses in this area as the site is surrounded by LO district zoning to the north, south, east and west. In addition, the properties to the east contain single family residential uses.

The applicant agrees with the staff's recommendation.

STAFF RECOMMENDATION

The staff's recommendation is to grant LO-MU-CO, Limited Office-Mixed Use-Conditional Overlay Combining District, zoning. The conditional overlay will limit the MU Combining District to single-family residential uses.

BASIS FOR RECOMMENDATION (ZONING PRINCIPLES):

1. *The proposed zoning should be is consistent with the purpose statement of the district sought.*

Limited office (LO) district is the designation for an office use that serves neighborhood or community needs and that is located in or adjacent to residential neighborhoods. An office in an LO district may contain one or more different uses. Site development regulations and performance standards applicable to an LO district use are designed to ensure that the use is compatible and complementary in scale and appearance with the residential environment.

The purpose of a mixed use (MU) combining district is to allow office, retail, commercial, and residential uses to be combined in a single development.

2. *The proposed zoning should promote consistency and orderly planning.*

The proposed LO-MU-CO district zoning is compatible with the zoning and land uses in this area as the site is surrounded by LO district zoning to the north, south, east and west. In addition, the properties to the east contain single family residential uses.

3. *Zoning should allow for reasonable use of the property.*

LO-MU-CO combining district zoning will allow the applicant to bring the existing single-family residential use on the site into conformance with land use regulations in the City of Austin Land Development Code.

EXISTING CONDITIONS

Site Characteristics

The site under consideration contains an office structure and a single-family residential use.

Environmental

The site is not located over the Edwards Aquifer Recharge Zone. The site is in the Desired Development Zone. The site is in the Walnut Creek Watershed of the Colorado River Basin, which is classified as a Suburban Watershed by Chapter 25-8 of the City's Land Development Code.

According to flood plain maps there is no floodplain within or adjacent to the project boundary.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

Trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development's requirements

CS
11

to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876.

At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

- Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.
-

At this time, no information has been provided as to whether this property has any pre-existing approvals that preempt current water quality or Code requirements.

Hill Country Roadway

The site is not within a Hill Country Roadway Corridor.

Impervious Cover

The maximum impervious cover allowed by the LO zoning district would be 70%. However, because the watershed impervious cover is more restrictive than the zoning district's allowable impervious cover, the impervious cover is limited by the watershed regulations.

Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

Development Classification	% of Net Site Area	% with Transfers
Single-Family (minimum lot size 5750 sq. ft.)	50%	60%
Other Single-Family or Duplex	55%	60%
Multifamily	60%	70%
Commercial	80%	90%

Note: The most restrictive impervious cover limit applies.

Site Plan

Any new development on this site is subject to Subchapter E Design Standards and Mixed Use. Additional comments will be made when the site plan is submitted.

Stormwater Detention

At the time a final subdivision plat, subdivision construction plans, or site plan is submitted, the developer must demonstrate that the proposed development will not result in additional identifiable flooding of other property. Any increase in stormwater runoff will be mitigated through on-site stormwater detention ponds, or participation in the City of Austin Regional Stormwater Management Program if available.

C5
12

Transportation

The Austin Metropolitan Area Transportation Plan calls for 140 feet of right-of-way for N. Lamar Blvd. The dedication of additional right-of-way for N. Lamar Boulevard may be deferred to the site plan stage in accordance with the Transportation Plan. LDC, 25-6-55.

A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113]

North Lamar Blvd is classified in the Bicycle Plan as Bike Route No. 43.

Capital Metro bus service (Routes No. 1L and 101) are available along N. Lamar Boulevard.

There are existing sidewalks along both sides of N. Lamar Boulevard.

Existing Street Characteristics:

Name	ROW	Pavement	Classification	ADT
N. Lamar Blvd.	Varies	2 @ 24'	Major Arterial (MAD4)	24,000

Water and Wastewater

FYI: The site is currently served with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the proposed land use. Water and wastewater utility plans must be reviewed and approved by the Austin Water Utility for compliance with City utility criteria. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

**RE: 11711 NORTH LAMAR
AUSTIN, TEXAS 78753
ZONING APPLICATION**

Dear Mr. Guernsey,

Please find enclosed zoning application for the above property. The site currently is zoned Limited Office "LO" and this request is for Limited Office-Mixed Use "LO-MU". The site currently contains the office of Griffin Engineering Group, Inc. As well as the personal residence for my wife and I. The residence was constructed in 1943 and the site was annexed in 1984, thus the residential use in LO zoning is a legal non-conforming use (See attached June 5, 1992 correspondence from Tracy H. Watson). The purpose of this zoning request is to allow residential use in Limited Office Zoning.

We appreciate your consideration of this request.

Respectfully Submitted,

Gregory Griffin, P.E.
President

Re: 11711 North Lamar Boulevard
0.895 acres of land, being all of Lot
13 and parts of Lot 12 and 6-A of the
Resubdivision of Lot 6, Block A,
Eubank Acres, Section One

TO WHOM IT MAY CONCERN:

The property at the referenced location was annexed in November 1984 and zoned LO, Limited Office, in August 1985. Its current residential use is legal, nonconforming.

Section 13-2-341 of the Land Development Code reads as follow: "If a structure accommodating or serving a nonconforming use is damaged or destroyed to the extent that the cost of reconstruction or restoration will not exceed 90% of the value of the structure immediately prior to the damage, the structure may be rebuilt, and the nonconforming use may be resumed, ...".
