

EVENT NOTICE

Date: Thursday, March 1, 2012

Time: 9:00 am - 10:00 am

Location: The Pink House, 1115 East 12th Street

The Austin Area Comprehensive HIV Planning Council will sponsor a presentation and discussion on the new HIV/STD Prevention Plan for Texas. The discussion will focus on how the Plan affects the direction for HIV prevention efforts and how prevention links into care and services.

We encourage attendance by providers of HIV prevention and care, clients, administrators and members of the Council and ask that you pass this message to others who would benefit from this presentation.

Since 2007, many aspects affecting planning for a new HIV prevention plan have changed including:

- Dissolving the regional groups in favor of one statewide body;
- National HIV / AIDS Strategy;
- Healthy People 2010 & 2020 HIV objectives;
- Need to broaden our approach in how we look at achieving our goals of reducing the transmission of HIV.

After five years of study, meetings, data collection, research, focus groups, healthy debate and writing, the Texas HIV / STD Prevention Community Planning Group (TxCPG) has created a plan which serves as a comprehensive roadmap for Texas. The Plan will be shared during this presentation.
