

# 2215 WESTLAKE DRIVE

INSTALLATION of FLOATING WAVE ATTENUATION SYSTEM

2215 WESTLAKE DRIVE  
SITE PLAN

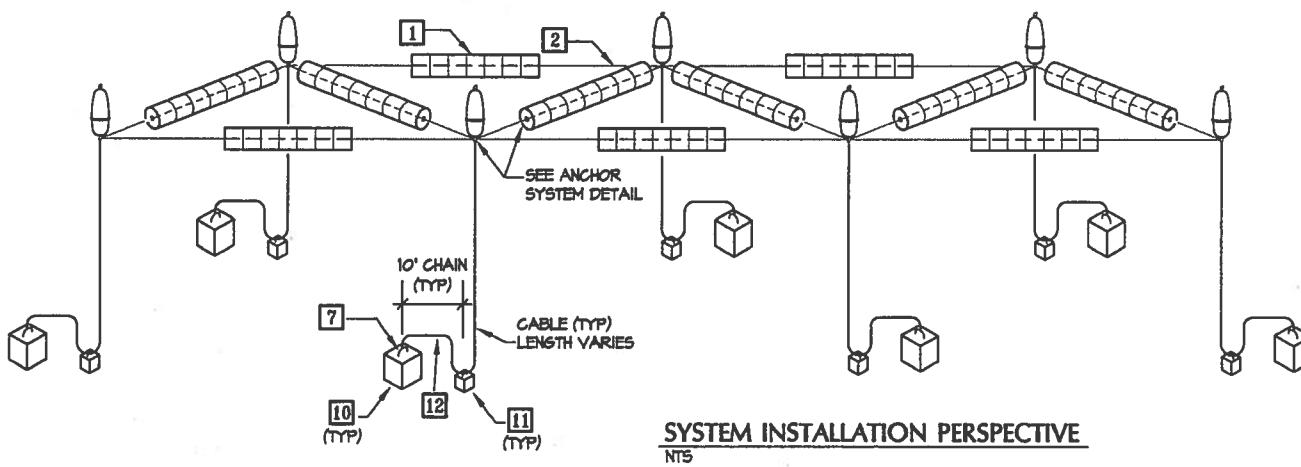

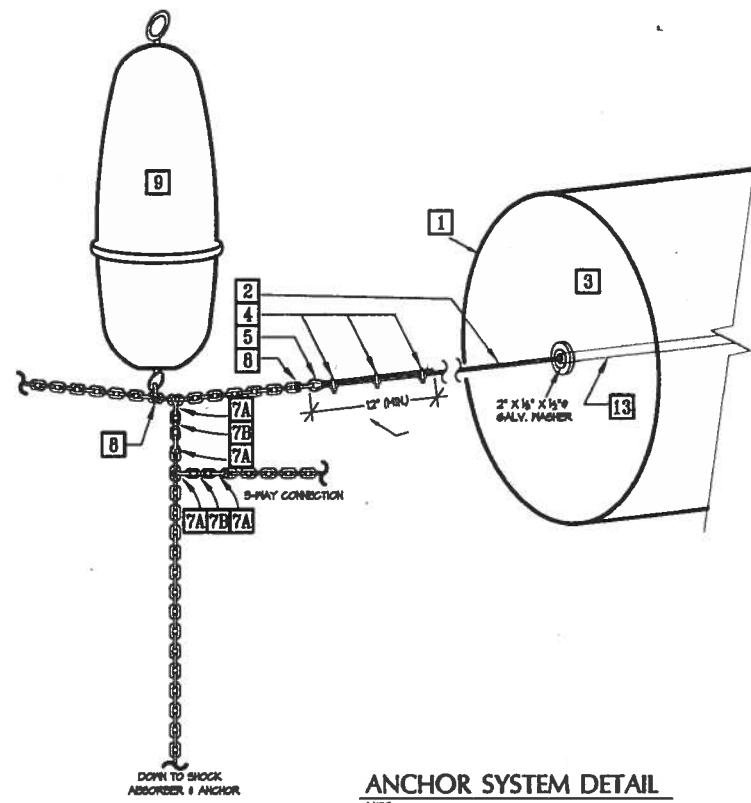

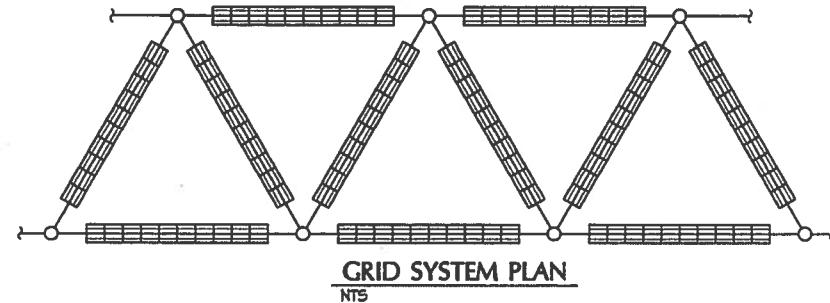

AUPPERLE COMPANY  
Engineering, Planning & Development Services  
2215 Westlake Drive #100, Austin, Texas 78746 512.328.8281  
Texas State Professional Engineer Registration Number 7406

DESIGNED: ESA  
APPROVED:  
SCALE: 1/10  
2215 Westlake Dr.  
DATE: Sep. 21, 2011  
SHEET  
2 of 2

SP-2011-01

BILL OF MATERIALS				
ITEM	QTY	PART #	DESCRIPTION	REMARKS
1	TBD	WB-3636	36" X 36" WAVE EATER	
2	TBD	CG-012581	1/2" NYLON JACKETED CABLE	AS REQUIRED
3	TBD	CG-C030	3.5" DELRIN SPACERS	WEAR PLATE FOR SPLICED CABLE
4	TBD	SD-159510	1/2" WIRE ROPE CLIP	USE 3 AT EVERY CABLE SPLICE; PLACE "LIVE" CABLE END IN ROPE CLIP SADDLE
5	TBD	SD-170009	1/2" GALVANIZED THIMBLE	USE 1 AT EVERY CABLE SPLICE
6	TBD	SD-147062	1/2" GALVANIZED BOW SHACKLE	CONNECTOR FROM CHAIN TO ANCHOR
7	TBD	SD-182312	1/2" STAINLESS STEEL SWIVEL SHACKLE	
8	TBD	SD-147080	7/16" GALVANIZED BOW SHACKLE	CONNECTOR FROM CHAIN TO ANCHOR
9	TBD	CW-CASK-125	CHAIN ANCHOR BUOY	
10	TBD		600 LB+ CONCRETE ANCHOR	
11	TBD		50 LB CONCRETE SHOCK ABSORBER	
12	TBD	GC-40601	3/8" GALVANIZED CHAIN	AS REQUIRED
13	TBD		T POLY PIPE	RUN THROUGH CENTER OF WAVE EATERS AS BEARING FOR CABLE

# WaveBrake

If you own or manage any property along the shoreline of any large body of water, you are well aware of the havoc that wind-driven waves and large boats can bring upon your property. The concept of offshore breakwaters has been something that waterfront property owners and managers have been investigating for many years. There are a number of systems on the market today offering solutions, but, for the most part, these are rigid, costly and at best, give only marginal service. In the fall of 2000, executives and technicians at WaveBrake completed research on this system and placed the first test units in Lake Ontario.

WaveBrake consists of several rows of heavy-duty cubes, depending on the conditions and requirements of the site. For mass, the lower cubes fill with water, and the upper cubes are used for buoyancy.

The "System" is:

- ◆ FLEXIBLE
- ◆ EASILY ANCHORED
- ◆ SITE-SPECIFIC
- ◆ EASILY INSTALLED
- ◆ ANY LENGTH
- ◆ SEASONALLY ADJUSTABLE

BEFORE

WaveBrake

AFTER

# WaveBrake

The "System" can be used for:

- ◆ MARINA BREAKWALLS
- ◆ PERSONAL HARBORS
- ◆ WAKE AND WAVE BARRIERS
- ◆ EROSION CONTROL
- ◆ BEACH ACCRETION
- ◆ FISH HABITATS
- ◆ PLATFORMS AND FLOTATION

*If you are interested in quieting the waters in front of your Marina, Personal Harbor, Shoreline, etc., call us for a personal assessment.*
