**ANALYSIS / ADDITIONAL INFORMATION:** This operating budget amendment is for adding additional Conservation Rebates and Incentives fund solar rebates. The budget for the residential PV rebate program in FY2012 is \$2.7 million, out of a total approved budget for solar incentives of \$3 million. As of April 30, 2012, Austin Energy had paid \$1.9 million, or 70%, of the FY12 residential rebate budget at a level \$2.50 per installed watt of capacity. Additionally there were \$1.5 million in pending applications. AE now estimates that at the current rate of customer participation, the end-of-year budget will fall short by \$1,630,000. Austin Energy is seeking authorization to amend Ordinance No. 20110912-005, the Fiscal Year 2012 Operating Budget to increase the Conservation Rebates and Incentives Fund by transferring \$1,630,000 from the Operating Budget ending fund balance to fund this additional demand in residential solar rebates. Given the pending rate review and potential new value of solar rate, Austin Energy concludes that it would not be prevalent to institute a reduction in the rebate amount, a tool used in the past to slow demand, at least until AE has a clearer view of current market conditions.

The above five-year impact analysis illustrates the total revenue and expense projections for the Austin Energy Operating Fund Conservation Rebates and Incentives Fund.
