Hi Susan-

After attending the Neighborhood Group meeting - my client may have decided to withdraw this variance request.

However, before I officially ask for it to be withdrawn, I have a couple of questions.

The homeowner, is choosing to remove some impervious cover so that they are below the 45% allowed. Can this impervious cover be taking away from the location of the homeowners choosing?

I suspect that an update to the survey will have to be done, which shows the Impervious cover at or below 45% - and this will be given to the inspector upon final inspections and sign-offs. Is that correct?

Thanks,  
Anna

Jean/Drew:

I've drafted a quick doc - if you could pass it on to your neighbor. They can just copy it and email it to you or me. I'll submit it to the record file with the application.

Cheers-  
Anna
