Additional Backup Information

Austin Water is proposing to rename the Water and Wastewater East Service Center after Timothy Louviere, an employee who died on the job in March 2012.

Mr. Louviere was a Senior Pipeline Technician and a 22 year veteran of the utility. He spent his entire career with the utility working out of the East Service Center as an Equipment Operator. Tim was professional and meticulous about his work ethic and relationships at the center. He was extremely dedicated to serving the citizens of Austin.

This service center represents generations of hard working employees who like Tim have paved the road of pride, respect and dedication so that all who come after will understand the value of being part of this location and Austin Water.

Austin Water plans to add a new sign above the front door, and replace existing signage and stone work on the front

of the building. The cost of the repair work and two new signs is approximately \$10,000. The renaming of the facility shall be dedicated in a public ceremony.
