Subject:

1404 Rockcliff BOA postponement request

Susan, Diana:

I am formally requesting a postponement of this case to the April BOA hearing.

We are currently working with various departments to get answers on floodplain, LA zoning interpretations, and other development related information.

Thank you.

Sincerely,
David C. Cancialosi, President

Please be advised that the Board only takes 16 new cases a month, therefore, first come, first served. Please be advised that a request for reconsideration must be filed within 7 days from the Board meeting.

A variance from the Building Code Board of Appeals may be required for variances from the Zoning Board of Adjustment (no Sign Review Board cases need to call). Please consult a code specialist in the Plan Review Division at 974-2580.

If you need assistance completing this application (general inquires only) please contact Susan Walker, 974-2202; 505 Barton Springs Road, 2 nd Floor (One Texas Center).

NOTE: The Board must determine the existence of, sufficiency of and weight of evidence supporting the findings described below. Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional support documents.
(zoning district) LA 25-2-55(1) TS -> LU VE OW 10' rear yard setback - 25-2-55(-0)(2) S-> 3.5
in order to remodel & add
to Wist Str.

VARIANCE FINDINGS: I contend that my entitlement to the requested variance is based on the following findings (see page 5 of application for explanation of findings):

REASONABLE USE:

1. The zoning regulations applicable to the property do not allow for a reasonable use because:

The original 1972 1,000 SF structure currently has a 0' rear setback and a 3.5' side yard setback. There is a carport in front of the structure that will remain in place. The owner proposes to remodel the existing structure to create ~1858 SF, but "slide" it ~10' further from the current shoreline (and heritage sized trees located along the shoreline). The existing wood deck will also be removed and replaced further from the trees and shoreline. Maintaining the structure in the same general proximity near the water is in keeping with the nature of lake properties. Many surrounding properties have structures near the water in order to enjoy the natural lake environment. The request is reasonable in that the owner has a reasonable expectation to enjoy similar improvements consistently found throughout the lake community.

HARDSHIP:

- 2. (a) The hardship for which the variance is requested is unique to the property in that:
 - 1) The structure(s) was originally built prior to City of Austin annexation and thus was not governed by relative LA zoning development regulations.
 - 2) The main structure's proximity to several heritage sized trees result in delicate and thoughtful construction practices. The structure is surrounded by a 40" cypress, and 48" cypress, a combination 26.5" sycamore, and a 36" cottonwood in addition to several other mature trees on the lot. In discussions with several arborists it has been advised that a complete demolition of the existing structure may impact the root system. The owner proposes to move the structure closer to the existing carport, with minimal impact to the existing tree root systems.
 - 3) One Austin Energy transmission lines crosses the lot. It divides the site, coming from across the lake and continuing past the front lot line. This line requires a 7.5' setback on either side, creating a 15' wide section approximately 200' in length underneath the center line that is not developable. The second PUE crosses the front lot line and inhibits the front ~1/3 of the lot. It is 35' wide for a distance of 140' in length, prohibiting development in what would otherwise be a suitable build site. It is bordered to the north by a 31" willow tree, further restricting a net buildable area.
 - 4) There is one entrance to the lot that is located as far to one side of the property as possible. Any other driveway location options are complicated due to on the ground easements, overhead transmission lines, and protected tree root zones.

- 5) The remaining portion of the lot not encumbered by easements, trees, or powerlines is in the middle of the lot and is not a desirable build site for this specific lot. It is bordered by 3 protected trees, the 35' easement, and the transmission easement. It is best suited for compliance with current OSSF tank and discharge locations.
- 6) Given the age and condition of the structure, the highest and best use of the property as described and shown on the accompanying exhibits is a minor remodel to the existing footprint to allow a small increase in impervious coverage from 16.1% to 17.6%. This total impervious cover is allowable in the 0-15% slope category per LDC section 25-2-551(D)(3)(A). Maximum allowed is 35% impervious cover.
 - (b) The hardship is not general to the area in which the property is located because:

There are no known issues similar to this site with respect to the amount of heritage and protected sized trees, the transmission line and easement issues, and otherwise narrow shape of the lot itself.

AREA CHARACTER:

3. The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because:

Compared to the few remaining original structures found in this area, the proposed structure location is aesthetically in keeping with many non-complying scenarios. Further, several newer homesites appear to maintain a large front yard area in order to accommodate OSSF requirements while maintaining similar land use patterns in terms of structure location in proximity to the shoreline.

PARKING: (Additional criteria for parking variances only.) **N/A**

Request for a parking variance requires the Board to make additional findings. The Board may grant a variance to a regulation prescribed Section 479 of Chapter 25-6 with respect to the number of off-street parking spaces or loading facilities required if it makes findings of fact that the following additional circumstances also apply:

1. Neither present nor anticipated future traffic volumes generated by the use of the site or the uses of sites in the vicinity reasonable require strict or literal interpretation and enforcement of the specific regulation because:

	NA	 	 	
-				_

2. The granting of this variance will not result in the parking of loading of vehicles on public streets in such a manner as to interfere with the free flow of traffic of the streets because:
NA
3. The granting of this variance will not create a safety hazard or any other condition inconsistent with the objectives of this Ordinance because:
NA
4. The variance will run with the use or uses to which it pertains and shall not run with the site because:
NA NA
