**Additional Backup Information**

The proposed amendments to the Uniform Mechanical Code provide for changes to equipment access, electrical connections, condensate termination, environmental air duct termination, smoke control systems and duct and transfer openings.

Highlights of the draft ordinance are as follows:

- Section 303.9.3 Roof Drainage and Rails - Added language from 2012 IBC increasing distance from fall hazards to ten (10) feet to require rails.
- Section 304.2.1.1 Door or Scuttle - Added language from 2012 IBC increasing distance from fall hazards to ten (10) feet to require rails.
- Section 308.0 Electrical Connections - Amended the language to accept unit mounted shutoff as positive means of disconnect.
- Section 604.0 Insulation of Ducts - References the energy code increasing the R value needed on ductwork.
- Section 1109.4 Emergency Control - Added an exception for machinery rooms with non-flammable refrigerants.
