Additional Backup Information

This request is for a software maintenance and support agreement for the software in use in the Water Utility's Pipeline Operation Program area. The software is Granite XP from Cues, Inc. The software is used in the CCTV pipe inspection division. It covers 24 x7 technical support by phone and software upgrades. The contract will also provide access to pre-scheduled online training sessions that cover the base product as well as advanced user concepts and best practices. This agreement is vital to the proper maintenance of the utility's wastewater collection system.

CUES is the only entity that can provide software support and maintenance for its Granite XP software. No other vendor makes or develops the source code or the intellectual property therein. As such, CUES is the sole source for this product and service acquisition.
