

US 183 Bottleneck Project

Presentation to UTC

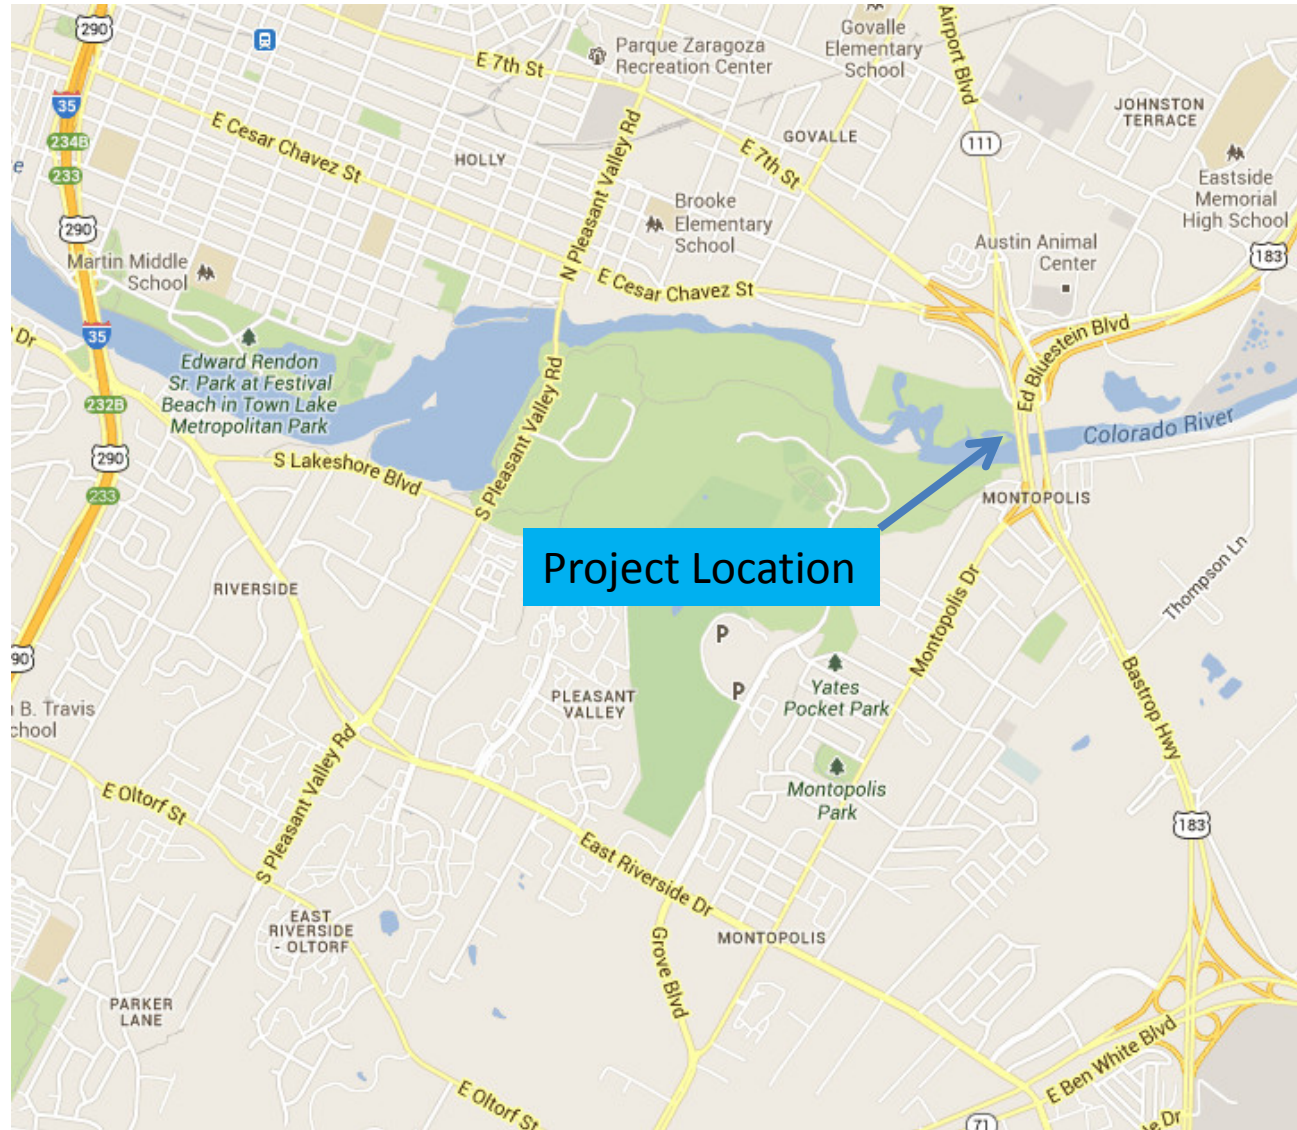

July 9, 2013

US 183 Bottleneck Project

Location and Scope

- “US 183, between U.S. 290 and Texas 71, partner with TXDOT to address near-term traffic Management”

US 183 Bottleneck Project

US 183 Bottleneck Project

- This project consists of modifying the lane designations on US 183 at the Colorado River Bridge
 - Reduce Congestion
 - Vehicle speeds increase 11%
 - Travel delay reduced by 12%
 - Improve Safety
 - Provides 2 continuous travel lanes for US 183 (eliminates single lane exit)
 - Eliminates merging requirement

US 183 Bottleneck Project
