

Craig & Commissioners:

Please find the attached map useful for it's plotting of all of the active voting precincts in the City.

You can zoom in on it.

Was created by City Demographer Ryan Robinson who may be a good resource for your mapping consultants when they come online. It has the data that Peck says he could not get ahold of from the City.

Map also shows 10-1 election results. I will be using this map in a demo for you all soon.
