**Congress Avenue Trash Cans**  
**Congress Avenue**

**PROPOSAL**

---

Replace existing trash cans with cans of a similar design.

**PROJECT SPECIFICATIONS**

---

The applicant proposes to replace the trash cans along Congress Avenue, as many of them have been damaged or vandalized over the years. The current trash cans are no longer manufactured, so exact replacement is not possible, but the proposed new cans are very similar in design, size, and color. Both the existing and the proposed cans are 24" wide and 37" tall and the new cans will have the same circumference as the existing cans. The new cans will have a larger liner, and therefore a larger capacity.

**STANDARDS FOR REVIEW**

---

None - this is essentially a replacement-in-kind to improve the appearance of trash receptacles along Congress Avenue.

**STAFF RECOMMENDATION**

---

Approve the application.

Existing Congress Avenue trash can

Proposed Congress Avenue trash can
