

ZONING CHANGE REVIEW SHEET

CASE: C14-2013-0023 – 6.11 acre tract –
Westgate & Davis Lane

Z.A.P. DATE: May 7, 2013

ADDRESS: 2901 Davis Lane

OWNER: Susan Parker Leigh

AGENT: Bleyl & Associates
(Vincent G. Huebinger)

ZONING FROM: RR

TO: SF-6

AREA: 6.110 acres

SUMMARY STAFF RECOMMENDATION:

The Staff recommendation is to grant townhouse and condominium residence – conditional overlay (SF-6-CO) combining district zoning. The Conditional Overlay limits development to less than 2,000 vehicle trips per day.

ZONING AND PLATTING COMMISSION RECOMMENDATION:

May 7, 2013: *APPROVED SF-6-CO DISTRICT ZONING AS STAFF RECOMMENDED, WITH ADDITIONAL CONDITIONAL OVERLAYS THAT PROHIBIT VEHICULAR ACCESS TO KENTISH DRIVE AND WESTGATE BOULEVARD, AND REQUIRE PEDESTRIAN ACCESS TO KENTISH DRIVE.*

[G. ROJAS; P. SEEGER – 2ND] (5-2) B. BAKER; J. MEEKER – NAY

ISSUES:

The Owner is not in agreement with the Zoning and Platting Commission's recommendation to restrict vehicular access onto Kentish Drive, and is presently in discussion with AISD regarding access and acquisition of a wastewater easement from AISD.

The Applicant has calculated the net site area to be 6.11 acres, the same size of the rezoning area, and the achievable density is between 32 and 38 units. The conceptual site plan provided as Exhibit A-2 shows 34 units.

Staff would like to provide an update about the scope and timing of roadway improvements to Davis Lane. The Davis Lane Capital Improvement Project (CIP) is within the existing right-of-way and extends between Westgate Boulevard on the west and Leo Street on the east. The CIP consists of travel lanes for a Major Arterial Divided-2 street design, bike lanes, and 5-foot wide sidewalks with some meandering and 4-foot widths in some areas due to large trees and utility obstructions, bulb-outs, on-street parallel parking, and a roundabout feature at the intersection of Davis and Leo. Inlets were added to address drainage issues and rain gardens were added as part of the design.

The construction bid was advertised and bids opened in late July 2013. Staff is moving forward with a recommendation to award to the apparent low bidder and construction is anticipated to begin in October 2013. The construction window is 240 days or 8 months, and the CIP should be completed by late 2014. The first phase of construction will be the roundabout at Leo Street and Davis Lane. Please refer to Exhibit B which shows the improvements to the right-of-way.

DEPARTMENT COMMENTS:

The subject property is located at the southeast corner of Davis Lane and the newly extended segment of Westgate Boulevard, is undeveloped and zoned rural residence (RR) district. There is a service station and single family residences within the Cherry Creek Section 9-F subdivision to the north (LR; SF-2), single family residences and a reservoir within the Pheasant Run Section 1-A subdivision to the east (SF-2; RR), an AISD elementary school to the south (RR) and detached condominiums to the west (SF-6-CO). Please refer to Exhibits A (Zoning Map) and A-1 (Aerial View).

The Applicant proposes to rezone property to the townhouse and condominium residence (SF-6) district in order to build approximately 32 units. Access is proposed to be limited to Davis Lane. Staff recommends the Applicant's request, given: the surrounding area includes single family residences and condominium uses, and SF-6 zoning would be compatible with the established character of the area; and 2) it is located in proximity to supporting office, commercial and civic uses.

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	RR	Undeveloped
<i>North</i>	LR-CO; SF-2	Service station; Single family residences
<i>South</i>	RR	AISD Elementary School
<i>East</i>	SF-2; SF-3	Single family residences; Reservoir
<i>West</i>	SF-6-CO	Condominiums

SUBJECT: Davis Lane Lane Loop Street to West Coast Roadway, CIP # 8205.002
Volant Review from TCM #248.0.4.2.1

The following sections are granted from the City of Austin Transportation Caltrans Agreement (TCM #248.0.4.2.1) regarding the above-captioned project.

- Minimum width of that that is less than the minimum minimum width of all but for original roadway widths. Minimum roadway width additional width is not suitable due to right-of-way constraints (TCM #4.2.3).
- Minimum adjustment of that that less than the least of any whose maximum is acceptable amount existing from (TCM #4.2.1). Minimum maximum is less than the least but will be increased at intervals of 50 yards from 250 feet to provide acceptable existing conditions.

In addition, Austin Transportation Department (ATD) has chosen not to provide design and ratings for the unsuitable, higher standards under Davis Lane. ATD will determine a different evaluation and inspection and the project's compliance.

ATD also determines what level investment more than 12 feet in width in Davis Lane to be the control of the street and reconstruction design items.

PERMIT NUMBER: SP-2012-01000
 SHEET NUMBER: 56 OF 100

SUMMARY STAFF RECOMMENDATION:

The Staff recommendation is to grant townhouse and condominium residence – conditional overlay (SF-6-CO) combining district zoning. The Conditional Overlay limits development to less than 2,000 vehicle trips per day.

BASIS FOR LAND USE RECOMMENDATION (ZONING PRINCIPLES)

1. *The proposed zoning should be consistent with the purpose statement of the district sought.*

The townhouse and condominium residence (SF-6) district, is intended as an area for moderate density single family, duplex, two-family, townhouse and condominium use.

2. *Zoning changes should promote an orderly and compatible relationship among land uses.*

Staff recommends the Applicant's request, given: the surrounding area includes single family residences and condominium uses, and SF-6 zoning would be compatible with the established character of the area; and 2) it is located in proximity to supporting office, commercial and civic uses.

EXISTING CONDITIONS**Site Characteristics**

The subject property is undeveloped and is generally flat.

Impervious Cover

The maximum impervious cover allowed on the property is 25 percent within the boundaries of the Contributing Zone. This figure is based on the more restrictive watershed regulations. Within the South Boggy Creek Watershed, The maximum impervious cover allowed by the SF-6 zoning district would be 55%, which is a consistent figure between the zoning and watershed regulations.

Comprehensive Planning

This zoning case is located on 6 acre vacant lot to the south of Davis Lane and is not located within the boundaries of a neighborhood planning area. Surrounding land uses include a single family subdivision and vacant land to the north off Davis Lane, a single family subdivision to the east, vacant land to the west on Westgate Blvd., and a school to the south on Kentish Drive. The developer wants to build townhouse/condos on the property.

The property is located within the boundaries of the Barton Creek Contributing Zone, as identified on the Imagine Austin's Growth Concept Map, found in the Imagine Austin Comprehensive Plan (IACP). An aquifer contributing zone is an area where runoff from precipitation flows to the recharge zone of an aquifer. Streams in the contributing zone flow

downstream into the recharge zone and “contribute” water to the aquifer. However, the overall goal of the IACP is to achieve ‘*complete communities*’ across Austin, where housing, services, retail, jobs, entertainment, health care, schools, parks, and other daily needs are within a convenient walk or bicycle ride of one another. Page 107 of the IACP states, “*While most new development will be absorbed by centers and corridors, development will happen in other areas within the city limits to serve neighborhood needs and create complete communities. Infill development can occur as redevelopment of obsolete office, retail, or residential sites or as new development on vacant land within largely developed areas. New commercial, office, larger apartments, and institutional uses such as schools and churches, may also be located in areas outside of centers and corridors. The design of new development should be sensitive to and complement its context. It should also be connected by sidewalks, bicycle lanes, and transit to the surrounding area and the rest of the city. It should also be connected by sidewalks, bicycle lanes, and transit to the surrounding area and the rest of the city. Not all land within the city limits will be developed. Some may remain or enter into agricultural production; continue as single-family houses, duplexes, and apartments; or become part of the planned open space network. **The Growth Concept Map not only guides where Austin may accommodate new residents and jobs but also reflects the community intent to direct growth away from environmentally sensitive areas including, but not limited to, the recharge and contributing zones of the Barton Springs segment of the Edwards Aquifer, and to protect the character of neighborhoods by directing growth to areas identified by small area plans.***”

The following Imagine Austin policies are taken from Chapter 4 of the IACP, which specifically discusses the promotion of a variety of housing types:

- **LUT P22** Protect Austin’s natural resources and environmental systems by limiting land use and transportation development in sensitive environmental areas and preserving areas of open space.
- **H P1.** Distribute a variety of housing types throughout the City to expand the choices able to meet the financial and lifestyle needs of Austin’s diverse population.
- **H P5.** Promote a diversity of land uses throughout Austin to allow a variety of housing types including rental and ownership opportunities for singles, families with and without children, seniors, persons with disabilities, and multi-generational families.
- **N P1.** Create complete neighborhoods across Austin that have a mix of housing types and land uses, affordable housing and transportation options, and access to schools, retail, employment, community services, and parks and recreation options.

Based on the property being located adjacent to two residential subdivisions, and the Imagine Austin policies referenced above that supports a variety of housing types throughout Austin, staff believes that the proposed residential use is consistent with the Imagine Austin Comprehensive Plan as long as environmental ordinances to protect the Barton Creek Aquifer are enforced.

Environmental

According to current maps, this property lies in the Edwards Aquifer Contributing Zone. This property lines on or very close to the divide between the Slaughter Creek Watershed (Barton Springs Zone, Drinking Water Protection Zone) and the South Boggy Creek Watershed (Suburban, Desired Development Zone). A geological and / or topographical analysis of the site may be needed to determine the exact boundaries of the aforementioned watersheds and zones.

Numerous trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development's requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.

According to floodplain maps there is no floodplain within or adjacent to the project boundary.

At this time, no information has been provided as to whether this property has any preexisting approvals which would preempt current water quality or Code regulations.

Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

The site is not located within the endangered species survey area.

Following are the comments for each watershed classification:

Suburban

Under current watershed regulations, development or redevelopment on this site will be subject to the following impervious cover limits:

<i>Development Classification</i>	<i>% of Net Site Area</i>	<i>% with Transfers</i>
Single-Family (minimum lot size 5750 sq. ft.)	50%	60%
Other Single-Family or Duplex	55%	60%
Multifamily	60%	70%
Commercial	80%	90%

Under current watershed regulations, development or redevelopment on this site will be subject to the following water quality control requirements:

- Structural controls: Sedimentation and filtration basins with increased capture volume and 2 year detention.

Barton Springs Zone

Project applications at the time of this report are subject to the SOS Ordinance that allows 15% impervious cover in the Recharge Zone, 20% impervious cover in the Barton Creek Watershed, and 25% impervious cover in the Contributing Zone. A portion of this tract lies in the Contributing Zone.

Under current watershed regulations, development or redevelopment on this site will be subject to providing structural sedimentation and filtration basins with increased capture volume and 2 year detention. Runoff from the site is required to comply with pollutant load restrictions as specified in LDC Section 25-8-514.

Transportation

A traffic impact analysis was waived for this case because the applicant agreed to limit the intensity and uses for this development. If the zoning is granted, development should be limited through a conditional overlay to less than 2,000 vehicle trips per day [LDC, 25-6-117].

Water and Wastewater

FYI: The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by the Austin Water Utility for compliance with City criteria. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

Site Plan and Compatibility Standards

Site plans will be required for any new development other than single-family or duplex residential.

Compliance with Subchapter E will be required at Site Plan. A 12-foot sidewalk consisting of a 7-foot planting zone adjacent to the curb followed by a 5-foot clear zone is required on both Guidepost Trail and Westgate Boulevard.

Any development which occurs in an SF-6 or less restrictive zoning district which is located 540-feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.

While property located adjacent to single family residences triggers a front setback of 25-feet, for this lot, the "front" is considered Westgate Boulevard. The adjacent SF property is

not fronting the same street, hence there is a 25 foot setback on the west side, but not the north side.

The site is subject to compatibility standards. Along the west property line, the following standards apply:

- No structure may be built within 25 feet of the property line.
- No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
- No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
- No parking or driveways are allowed within 25 feet of the property line.
- for a structure more than 100 feet but not more than 300 feet from property zoned SF-5 or more restrictive, 40 feet plus one foot for each 10 feet of distance in excess of 100 feet from the property zoned SF-5 or more restrictive.
- An intensive recreational use, including a swimming pool, tennis court, ball court, or playground, may not be constructed 50 feet or less from adjoining SF-3 property.

Additional design regulations will be enforced at the time a site plan is submitted.

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application's hearing to a later date, or may evaluate the City staff's recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application's hearing to a later date, or may evaluate the City staff's recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

Comments:

I object to building
more condos/townhouses
because the area is already
overcrowded add to that several
existing roads on elementary
school and a busy intersection
with to stop light and we
have a disaster in the making.
I can't believe moved to TX for
wide open space.

Comments: *I am against the proposed zoning. The infrastructure is not in place to support increased traffic. Davis Lane is too narrow for City of Austin buses to travel & Kentish & Westgate do not provide proper ingress & egress. Additionally, area has homes annexed 29 years ago that haven't been provided sewer connections, so the City needs to fix problems before allowing new development.*

Comments:

As a 30-year long home

owner in the neighborhood, I strongly

believe that duplex/townhome/condo

do not fit well in our neighborhood.

Single family homes dominate, and

should remain only single-family.

Thank you for your consideration of

my comments.

Comments: Infrastructure not in place to accommodate increased traffic. Ingress & Egress would have to be via Davis Lane, a narrow two lane road that lacks turn lanes & shoulders, it is overgrown by trees & brush on both sides. This would be the second multi-family unit that fronts Davis & no improvements have been made that would make this zoning request acceptable. I also have concerns regarding drainage.

Subject: Re: Westgate & Davis C14-2013-023

Wendy, after our discussion, we would like to postpone this case for 1st reading to October 3rd. The developer is not able to attend on the 26th and would like to be present to discuss the Davis Lane issue and the access to Kentish, including the wastewater discussions with AISD, if necessary. Thanks
