

Hello,

I have been keeping up with your hard work on outlining the districts, and do understand the need for the demographics and population to be represented.

I am a home owner resident at _____, Austin Texas 78745

I am on the west side of IH 35, south of William Cannon Blvd, between S 1st Street and S Congress Ave

This map shows me to be in District 2

I am extremely concerned and confused as to how my area of town is included with district 2- we have nothing to do with Dove Springs, or the Bergrstrum Airport area, or anything east of IH 35.

We are however, directly effected by all of South Park Meadows, any additional construction on S 1st Street and S Congress Ave. which falls in District 5 or District 3. I am effected by any and all construction, activities in districts 3 & 5 but absolutley none in district 2, I never even to over IH 35 & William Cannon to go to that HEB, for example.

In looking at this new map, it seems that District 2 & District 3 should all be with District 5 to include areas to IH 35 and Ben White Blvd.

District 5 should be district 2 that is east of IH 35.

District 3 should be extended to Riverside Dr from Ben White Blvd

The way this is layed out curenrntly, as soon as I go down my street I am in another district either 5 or 3 I will be directly effected by any decisions made with no say in the matter

Please reconfigure districts, 5 -3 -2 to show actual representation of those communities, not just for demographic needs.

Thank you,
Kelly Delisio
