

First let me compliment the Commission on the proposed districts. Most appear to be quite compact and only one (3) has a "Gerrymandered" look.

My comment is on proposed district 10. I live there, I believe in what is called T-328 on the map. And when I look at the nearby areas in 10, I feel that that is my neighborhood and that is where I belong. But further, a concern and I believe that of most people in 10 is transportation and how hard it is to get downtown. I suggest that the residents of the tracts labeled T-210, T-251 and T- 256 would not share that concern and should be in proposed district 9. The resulting population imbalances could be relieved by not extending 9 as far south and extending 10 farther north.
