

My comments refer to the ICRC maps dated 9/28/13 and 11/4/13. Also, my comments only relate to District #6.

Our two goals were for the Anderson Mill Neighborhood and all Williamson County residents to be contained in the same district. Both maps achieve these goals. Thank you.

However, I really think the map you drew dated 9/28/13 better represents the more logical boundaries for our part of the city. I can't see the logic of connecting us to anything south of the Canyon Creek neighborhood.

I understand your job is very difficult, but the boundaries need to pass the common sense test. Thank you for your hard work. My cell is .
