**ANALYSIS / ADDITIONAL INFORMATION:** This contract is for the purchase of two 25 Cu/Yd. heavy duty phase separator dewatering dumpsters for the Austin Water Utility's Walnut Creek Wastewater Treatment Plant. Currently the City has two of these dewatering roll-off dumpsters in its inventory. The two new dewatering roll-off dumpsters are for the expansion of the lift station wet well cleaning program.

The by-product of cleaning lift station wet wells (fats, oils & grease) needs to be dewatered before being hauled to local land-fills. To facilitate the expansion of the wet well cleaning program, more dewatering dumpsters are needed. The units will be added to the current inventory of two shared by Collection System Services and Lift Stations & Remote Facilities.
