

ZONING CHANGE REVIEW SHEET

CASE: C14-2013-0022
Congress Avenue Baptist Church

P.C. DATE: January 14, 2014
December 10, 2013; October 8, 2013;
September 10, 2013; August 13, 2013

ADDRESS: 1511 S Congress Avenue

AREA: 0.9513 (41,439sq. ft.)

OWNER: Congress Avenue Baptist Church (Pastor George Tuthill)

APPLICANT: Thrower Design (Ron Thrower)

NEIGHBORHOOD PLAN AREA: South River City Neighborhood
Greater South River City Combined Neighborhood Planning Area

ZONING FROM: SF-3-NCCD-NP; Family Residence – Neighborhood Conservation
Combining District - Neighborhood Plan Combining District

ZONING TO: GR-NCCD-NP; Community Commercial - Neighborhood Conservation
Combining District - Neighborhood Plan Combining District,
as amended

SUMMARY STAFF RECOMMENDATION:

Staff does not recommend GR-NCCD-NP combining district zoning at this time.

Staff supports GO-NCCD-NP; General Office - Neighborhood Conservation Combining District - Neighborhood Plan Combining District, as originally requested, with the following condition:

Allowable uses: Administrative and Business Offices, Art Gallery, Art Workshop, Offsite Accessory Parking, Professional Office (which excludes Medical) and Software Development. All other commercial uses allowed in GO would be prohibited. Hospital Services General and Limited, a Civic use, would also be prohibited.

If the sole purpose of the request is to allow offsite commercial and offsite accessory parking, along with private educational facility uses associated with an existing religious institution, as has been stated by the applicant, then staff recommends the applicant pursue the allowances of these specific uses by attempting to amend the existing NCCD.

NCCD SITE DEVELOPMENT REQUIREMENTS:

It should be noted that the Fairview NCCD, adopted in 1986 and last amended in 2003, functions as an overlay on this property. The NCCD stipulates the following as regards development or redevelopment for nonresidential uses for sites without frontage on South Congress Avenue:

- 1) Site plan review is required, with notice to the registered neighborhood association;
- 2) The maximum building coverage is 35 percent;
- 3) The maximum impervious cover is 45 percent;
- 4) The maximum height is 30 feet; and
- 5) Use of the property is limited to office use, excluding medical offices

PLANNING COMMISSION ACTION:

December 10, 2013	Postponement until January 14, 2014 at the request of the Applicant; the SRCC Neighborhood Association agreed with postponement request.
October 8, 2013	Postponement until December 10, 2013 at the request of the South Congress Merchants Association; the Applicant concurred with the request.
September 10, 2013	Postponement until October 8, 2013 at the mutual request of the South River City Citizens Neighborhood Association and the Applicant
August 13, 2013	Postponement until September 10, 2013 at the request of the SRCC with Applicant's concurrence

DEPARTMENT COMMENTS:

The subject tract is just under one acre, and comprises the eastern half of a block owned by the Congress Avenue Baptist Church that is surrounded by South Congress Avenue, East Elizabeth Street, Nickerson Street, and East Monroe Street (see Exhibits A). The current church building was dedicated in 1968; the former building is thought to have been built in 1938. At least one other church building occupied the site, as the South Austin Baptist Church, which was established in the late 1800s; later, the congregation was renamed the Congress Avenue Baptist Church.

The subject tract currently hosts a surface parking lot and a vacant school building formerly used by the congregation. Construction of this educational annex was completed in the early 1950s. In 2009, the western half of the block, containing the church building adjacent to Congress Avenue, was rezoned; because of a petition impacting the eastern half of the block – the subject tract – this portion of the block was dropped from the 2009 rezoning request (see Case Histories below.)

The initial rezoning application, from February 2013, was to rezone the property to general office (GO), to allow for religious assembly, private school, and off-street parking uses. Neighborhood planning staff determined these additional uses would necessitate a change to the Future Land Use Map (FLUM) through the neighborhood plan amendment (NPA) process. The current FLUM designation is Civic; the request identified in the associated NPA is to amend the FLUM to Mixed Use.

The rezoning application was amended to a request of GR, Community Commercial (see Exhibit B); this would also necessitate a NPA of the FLUM to a Mixed Use land use designation. Granting GR zoning, if so desired by the Planning Commission, should be contingent on approval of the NPA (FLUM) amendment.

It should be noted the stated request for the zoning change, as per the April 2013 amending letter from the applicant, is to allow commercial off-street parking, off-site accessory parking, and to allow private primary educational facilities as a permitted use, rather than conditional under the SF-3 base zoning district, use of the site.

Additional correspondence from neighborhood stakeholders, the Greater South River City Neighborhood Plan Contact Team, and the applicant, is attached (see Exhibit C).

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	SF-3-NCCD-NP	Surface Parking Lot; Private School
<i>North</i>	CS-NCCD-NP; CS-V-NCCD-NP; SF-3-NCCD-NP	Elizabeth St; Commercial; Duplex & Triplex Residential
<i>East</i>	SF-3-NCCD-NP	Nickerson St; Single-family Residential
<i>South</i>	CS-MU-V-NP; SF-3-NP	Monroe St; Food Trailer Park and Craft Vendors (Future Hotel); Duplex & Single-family Residential; Church
<i>West</i>	CS-CO-NCCD-NP	Church; Food Trailer and Private Playground; S Congress Avenue

CASE HISTORIES:

NUMBER	REQUEST	PLANNING COMMISSION	CITY COUNCIL
C14-85-351	Establish Fairview Park NCCD	Forwarded w/o Recommendation; 04/02/1986	Approved; 08/07/1986
NPA-2009-0022.01	Civic to Commercial	Approved Mixed Use on Congress	Approved Mixed Use on Congress half of

(1511 S Congress & 1508 Nickerson)		half of tract, Civic on Nickerson half; 08/25/2009	tract only; 10/28/2009
C14-2009-0032 1511 S Congress & 1508 Nickerson)	SF-3-NCCD-NP to CS-CO-NCCD-NP (Congress) & GO-CO-NCCD-NP (Nickerson)	CS-CO-NCCD-NP & GO-CO-NCCD-NP (limits uses & vtd), required RC that owner not oppose rollback if use ceases; 08/25/2009	Approved CS-CO-NCCD-NP on Congress half only (limits uses & vtd); 11/19/2009

Properties east of South Congress Avenue and north of Monroe Street are part of the Fairview Park Neighborhood Conservation Combining District, adopted by the Council in August 1986 (C14-85-351) and amended in July 2003 (C14-02-0067). With the adoption of the NCCD ordinance in 1986, the Congress Avenue side of the church property, at 1511 S Congress, was reclassified with a base district as SF-3-NCCD.

In addition to the cases noted above, adoption of the Bouldin Creek Neighborhood Plan in May 2002 added the NP zoning string to properties on the west side of South Congress Avenue (C14-02-0031); adoption of the Greater South River City Neighborhood Plan and the South River City Neighborhood Plan Area rezonings in September 2005 (C14-05-0139) appended the zoning string east of Congress Avenue. Vertical Mixed Use Building (V) was added to select properties east (C14-2007-0224) and west (C14-2007-0220) of South Congress Avenue in December 2007.

Regarding the neighborhood plan amendment (NPA) and rezoning cases from 2009, the original request was to change the Future Land Use Map for the entire Congress Avenue Baptist Church property from Civic to Mixed Use and Civic, and to rezone the half adjacent to Congress Avenue as CS and the half adjacent to Nickerson as GO. The Planning Commission supported the rezoning request with conditions. Prior to consideration of the cases at Council, a valid petition was filed. The applicant subsequently amended both the NPA and rezoning case to exclude the Nickerson portion of the tract; this reduction in tract area and location eliminated the valid petition. The Council subsequently granted the NPA and rezoning requests for only the Congress Avenue half of the property (as listed above).

ABUTTING STREETS:

SUMMARY STAFF RECOMMENDATION

Staff does not recommend GR-NCCD-NP combining district zoning at this time.

Staff supports GO-NCCD-NP; General Office - Neighborhood Conservation Combining District - Neighborhood Plan Combining District, as originally requested, with the following conditions:

- 1) Allowable uses: Administrative and Business Offices, Art Gallery, Art Workshop, Offsite Accessory Parking, Professional Office (which excludes Medical) and Software Development. All other commercial uses allowed in GO would be prohibited. Hospital Services General and Limited, a Civic use, would also be prohibited.

If the sole purpose of the request is to allow offsite commercial and offsite accessory parking, along with private educational facility uses associated with an existing religious institution as a permitted (not conditioned) use, as has been stated by the applicant, then staff recommends the applicant pursue the allowances of these uses by attempting to amend the existing NCCD.

NCCD SITE DEVELOPMENT REQUIREMENTS

It should be noted that the Fairview NCCD, adopted in 1986 and last amended in 2003, functions as an overlay on this property. The NCCD stipulates the following as regards development or redevelopment for nonresidential uses for sites without frontage on South Congress Avenue:

- 1) Site plan review is required, with notice to the registered neighborhood association;
- 2) The maximum building coverage is 35 percent;
- 3) The maximum impervious cover is 45 percent;
- 4) The maximum height is 30 feet; and
- 5) Use of the property is limited to office use, excluding medical offices

BASIS FOR RECOMMENDATION

The existing family residence (SF-3) base district zoning is the designation for a moderate density single-family residential use and a duplex use on a lot that is a minimum of 5,750 square feet. An SF-3 district designation may be applied to a use in an existing single-family neighborhood with moderate sized lots or to new development of family housing on lots that are 5,750 square feet or more. A duplex use that is designated as an SF-3 district

is subject to development standards that maintain single-family neighborhood characteristics.

The requested community commercial (GR) base district is the designation for an office or other commercial use that serves neighborhood and community needs and that generally is accessible from major traffic ways.

The site is currently used for surface parking and private primary education; staff is unaware of any redevelopment plans for the site under the currently proposed GR zoning.

With the amended request for rezoning, the applicant has proposed to prohibit all commercial and civic uses except those necessary to continue using the site as it currently is: Commercial Off-street Parking, Offsite Accessory Parking, and Private Primary Educational Facilities. That is, the applicant is proposing to prohibit all permitted uses in office zoning districts, and the commercial zoning districts, except for the three noted above.

To be sure, the proposed GR uses are not unreasonable in this location. As defined by the Land Development Code:

Commercial Off-Street Parking is defined as: the use of a site for the parking of motor vehicles on a temporary basis within a privately owned off-street parking facility. This use includes commercial parking lots and garages and excludes parking as an accessory use.

Off-site Accessory Parking is the use of a site for the provision of parking spaces, together with driveways, aisles, turning and maneuvering areas, clearances, and similar features, located on a different site from the principal use.

Private Primary Education Facilities is the use of a site for a private or parochial school offering instruction at the elementary school level in the branches of learning and study required to be taught in the public schools of the state.

Staff does not recommend GR zoning at this time, even if limited to only these three uses. If the zoning request is driven solely by the need or desire to continue use of the site as is, but in compliance with the City's code, then staff recommends the Fairview NCCD, which also governs use and development standards of this tract, be amended to allow for those additional uses on this tract, while keeping the current SF-3 base zoning.

The proposed zoning should be consistent with the purpose statement of the district sought.

Staff is aware of parking challenges along South Congress Avenue. Indeed, City staff was previously directed, by Council resolution, to work with residents, commercial property and business owners, and other stakeholders to develop short and long-term recommendations addressing parking challenges on South Congress and abutting neighborhoods (see Exhibit R). This problem-solving endeavor is thought to remain ongoing.

Staff appreciates the owner trying to help alleviate some of the shortage in readily available parking by providing parking to local business patrons when their parking is not used for church-related activities. GR, as a zoning district, is intended for an office or commercial use serving neighborhood or community needs. The parking shortage along South Congress Avenue is genuine; allowing parking on this site would serve that neighborhood

and community need. Although not abutting Congress Avenue directly, which is a major traffic way, the tract is easily accessible from South Congress. A separate argument can be made that City staff should not encourage surface parking along Congress Avenue, which has been designated as an Activity Corridor in the Imagine Austin Plan.

Nevertheless, as a zoning district, GR is inappropriate at this location at this time. Despite it being adjacent to a CS-zoned property (the current Church facility), and across Elizabeth Street from a CS-zoned property (currently a sign shop), the site is also equally bounded by family residential. While it is clear the property may be redeveloped with more intense uses than surface parking and a private school in the future, until there is such a project proposed, which can be evaluated on its own merits, staff does not recommend GR as a base zoning district.

In 2009, staff recommended support for the then-requested GO-base zoning on this tract. That staff support came with the following conditions:

- 2) Maximum floor-to-area ratio of 1:1;
- 3) Maximum height limitation of 40 feet or 3 stories;
- 4) Maximum building coverage of 50%;
- 5) Maximum impervious coverage of 70%; and
- 6) Specified the following as allowable uses: Administrative and Business Offices, Art Gallery, Art Workshop, Professional Office and Software Development.

The Planning Commission adopted the staff recommendation. Conditions along the perimeter streets – Monroe, Nickerson, and Elizabeth – have not changed since 2009. As a land use, staff would again support general office (GO) zoning on this tract with these and other appropriate conditions or restrictions.

Zoning should satisfy a public need and not constitute a grant of special privilege to an individual owner; the request should not result in spot zoning; and

Granting of the zoning should not in any way set an undesirable precedent for other properties in the neighborhood or within other areas of the city, and

As noted above, allowing for additional and legal parking on the existing parking lot for non-church users would satisfy a public need. However, if the requested GR zoning is granted, and with it a prohibition against all civic and commercial uses other than the three requested, it is difficult to assert this is not spot zoning.

Staff is concerned the grant of GR zoning, especially with all the commercial and civic prohibitions proposed by the applicant, will achieve the desired result – i.e., legal offsite accessory and commercial offsite parking on what would otherwise be a lot zoned family residence – but also is a form of boutique zoning that can set an undesirable precedent. Staff is of the opinion that requested zoning districts should not be so conditioned, restricted, or constrained so as to make the ultimate use of the site nearly unrecognizable from the land use zoning district requested or granted. If granted, a number of vacant and/or underutilized SF-3 zoned properties around the neighborhood and city may request similar GR-restricted zoning solely for parking purposes. The justification for such requests would be similar to this case – the need for additional off-street parking. Staff and Commission may be asked to support and recommend highly-customized GR requests for smaller SF-3

tracts, perhaps midblock, and perhaps not otherwise owned or used by an long-standing institution.

Conditions (whether in a CO or public restrictive covenant) prohibiting certain uses, enhanced site development standards, and restrictions to hours of operation are all reasonable and justifiable in certain cases. Recommending and adopting such conditions, as is the discretion of the Commission and Council, help ensure a proposal's compatibility with surrounding properties by limiting the parameters of site's use and development. However, staff believes such conditions and limitations should be secondary to the land use/zoning district request, rather than offered in a primary way to request a more intensive base zoning district.

Again, staff is aware of and sensitive to the undeniable parking problem in this area. Staff is aware, too, that this is a unique situation in which an institution that uses the parking lot only occasionally is trying to serve a larger neighborhood and community need. Staff supports the continued use of the tract for parking purposes. Staff does not, however, think that granting community commercial zoning district is a compatible solution to this problem.

While not ideal, perhaps, amending the Fairview Park Neighborhood Conservation Combining District (NCCD) to allow for the three uses on this tract, or similarly-situated and characterized tracts, could produce the same end result desired by the applicant as granting the zoning request. The purpose of the Fairview Park NCCD was, according to its ordinance, to establish special compatibility standards applicable to all properties and to modify certain base district use and site development regulations. NCCDs generally, as authorized by the LDC, are to preserve neighborhoods with distinctive architectural styles that were substantially built out at least 30 years before the date an application for an NCCD classification is filed. The Fairview Park NCCD was established in 1986, and amended in 2003 to include additional properties in the District and to modify site development standards for certain parcels and certain uses. It could be amended again to allow these three uses on this specific tract, or more broadly to similarly-situated tracts – however, defined – throughout the District. Doing so would allow the subject tract to continue providing a need, additional parking, without the necessity for a change to the underlying base zoning district.

EXISTING CONDITIONS & REVIEW

Site Characteristics

The subject tract is the eastern half of a block owned and used by the Congress Avenue Baptist Church. The approximate 44,440 square foot tract is primarily covered with surface parking, although an educational annex associated with the Church occupies a footprint of around 7,000 square feet. Mature trees line the perimeter of the tract along the northern and eastern right-of-way. There are no known environmental constraints to continued use of the site for parking and educational purposes. Any redevelopment would be subject to tree protection ordinances.

PDR Environmental Review

March 5, 2013 (MM)

1. The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the East Bouldin Creek Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City's Land Development Code. It is in the Desired Development Zone.
2. Impervious cover is not limited in this watershed class; therefore the zoning district impervious cover limits will apply.
3. This site is required to provide on-site structural water quality controls (or payment in lieu of) for all development and/or redevelopment when 5,000 s.f. cumulative is exceeded, and detention for the two-year storm. At this time, no information has been provided as to whether this property has any pre-existing approvals which would preempt current water quality or Code requirements.
4. According to flood plain maps, there is no flood plain within the project area.
5. Trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development's requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.
6. Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.

PDR Site Plan Review

March 14, 2013 (MSS)

1. Any development on this site will be subject to *Subchapter E: Design Standards and Mixed Use*. Urban Roadway requirements will apply.
2. Upon rezoning, this site will be subject to *Article 10, Compatibility Standards*

PDR Transportation Review

March 18, 2013 (SJ)

1. No additional right-of-way is needed at this time.
2. A traffic impact analysis was not required for this case because the traffic generated by the proposed zoning does not exceed the threshold of 2,000 vehicle trips per day. [LDC, 25-6-113].
3. A Neighborhood Traffic Analysis maybe required at the time of site plan application if the proposed land uses generate more than 300 trips per LDC, Sec. 25-6-114.
4. Existing Street Characteristics:

Name	ROW	Pavement	Classification	Sidewalks	Bike Route	Capital Metro
S Congress Ave	120'	90'	Arterial	Yes	Yes	Yes
Nickerson St	60'	30'	Local	Yes	No	Yes (within ¼ mile)
E Monroe St	60'	30'	Local	Yes	No	Yes (within ¼ mile)
Elizabeth St	60'	40'	Local	Yes	No	Yes (within ¼ mile)

PDR Austin Water Utility Review

March 4, 2013 (NK)

FYI: The site is currently served with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the proposed land use. Depending on the development plans submitted, water and or wastewater service extension requests may be required. Water and wastewater utility plans must be reviewed and approved by the Austin Water Utility for compliance with City criteria. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.

RE: South Congress Baptist Church Neighborhood Plan Amendment and Rezoning
1511 South Congress Avenue
NPA – NPA-2013-0022.01
Rezoning – C14-2013-0022

Dear Mr. Guernsey,

The two above referenced cases have recently been filed with the City of Austin for review and timely consideration by the staff, Planning Commission and City Council. The subject property is currently located within the boundaries of the South River City Neighborhood Planning Area. While the address of the property is 1511 South Congress Avenue, the limits of the Neighborhood Plan Amendment and Rezoning is for the eastern ½ of the block that is currently zoned as "SF-3", is 0.9513 acres in size, and is primarily a parking lot and a 3 story building.

The application for the Neighborhood Plan Amendment is to modify the Future Land Use Map of the Neighborhood Plan from Civic Land Use to Mixed-Use Land Use. The application for rezoning is to modify the base district from "SF-3", Family Residence, to "GO", General Office.

However, with this letter, we are modifying the request from "SF-3" to "GR" zoning for the following reason –

The intent of these applications is to provide a zoning district that allows Off-Site Accessory Parking, Commercial Off-Street Parking and Private Primary Education Facility as Permitted Uses.

L A N D P L A N N E R S

The "GR" zoning district is the lowest, most-restrictive zoning district to allow for Commercial Off-Street Parking as a Permitted Use. Off-site Accessory Parking is a Permitted Use in "GO" zoning. The existing parking lot is currently used by patrons that frequent the eclectic businesses along South Congress. These applications and hopeful approvals will result in the parking to be legal. The alternative is for the patrons to not park on the church parking lot which could mean spillover to the neighborhood streets.

The existing building located in the rezoning area is currently underutilized and could serve for a Monday-Friday Private Primary Education Facility, which is a day use.

Legal and multiple use of the parking lot would better serve the neighborhood, the businesses along South Congress Avenue, the school, and, South Congress Baptist Church. Looking at a typical week of Sunday through Saturday, the greatest needs for parking are as follows:

- 1) Sunday morning - South Congress Baptist Church service.
- 2) Sunday afternoon and evening – South Congress businesses.
- 3) Monday-Friday daytime – School.
- 4) Monday-Friday evening – South Congress businesses.
- 5) Saturday - South Congress businesses.

This multiple use approach of the parking lot with these proposed uses is a better use of the parking lot and is a community based approach versus a single use approach.

South Congress Baptist Church is the owner of the parking lot and can control the facility for any event that the church may hold that would necessitate the need for Church parking. Likewise, with approval of the request changes, the Church can control the use of the parking lot in a manner consistent with varying business and civic uses that may desire to utilize the parking lot.

The rezoning to "GR" comes with a plethora of permitted uses that are not desirous of the Church or the neighborhood. The vast majority of the "GR" permitted uses can be eliminated through a Conditional Overlay tied with the rezoning which will run with the land. With that, this request can include a prohibition of all "GR" uses except for Commercial Off-Street Parking, Off-Site Accessory Parking and Private Primary Education Facility as the only permitted "GR" uses and all other uses are as covered under the current "SF-3" zoning. Further, the Fairview NCCD will remain in effect on the property. We would anticipate the rezoning to read as "GR-CO-NCCD-NP" which would stand for

"Community Commercial-Conditional Overlay-Neighborhood Conservation Combing District-Neighborhood Plan" with the "CO" portion covering the gamut of anticipated prohibited uses.

To reiterate, the main intent of the Neighborhood Plan Amendment and Rezoning is to resolve a neighborhood parking issue by providing for legal use of the parking lot and to provide sustainable opportunities to open the parking lot for multiple uses across a non-conflicting spectrum of time through a typical week. Therefore, we respectfully request a positive recommendation from the neighborhood and City staff, and, request that this item be carried forth to Planning Commission and City Council accordingly.

If you have any comments, concerns or questions, please contact me at my office.

Sincerely,

A handwritten signature in black ink that reads "A. Ron Thrower". The signature is written in a cursive, flowing style.

RE: C14-2013-0022 Congress Avenue Baptist Church Re-zoning

Mr. Heckman,

In the South River City Citizens Neighborhood Association's General Meeting on October 7, 2013, the membership voted to oppose the proposed re-zoning of the eastern half of the Congress Avenue Baptist Church's lot at 1511 South Congress Avenue from SF-3-CO-NCCD-NP to GR-CO-NCCD-NP. Members of SRCC met multiple times with the applicant to determine if there was any common ground but ended up opposing the up-zoning for the following fundamental reasons:

- Intensive commercial zoning like GR is not appropriate on an existing SF-3 property that is essentially bordered on three sides by on SF-3
- Nickerson St., the street that the property borders on the east side, is SF-3 residential from one end to another and there is no precedent for having commercial zoning along this street
- SRCC supported up zoning on the western part of the lot. It is currently CS and the neighborhood supports intensive commercial development on that part of the property since it fronts South Congress and would not require ingress/egress onto residential streets like the eastern part of the lot would
- This proposed up-zoning violates the neighborhood plan by allowing for commercial creep and thus failing to maintain the residential nature of entire street.

While the desire to charge for parking on their existing surface lot seems like a benign request, the requested up-zoning, neighborhood plan amendments, and NCCD amendments will have a massively negative effect on the neighborhood and fundamentally change the quality of life of our residents for the worse.

Sincerely,

Marc Davis
SRCC President

Subject: 1511 S. Congress Application for Rezoning

I understand the Commission may not take action on the above referenced application until a public hearing is held but I feel compelled to express my concern.

The City has granted so many permits for various situations in our neighborhood that have negatively impacted our neighborhood and property values. It is alarming to property owners in our neighborhood that the church is making this request. The church is no longer an asset to the community it has become a business trying to maximize its profits and the church pays no property taxes! . Neighbors talk about these issues daily and are concerned the City is putting merchants, restaurants, bar owners and now the so called church request before the rights of single family property owners. We received notices from the City about these applications and the neighbors voice their concerns but the City historically disregards the neighborhood concerns and grants the request anyway.

No one in our neighborhood wants the zoning changed for the Baptist Church. The church property backs to Nickerson Street which is all Single Family dwellings except for the church parking lot. To allow the church to change the zoning to GO-NP would destroy the neighborhood even more. We already deal with the overflow of trash (no City garbage cans), parked cars, traffic, and pedestrians in our neighborhood due to the number of restaurants, bars and food trailers the City has allowed in the neighborhood.

The City is aware of the parking issues in our neighborhood and still gave permitting for the food trailers and the addition of *More Home Slice*! Now the church has the *Hey Cupcake* trailer on the front corner of their lot across the street from *More Home Slice* which created more traffic and people lingering around that corner. *(How Christian like for a church to have a food trailer in their front yard)*. We have to drive several blocks out of our way and come in the back of the neighborhood to get to your home due to all the parked cars on both sides of these narrow residential streets. Even these back streets are becoming congested with park cars on both sides of the street! When these streets were put in our neighborhood without side walks they were not designed for parking on both sides of the streets, large SUVs, coming and going and pedestrians walking the streets. When does all this madness and lack of neighborhood planning stop?

Subject: Case NPA-2013-0022.01
Case C14-2013-0022

On May 8, 2013 the Greater South River City (GSRC) Neighborhood Planning Contact Team (NPCT) met regarding requests by Congress Avenue Baptist Church (CABC) to change the land use and zoning of the eastern half of their property at 1511 South Congress Avenue. Their initial request was to change the land use from Civic to Mixed-use, and the zoning from SF-3-NCCD-NP to GO-NCCD-NPO; CABC subsequently amended the request to change the zoning from SF-3-NCCD-NP to GR-CO-NCCD-NP. The property is currently a parking lot with a three story structure on the southwest corner.

The NPCT meeting was attended by several stakeholders whose residences adjoin the eastern half of CABC's property. After hearing from these neighbors and thoughtful discussion, the NPCT voted unanimously to oppose CABC's requests to change the use and zoning of this tract. Several considerations determined our decision.

First and foremost, CABC's request is inconsistent with the first and primary goal (Goal A) in our Neighborhood Plan (NP), which is to "Maintain the historic fabric and respect the established neighborhood character and natural assets". This tract is surrounded on three sides by single family residences; in fact the eastern half of the blocks along the west side of Nickerson Street are all single family residences. Allowing a change to the eastern half of this block would allow commercial encroachment into an established residential area and degrade the character of the single family neighborhood.

Our second consideration is based on one of the most fundamental principles of zoning: zoning changes should be based on the intended general use of the land in combination with surrounding zoning compatibility and not with the idea of a particular specific use in mind. This case should be decided based on how the use of this property will impact the surrounding adjacent properties, and not on the merits of CABC's stated intent for this property. CABC's request is for a particular use that benefits them but would degrade the quality of life for their single family residential neighbors. CABC's request is in direct contradiction of the neighborhood plan which shows a very clear pattern that the western half of Nickerson is all residential and not commercial.

The neighbors and the NPCT have no objection to, and in fact have consistently supported, commercial uses located along commercial corridors. This property, however, is surrounded by single family residences along residential streets.

This is the second request in four years by CABC to change the use and zoning of this property. Four years ago (in 2009) the neighbors and the NPCT supported CABC in their request to change the use and zoning of the western half of this property, and offered a compromise solution to their request to change the use and zoning of the eastern half. CABC's request then was based on their stated plan to rebuild their establishment to include a parking garage, daycare, bookstore and coffee shop. None of the changes we supported in 2009 have occurred; in fact no changes have been made to the property other than remodeling the northwest corner for lease to food trailer Hey Cupcake. The point is, plans change, but zoning changes are permanent.

It is doubtful anyone would argue that the commercial success of South Congress Avenue has brought parking and traffic issues to the area; however CABC did not create this problem and is not responsible for solving it. The same is true for the several other churches in the vicinity, including the one directly southeast of CABC at Monroe and Nickerson. The precedent that would be set by allowing CABC to change their land use and zoning in order to profit from South Congress Avenue's commercial success would erode the character of the neighborhood, likely making it unsuitable for young families. There are myriad solutions to Congress Avenue's parking problem, including mass transit, shuttle operations to off-site parking, and/or a nearby parking garage built along a commercial corridor. It is unnecessary to proceed down the slippery slope of having neighborhood churches solve Congress Avenue's traffic and parking problems, especially when to do so would destroy the character of the neighborhood.

According to Ron Thrower's April 16, 2013 letter to Greg Guernsey, the church only uses their parking lot on Sunday mornings. The neighborhood and the NPCT have no objection to CABC allowing Home Slice Pizza's employees and customers to use CABC's parking lot; indeed this practice has been occurring for several years and, according to City staff, no one has objected. We understand that CABC can not legally lease the property for parking, and we are not suggesting that they have any obligation to provide parking for Home Slice Pizza or any other Congress Avenue merchant. What we are opposed to is changing the zoning of the property to provide for commercial use of this property. If and when this property returns to the tax rolls, it should be for single family residential use, consistent with the surrounding properties, and with the properties along the entire west side of Nickerson Street.

Please contact me at 512-444-4153 or GSRC NPCT Vice-Chair Sarah Campbell at 512-462-2261 if you have questions.

Sincerely,

Jean Mather, Chair
GSRC NPCT

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application's hearing to a later date, or may evaluate the City staff's recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

ROA/12/13

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

For additional information on the City of Austin's land development process, visit our website:

PUBLIC HEARING INFORMATION

This zoning/rezoning request will be reviewed and acted upon at two public hearings: before the Land Use Commission and the City Council. Although applicants and/or their agent(s) are expected to attend a public hearing, you are not required to attend. However, if you do attend, you have the opportunity to speak FOR or AGAINST the proposed development or change. You may also contact a neighborhood or environmental organization that has expressed an interest in an application affecting your neighborhood.

During its public hearing, the board or commission may postpone or continue an application's hearing to a later date, or may evaluate the City staff's recommendation and public input forwarding its own recommendation to the City Council. If the board or commission announces a specific date and time for a postponement or continuation that is not later than 60 days from the announcement, no further notice is required.

During its public hearing, the City Council may grant or deny a zoning request, or rezone the land to a less intensive zoning than requested but in no case will it grant a more intensive zoning.

R 8/13/13

However, in order to allow for mixed use development, the Council may add the MIXED USE (MU) COMBINING DISTRICT to certain commercial districts. The MU Combining District simply allows residential uses in addition to those uses already allowed in the seven commercial zoning districts. As a result, the MU Combining District allows the combination of office, retail, commercial, and residential uses within a single development.

INFORMACIÓN DE AUDIENCIA PÚBLICA

Esta petición de zonificación / re zonificación será repasada y acción será tomada de acuerdo a dos audiencias públicas: ante la Comisión de Usos Urbanos y el cabildo municipal. Aunque solicitantes y/o su(s) agente(s) se les requiere atender la audiencia pública, usted no esta bajo requisito de atender. De todos modos, si usted atiende la audiencia pública, tendrá la oportunidad de hablar a FAVOR o EN CONTRA al propuesto desarrollo urbano o cambio de zonificación. Usted también puede contactar a una organización de protección al medio ambiente u organización de vecinos que haya expresado interés en la aplicación teniendo implicaciones a su propiedad.

Durante la audiencia pública, la comisión podría postergar o continuar audiencia del caso en una fecha futura, o puede evaluar la recomendación de los oficiales municipales y las del público al mismo tiempo mandando su recomendación al cabildo municipal. Si la comisión anuncia una fecha y hora específica para postergar o continuar discusión, y no se extiende más de 60 días, no tendrá obligación de otra notificación pública.

El cabildo municipal, durante su audiencia pública, puede otorgar o negar una petición de zonificación, rézonificar el terreno a una clasificación de zonificación menos intensiva que lo que es pedida. En ningún caso se otorgara una clasificación de zonificación más intensiva de la petición.

R 8/7/13

Para otorgar un desarrollo de usos urbanos mixtos, el cabildo municipal puede agregar la designación USO MIXTO (MU) DISTRITO COMBINADO, *Mixed-use (MU) Combining District*, a ciertos usos urbanos de comercio. La designación MU- Distrito Combinado simplemente permite usos urbanos residenciales en adición a los usos ya permitidos el los siete distritos con zonificación para comercio. Como resultado, la designación MU- Distrito Combinado, otorga la combinación de oficinas, comercio, y usos urbanos residenciales en el mismo sitio.

We are against the church's request to change

the zoning for the parcel that faces Nickerson St

That parcel needs to remain SF3 - NCCD-NP

The neighbor voted to keep this SF3. We do not

need commercial property facing residential property

Nickerson is residential SF-3 and this change

request by the church is not welcomed! The

church seems to be all about making money and

no longer about community, what kind of church

Comments: I will be out of town and unable to attend the hearings/meetings. However, I strongly object to the proposed re-zoning of the church. The neighborhood association has tried to work with church leadership and express our concerns with the proposal. This neighborhood has such a great, unique vibe. The church is an important part and we can come to a better solution than rezoning.

RE: Rezoning and NPA of Congress Avenue Baptist Church

Dear Marc,

Thank you for meeting with Pastor Tuthill, Ms. Terri Hannifin, and myself on August 27th to discuss the rezoning and Neighborhood Plan Amendment for the back ½ of the property owned by Congress Avenue Baptist Church Property. We are all in agreement that working to an equitable solution is the best path for all parties which lead us to this letter to outline the position of the Church as we move forward.

To start, the basis for the commercial rezoning request has always been to seek the ability for two commercial uses to legally occur on the eastern ½ block of the property that is owned by the Church. These two commercial uses are specifically Commercial Off-Street Parking and Off-site Accessory Parking and the commercial use of the parking area occurs illegally today. The original request did include consideration for a civic use as a permitted use, which we have dropped this Private Primary Education Facility use due to the length of time the rezoning is taking and the school has sought another site for their operations.

The following is a brief summary of our understanding of the higher level concerns of the neighborhood based on the discussions we have had thus far. If any of this is misstated, it is not with intention and please offer clarification to anything you find to not be in alignment with your understanding. Based on our meetings and correspondence with the neighborhood, the

neighborhood does not object to the Church illegally leasing out spaces on its surface parking lot since it does not materially change the current use and helps alleviate South Congress parking issues during busy times. The neighborhood also respects that, under the current civic zoning, the Church has the ability to build a parking structure on their lot as long as it is only used for church purposes. The neighborhood, however, is not agreeable to any rezoning of the property that would open up the possibility for the Church to build a commercial parking structure on the lot.

As mentioned by Pastor Tuthill, the Church can no longer continue the illegal commercial uses that occur on the Church property and must seek compliance which comes in two potentially extreme forms. One is the rezoning process we are currently underway with and the other is to gate the parking facility. The Church must be able to properly control what occurs on their property. While the parking lot area has been "open" for 110 years without legal parking management operations in place, the Church is the sole responsible party for all maintenance without the benefit of income to offset the maintenance costs.

Additionally, the Pastor outlined the long-term plans for the back ½ of the block will, at some point, contain a parking structure to serve the Church. The Church fully recognizes the concerns of the neighborhood that this could then open up the possibility for the two commercial uses taking up the entirety of the garage. That is not the intentions of the Church with the rezoning as the Church is seeking to reach a level of legal compliance for the continuation of the commercial uses covering the eastern ½ of the block.

Using all the above mentioned concerns and criteria as guidance to potentially reach an equitable compromise for all parties leads to the following as a conceptual outline for an agreement between the neighborhood and the Church:

- 1) The Church will continue to move forward with the current Neighborhood Plan Amendment request from Civic to Mixed-use. This is required to change the zoning on the Church property.
- 2) The Church will continue to move forward with the current rezoning request to "GR", Community Commercial zoning district, to allow for Commercial Off-Street Parking and Off-Site Accessory Parking as the only two commercial uses allowed and all existing permitted and conditional uses allowed with the current "SF-3" zoning of the property.

This "GR" zoning is the minimum conventional zoning district that allows for Commercial Off-Street Parking. The "GR" is needed for this use even though Off-site Accessory Parking is allowed in more restrictive zoning districts.

- 3) The Church has agreed to a zoning roll-back to "SF-3", Family Residence zoning district should the Church sell the property in the future.
- 4) The Church has agreed to limit the number of parking spaces that can be used for Commercial Off-Street Parking and Off-Site Accessory Parking to the maximum amount of parking spaces that can dimensionally fit on the surface square footage area of rezoning. A layout will be provided in the near future to accurately identify a number of parking spaces that can fit in this area.
- 5) The neighborhood will support the zoning case going forward with the conditions listed above.

The aforementioned outline for a consideration of an agreement is conceptual in nature at this time and no documents have been drawn up to formalize this process. The intentions of the conceptual agreement are unwavering. It is our desire, and presumably the neighborhood as well, that these conditions can be placed within the confines of the Zoning Ordinance as Conditional Overlays or within a Public Restrictive Covenant. We are hopeful that discussions and vetting can occur at this stage based on the principals of the neighborhood position and the resolutions put forth in the conditions listed above.

The Church is the remaining sole and logical potential partner to provide aid to the parking issues that exist in the area. It is a sustainable measure that church parking lots have multiple use parking availabilities to serve a community rather than solely for a church use which has a very narrow and limited time usage of the parking lot. The Church is very committed to the neighborhood and will forever be a good neighbor to the community.

Moving forward, it is clear and agreeable that time under the currently scheduled Planning Commission hearing date of September 10th for the two cases will not allow for the proper vetting by the neighborhood of this conceptual agreement. As such, we agree to enjoin with South River City Citizens Association in the request for a postponement of 1 month to October 8th so that we may all continue dialogue to reach an equitable resolution.

Should you have any questions, please contact me and please let us know when any meetings are essential with our attendance. Thank you for your time and consideration.

Sincerely,

A handwritten signature in cursive script that reads "A. Ron Thrower".

Pastor Tuthill, Congress Avenue Baptist Church

RESOLUTION NO. 20110310-024

WHEREAS, South Congress Avenue has become a nationally known retail district that includes shops, restaurants, music venues and food trailers; and

WHEREAS, this active commercial area borders single family residential homes; and

WHEREAS, on August 31, 2006, the Austin City Council approved a major amendment to the City of Austin's Land Development Code, codified as Subchapter E (*Design Standards and Mixed Use*) of Chapter 25-2, including expedited review of applications to establish Residential Permit Parking (RPP) districts; and

WHEREAS, both the Bouldin Creek Neighborhood Plan and the Greater South River City Neighborhood Plan name quality of residential life as well as the support and success of locally owned businesses in their vision statements; and

WHEREAS, Austin Transportation staff have been working to address a number of issues related to parking and traffic in the area; and

WHEREAS, there is currently a group of stakeholders in the process of reviewing a city wide Parking Benefit District Draft Ordinance as well as the Residential Permit Parking Program with the Transportation staff and other city staff; this parallel conversation will inform the South Congress conversation, and experience on South Congress will likewise inform the broader city wide conversation; **NOW, THEREFORE,**

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF AUSTIN:

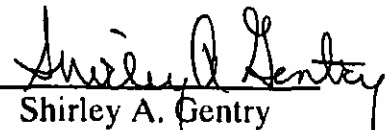

The City Manager is directed to:

1. Work with residents, commercial property and business owners, the City Departments of Transportation and Planning & Development Review, and other stakeholders to develop short- and long-term recommendations addressing parking issues on South Congress Avenue and in adjacent neighborhoods and present them to Council within 90 days;
2. Coordinate with all stakeholders to examine specifically for the South Congress area: (1) the probable effects on the South Congress business district should a comprehensive Residential Parking Permit program be adopted in adjacent neighborhoods; (2) the benefits and costs of increased parking enforcement in the neighborhoods surrounding South Congress Avenue, particularly during peak business periods; (3) the value of a Parking Benefits District as a potential tool for addressing on- and off-street parking; (4) possible methods for providing employees of South Congress businesses with access to on-street parking spaces that would otherwise be reserved for residents under a Residential Parking Permit program; and
3. Communicate with Council the need for a City Code amendment if, at any time during the 90-day conversation period, it becomes

likely that such an amendment will be a part of the stakeholder-recommended response to the problem.

ADOPTED: March 10, 2011

Shirley A. Gentry
City Clerk

MEMORANDUM

TO: Mayor and Council

CC: Marc A. Ott, City Manager
Robert D. Goode, Assistant City Manager
Sue Edwards, Assistant City Manager
Greg Guernsey, Director, Planning & Development Review Department

FROM: Robert Spillar, P.E., Director 
Austin Transportation Department

DATE: June 9, 2011

SUBJECT: CIUR 514 - South Congress Area Parking Recommendations

South Congress Stakeholder Meetings on Parking

The Austin Transportation Department (ATD) and Planning and Development Review Department (PDRD) recently conducted a series of meetings with South Congress stakeholders to discuss parking issues and elicit ideas about parking solutions for the South Congress area and adjacent neighborhoods. Staff met with stakeholders on four occasions:

South Congress Merchants Association – April 12, 2011
South River City Citizens/Travis Heights Neighborhood Association – April 26, 2011
Bouldin Creek Neighborhood Association – April 26, 2011
General Community Meeting – May 31, 2011

Staff has worked to identify issues and develop short-term solutions, as well as address and continue efforts to develop mid-term and long-term solutions. Issues identified by stakeholders include:

- Need for additional parking, both on- and off-street, for residences, businesses, churches, and parks
- Need to address spillover parking into adjacent neighborhoods
- Parking solutions should be inclusive and balance the needs of all stakeholders
- Need for parking enforcement
- Desire for parking turnover for customers

Progress on these issues is detailed below.

Short-Term Solutions

Some initial efforts have been made to help bring immediate parking relief to South Congress and adjacent neighborhoods, including:

South Congress Improvement Project (SCIP):

- Ninety additional parking spaces are being installed along S. Congress from Riverside to Live Oak

- Bus stop consolidation and pedestrian and bicycle improvements will allow for more viable alternative modes of transportation
- Continued discussion with Capital Metro for improved transit service to South Congress, including planned implementation of MetroRapid bus along the corridor
- A new pedestrian hybrid beacon is planned along S. First at W. Elizabeth. This will provide residents west of S. First a safer opportunity to walk or bicycle to S. Congress attractions instead of driving and parking.

Employee Parking:

- The owner of the commercial buildings along the west side of the 1700 block of S. Congress has actively sought alternative off-street parking for her tenants' employees
- Many employees along S. Congress either bike or take transit to and from work

Parking Enforcement:

- Staff is developing an educational windshield flyer on parking laws that can be distributed by merchants and residents as part of an educational campaign to encourage parking compliance
- Staff has begun painting curbs red to reflect state law and discourage parking too close to intersections and fire hydrants. Initial reactions from the community indicate this is having a positive impact.

Remaining Issues:

Residential Permit Parking (RPP):

- A briefing on the revised RPP policy will be presented to the Urban Transportation Commission on June 14th. In general the RPP issues are:
 - The initiation of RPP can have an adverse impact on the churches, especially those with little or no on-street parking. Further discussion with stakeholders should reveal appropriate options to address this need.
 - Merchants are concerned that the desired times and days for RPP coincide with their busiest times, thus RPP should be structured to address this.
 - There are existing street segments which have RPP in effect for all days and all hours of the day. As part of a broader consideration, there may be a need to reconsider these street segments for less restrictive RPP regulations.
 - Some stakeholders have suggested there should be a moratorium on new RPP until a plan for the S. Congress can be developed and implemented.
- Staff has worked with stakeholders to create a more flexible policy intended to mitigate the parking issue with the least restrictive method
- Upon approval of the revised RPP policy, staff will work with stakeholders to address RPP requests.

Vertical Mixed Use (VMU):

- There is a desire by some stakeholders to reconsider the VMU ordinance. It has been suggested that VMU should only be applicable if a VMU development actually exists.
- Per the VMU ordinance, expedited review of a requested RPP must occur within two weeks. However, staff still has authority to approve, modify, or deny requests for RPP.

Parking Benefit District (PBD)

- Members of the South Congress community have agreed to continue discussions regarding a Parking Benefit District (PBD).
- Parking meters, or other funding mechanisms, would be required to fund a PBD. A previous poll of S. Congress merchants indicated they are opposed to parking meters along S. Congress. However, lack of turnover exacerbates the shortage of parking and Turnover could be increased by adding parking meters
- Within a PBD, 30% of net revenue from parking meters could be reinvested back into a PBD area for various improvement projects (sidewalks, curb ramps, streetscaping, etc)

Parking Variances

- Address impacts of parking variances granted to developments. Previous developments have been granted off-street parking variances or have not adhered to their conditionally granted off-street parking variances. Thus the limited available on-street parking has been granted to multiple new land uses, effectively "giving" the same commodity to multiple entities.
- Consider options to address parking impacts of eatery trailers currently not required to provide parking

Parking enforcement

- Develop options to bring additional parking enforcement to the area. There is a critical need for focused enforcement of traffic laws relative to on-street parking. Parking too close to intersections and fire hydrants is common. Parked vehicles frequently partially block driveways but when APD is called, residents state that the officers say they can not ticket or tow unless the parked vehicle is completely blocking the driveway. ATD will have further discussions with APD and Municipal Court to better understand the legal issues and seek potential solutions for more effective enforcement and adjudication while also sharing information with the community regarding any legal limitations.

Parking garages

- Discuss permitting, location, design, and cost requirements for parking structures in the area.

Revision of traffic impact analysis requirements

- Consideration will be given to revising the traffic impact analysis (TIA) and neighborhood traffic analysis (NTA) requirements so that any development or redevelopment that occurs within a given area, or parking shed, must perform a TIA or NTA and a parking impact analysis (PIA). The scope of a TIA, NTA, and PIA can be defined on a sliding scale relative to the anticipated magnitude of impact and context of the area. TIAs, NTAs, and PIAs should consider all land uses, including residential and trailer-type businesses, and should consider cumulative effects of other existing or planned projects.

Next Steps

Over the next 90 days, staff will continue to work with stakeholders in the form of a "working group" with representatives from both neighborhood and business associations to identify issues and develop options for potential solutions. As we move forward, we will continue to communicate that the supply and demand sides of parking should be known and managed by a locally vested entity such as a PBD or management district. Also, on- and off-street parking

should be priced to compliment use and appropriate turnover. On-street parking should be priced to encourage relatively short-term use. Off-street parking (either as surface lots or structured parking) should be priced to encourage longer-term use.

In addition to continued stakeholder discussions, we will also work on the following:

- Facilitate a conversation with APD and Municipal Courts regarding enforcement of parking laws.
- Continue to install red-painted curbs throughout the S. Congress area as workload and resources allow.
- Identify opportunities for larger community meetings to discuss issues, potential solutions, and next steps in coordination with the working group.

Staff will continue to provide reports to Council on a regular basis as efforts proceed and seek further guidance from Council as appropriate. Please do not hesitate to contact me should you have any questions or concerns.
