Additional Backup Information

It is the recommendation of the Austin Fire Department (AFD) to partner with Travis County, who we have been in discussions with, to each make an investigatory purchase of one wildfire smoke detection sensor system. Then we would coordinate with the city of Westlake for a total of three sensor systems for Travis County. We believe we are able to locate at least three suitable tower locations, complete the tower engineering, and place these sensors without adding expensive towers for this program.
