In response to a request from Mayor Leffingwell at the 05/15/2014 Public Hearing, below are questions from citizens and Councilmembers on the proposed Lake Austin ordinances with responses from staff.

#	Source	Topic	Comment	Response
				Any new man-made channels must comply with current code
				and thus bulkheads on new man-made channels, if needed,
			Allow vertical bulkheads on any man-made channel, not	cannot be vertical. Vertical bulkheads on existing channels,
1	Citizen Comment	Bulkheads	just existing man-made channels	when replaced, are also not allowed.
			Proposed dock ordinance ties docks to residential houses,	The proposed ordinance ties docks to residential use of the
			but there are small recreational lots only for docks on Lake	lakefront property, not residential structures. Lots without
2	Citizen Comment	Docks	Austin	houses may have docks.
3	Citizen Comment	Docks	Proposed dock ordinance has a 3-year time span to repair docks, which is not consistent with lake draw down schedule	This comment refers to an older version of the ordinance. The proposed ordinance allows repairs to docks at any time, or bulkheads at any time under a site plan. Repair to bulkheads under a site plan exemption are limited to 25% of the bulkhead once every 3 years. Greater than 25% of the length may be replaced at any time with a site plan.
4	Citizen Comment	Docks	Light stations on docks are required to have 2 bulbs on each corner and every 15 ft, even if docks are close together	This is current code, and necessary to preserve navigation safety at night. The only change proposed addresses the type of bulb required to allow for more efficient lighting.
5	Citizen Comment	Docks	Allowing structural component replacement for non-complying docks in perpetuity is problematic. Rarely does only 1 piling rot	This comment refers to an older version of the ordinance. Structural components may be repaired or replaced at any time with a site plan. Non-complying structures may keep their existing footprint and number of slips in perpetuity if legally constructed
				Staff agree that the 50% rule was frequently abused as a means
			Dock construction with the 50% rule done under a site plan	to facilitate illegal construction. The 50% rule has been
6	Citizen Comment	Docks	exemption has caused problems previously	removed from the proposed ordinance.

#	Source	Topic	Comment	Response
				The proposed ordinance does not allow replacement of
				structural components with a site plan exemption and is in
			Structural component repair and replacement should not	alignment with the Lake Austin Task Force recommendation
7	Citizen Comment	Docks	be done with a site plan exemption	that structural repairs should be done under a site plan
				The proposed ordinance specifically defines what is legal or
8	Citizen Comment	Docks	Define legally permitted	would qualify for amnesty in 25-2-963.
				Footprint is defined in the proposed ordinance to include the
			Define footprint. Currently reviewers use the lower	roof overhang and all appurtenances. This is consistent with
			footprint of the dock but the proposed ordinance includes	current practice and is consistent with how the area of other
9	Citizen Comment	Docks	roof dripline	structures is measured for code compliance
				City legal staff advise that there are no variances to the use
				regulations specified in 25-2-893, and that Council must
				approve change in uses. The proposed ordinance will be
				amended to add slides and other similar recreational
				equipment. Ladders and other items identified by the Friends
			Appurtenances to docks not listed in 25-2-893 (eg, slides,	of Lake Austin would already be allowed under the proposed
10	Citizen Comment	Docks	ladders) would require Council approval	ordinance.
			Sanitation facilities are required for cluster docks with 2-10	Under current code, sanitation facilities are required for cluster
			slips that must be located 100 ft away from the lake.	docks and marinas and must be at least 100 feet from the
			However, these marina-like facilities may be located on	shoreline if permanent. The proposed ordinance does not
			narrow strips of land along the lake without 100 feet of	change this requirement. Sanitation facilities should not be
			distance from the lake. If sanitation facilities are allowed	allowed on residential docks because of the high risk of raw
			for these marinas within 100 feet of the lake, then allow	sewage contamination of Lake Austin from wastewater
11	Citizen Comment	Docks	them on all docks	infrastructure on a dock.

#	Source	Topic	Comment	Response
<u>"</u>	Citizen Comment,		Change from 1,200 to 1,600 sq ft for dock size if include	The proposed 1,200 sq ft dock footprint was developed to allow for up to two 10 ft x 24 ft boat slips with 720 sq ft of additional area for walkways and sun decks. This would allow for 3 ft wide walkways around two boat slips, a 5 ft x 10 ft landing to the dock and a 13.5 ft x 27 ft sun deck. The average size of docks on Lake Austin is 972 sq ft, and an estimated 85% of existing docks are less than 1,200 sq ft. Two story docks are allowed. Increasing the dock area to 1,600 sq ft would enable future docks to illegally cut out 2 additional boat slips in the future (to
12	,	Docks	roof dripline	illegally store up to 4 boats)
13	Written Comment	Docks	As written, the ordinance will make more than 90% of the existing shoreline improvements non-compliant	There is no assessment of how many docks do not comply with current code, and there are illegal structures on the lake today. Staff estimate that most likely structures that are non-complying under the proposed ordinance are non-complying under current code today.
14	Written Comment	Docks	Provisions in the draft ordinance alter the long-standing accessory use rights of residential lakeside property owners	The proposed ordinance does not negatively impact the accessory use rights of lakeside property owners, and in fact allows docks as an accessory structure to a residential use even if there is no residential structure on a lot which is less stringent than current code.
15	Written Comment	Docks	Landowners must show they have title to the land under their docks or be subject to a license agreement with the City	This is incorrect. The proposed ordinance actually removes the burden on a lakefront property owner to prove ownership of submerged land under the dock prior to application for a permit, but without waiving the rights of the City to any land owned by the City or with a City easement

			Permit, as it appears that 25 cubic yards allowed in the	Under the applicable US Army Corp of Engineers Nationwide
			proposed ordinance is more than what USACE allows under	Permit 19, up to 25 cubic yards of dredging may be allowed
2	3 Citizen Comment	Dredging	Nationwide Permit 13	which is consistent with the proposed ordinance.
24	4 Citizen Comment		Proposals not comprehensively designed to protect Lake Austin as drafted, but would promote Austin's economic well-being	City staff with the recommendation of the Planning Commission and the Environmental Board have proposed draft ordinances that are protective of environmental quality while preserving the existing entitlements of property owners.
2:	Written 5 Comment			The LATF made only a few specific recommendations for code modifications, but generally asked staff to clarify and update the code. Of the specific recommendations of the LATF relating to shoreline and dock development, the proposed ordinances are consistent with the LATF consensus recommendations except for administrative variances.
	Written 6 Comment	Gradient Boundary	The LATF recommended that the City investigate the possibility of establishing license fees for private docks on public lands. The licensing language of 25-2-1177 as proposed continues to exempt docks from City licensing requirements, with additional language that the City is not waiving any rights which is proper and protective of public interests	This comment accurately reflects the language and intent of the proposed ordinances.
	Written 7 Comment	Gradient Boundary	There was no discussion of gradient boundary issues by the LATF. The proposed language of 25-2-1177 is arbitrary and discriminatory. This proposal will shift the burden of proving land ownership for a dock to the applicant.	This comment was based on an older version of the ordinance. The proposed ordinances do not reference the gradient boundary, and do not require the property owner to prove ownership. The proposed ordinance does allow for lakefront property owners to have a dock without having to prove ownership, which is less stringent than current code, but does not waive the City's rights.
			Restore the allowance in 25-2-551 for clearing vegetation	This section is not necessary in 25-2-551 as it already exists in
2	8 Citizen Comment	LA District Zoning	as needed for surveying	code (see 25-8-321) with the same language.

				NP zoning is effectively excluded from the proposed overlay
			Overland and the COV of and a send about district the D	because there are no NP properties zoned LA, DR, or RR. PUD
			Overlay covers only 60% of area, and should also include P and PUD zoning but exclude NP zoning; all redevelopment	zoning could be included but to the degree that they conflict, the PUD regulations would prevail. P could be included but may
3/	Citizen Comment	Overlay	should be held to LA requirements	affect future development of Lake Austin parks.
ی ر	Citizen Comment	Overlay	Should be held to LA requirements	arrect rature development of Lake Austin parks.

#	Source	Topic	Comment	Response
35	Citizen Comment	Overlay	Add PUD, P to overlay; allow for some commercialization of Lake Austin parks to help PARD funding	NP zoning is effectively excluded from the proposed overlay because there are no NP properties zoned LA, DR, or RR. PUD zoning could be included but to the degree that they conflict, the PUD regulations would prevail. P could be included but may affect future development of Lake Austin parks.
36	Council Question	Overlay	What is the impact of excluding NP from overlay?	NP zoning is effectively excluded from the proposed overlay because there are no NP properties zoned LA, DR, or RR.z
37	Council Question	Overlay	How many SF parcels are within 1,000 feet of the lake (#, %)?	SF properties comprise approximately 11% of the Lake Austin shoreline, or 12% of the area within 1,000 feet of Lake Austin.
38	Council Question	Overlay	What if multiple SF lots were combined, could overlay apply to them?	SF lot site development regulations are substantially different from LA, DR, and RR. The minimum lot size requirement for LA is 43,560 sq ft but the minimum lot size for SF-3 is only 5,750 sq ft. More than 7 SF-3 lots would have to be combined to meet the minimum requirements of LA zoning.
39	Council Question	Overlay	Add PUD to the overlay, and to the extent that they conflict the PUD regulations would apply	PUDs will be included in the overlay although staff recommend against inclusion because PUDs were individually negotiated and approved by Council.
40	Council Question	Overlay	Was the overlay a consensus recommendation of the Lake Austin Task Force?	The LATF recommendation specifically asked the City to address the issue of homeowners exempting themselves from LA regulations through upzoning. City Council resolution 20130823-113 directed City staff to propose the overlay. The prohibition on trams is not a recent interpretation. Trams
41	Citizen Comment	Trams	The prohibition on trams is a major change as a result of a recent interpretation	that exist on the lake were constructed either illegally, on lots that are not zoned LA, or with variances.
42	Citizen Comment	Trams	Allow trams to access difficult properties	Trams are prohibited under current code in LA zoned parcels. A tram could be allowed via a Board of Adjustment variance if the applicant could show a hardship.

#	Source	Topic	Comment	Response
				Trams are an aesthetic concern for the lake, and exacerbate
				shoreline erosion by removal of vegetation and creating a

44	Comment	Trams	barrier for access to the lake for the disabled	Board of Adjustment.
			The LATF discussed trams within the shoreline setback, and made a consensus recommendation that the City should	The proposed ordinance only clarifies interpretation of existing
	Written		clarify the definition of permanent structures. Staff is	City Code that trams are prohibited within the shoreline setback
45	Comment	Trams	proposing language that reflects and clarifies current policy	or on slopes greater than 35% on LA zoned parcels.
46	Written Comment	Trams	The Lake Austin Task Force makes no mention of trams. There is no demonstrated environmental justification for banning trams. Trams are described in the code as an authorized means of pedestrian access.	The LATF asks the City to clarify permanent improvements. Trams are prohibited under current code. Trams exacerbate erosion of steep slopes along Lake Austin.
47	Citizen Comment	Variances	Allowing administrative variances to requirements of 25-8 along Lake Austin does not allow for public discussion, does not agree with Lake Austin Task Force consensus recommendation	The proposed ordinance differs from the LATF recommendation regarding administrative variances. The only prohibition on administrative variances currently is along Lake Austin. Although there are not a large number of formal variances along Lake Austin, they consume a significant amount of staff and applicant time in preparing the documentation and attending the Environmental Board and Land Use Commission meetings. The proposed ordinance allows administrative variances along Lake Austin consistent with all other areas of Austin.
			What are different kinds of variances along Lake Austin, how does this differ from the Barton Springs Zone, how	
48	Council Question	Variances	many per year?	See additional attached summary of variances.
