Additional Backup Information

This contract will provide fire pump repair parts for the City-owned fire trucks on an as needed basis for general routine repair and maintenance. The repair parts are needed because of the sophisticated nature of the fire truck pumps that require various meters, gauges, valves, motors, and PC circuit boards to control and monitor the flow of water or foam.

The City currently has a fleet of 82 fire trucks that have fire water pumps to be maintained and serviced. This contract is necessary to support the fleet with a reliable and continuous source of supply to purchase these parts.
