Lynn,

Provided are the elevation contours taken from USGS and overlaid onto an aerial of your home. Blue lines represent 10 foot elevation differences while the red represent 5 foot elevations. As you can see, there is a 5' elevation drop from your east elevation to your west elevation where your fence is located. This is also consistent with the provided survey (6703 Leprechaun) which shows an east elevation at your fence line of 499' (approximately 6' drop from the east side of your property to your west).

Let me know if you have any additional questions.

Best regards,

Kieran
