Gross Revenues

Revenue Share

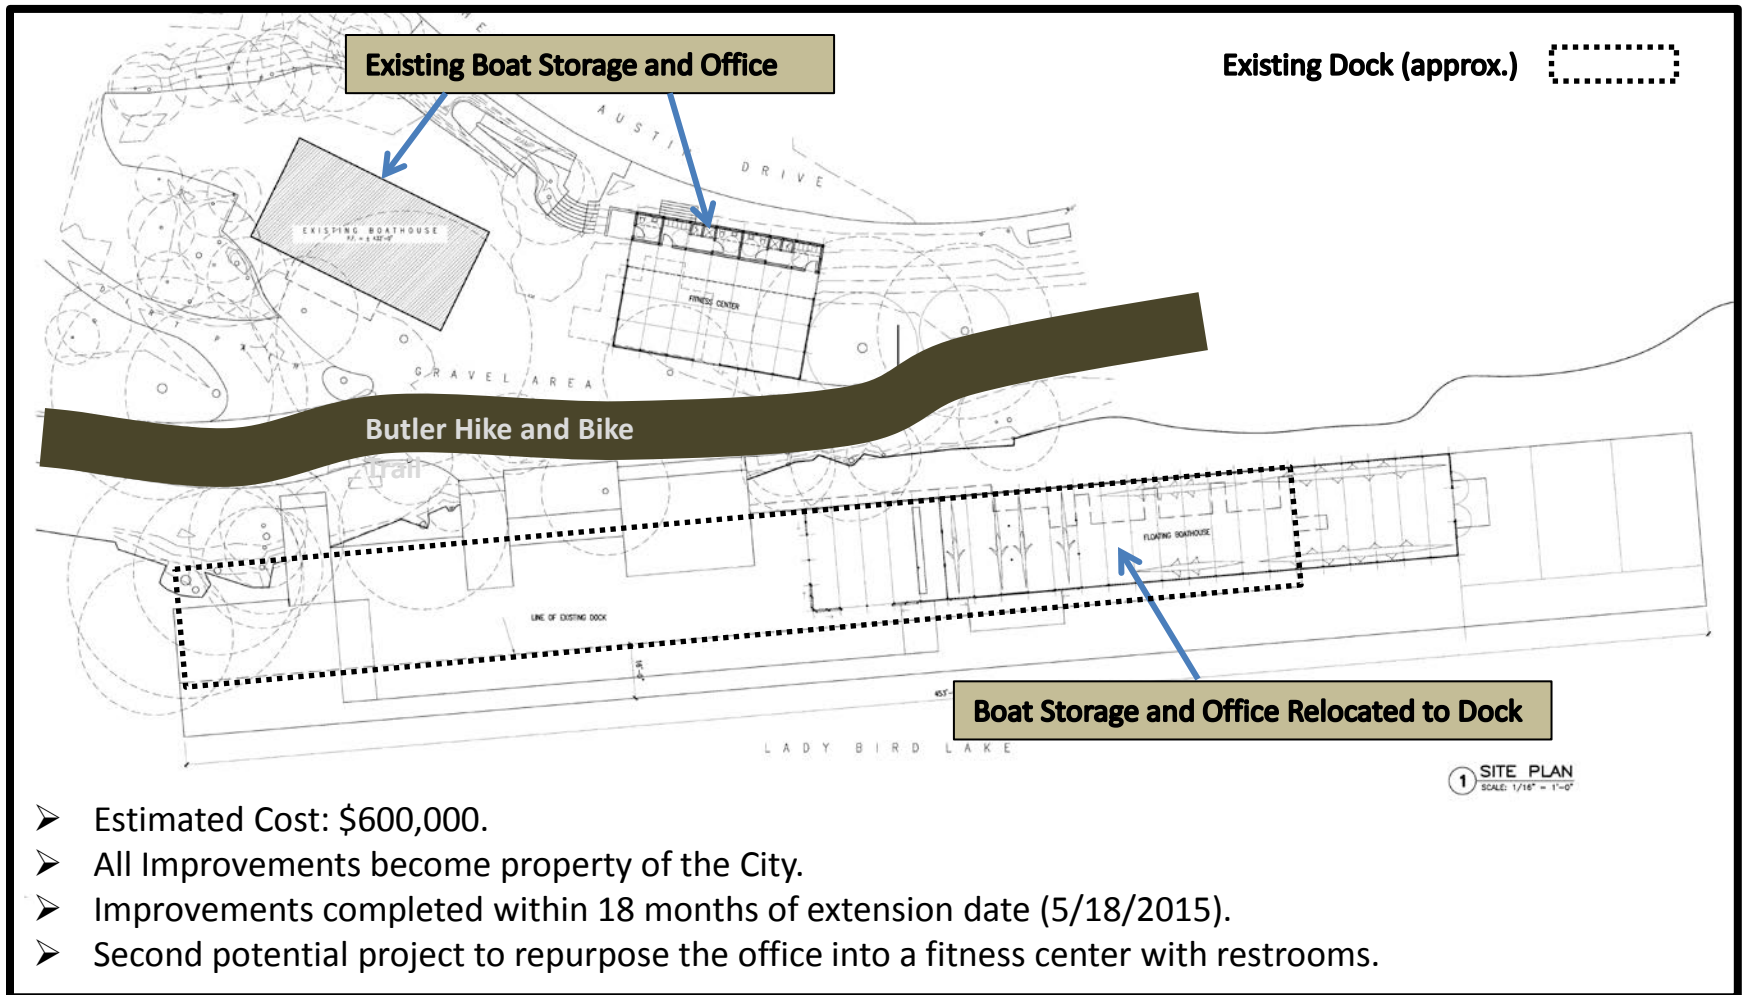

Vendor Performance Overview

Vendor Highlights:

- **Financial:** For each of the last five years the concession's gross revenue has increased - almost doubling over the last five years.
- **Compliance:** The contractor is in compliance with the terms of the contract.
- **Programming:** The contractor provides many opportunities and specialized programming for instruction and access to rowing for students and persons with disabilities.
- **Commissions:** The contractor pays the highest dollar amount of any concession to the City in commissions.
- **Capital Improvements/Reinvestment into Concession: Stairs, Dock, ADA Chair**
- **Environmental/Other:** There are no environmental issues created through the operation of the concession. However, staff identified the following concerns:
 - The location of the boat house and office creates an occasional conflict between TRC patrons staging for programming or boat rental and trail users.
 - The high use of the concession area generated by TRC operations creates a need for restroom facilities on site. TRC furnishes and maintains portable restrooms.

Proposed Dock Expansion

Public Benefit

Public benefit from the expansion of the dock:

- Eliminate conflict between the trail users (hikers/walkers) and patrons of the TRC being processed at the TRC office.
- Eliminate conflict between trail users and patrons moving boats across the trail to access the lake.
- The proposed dock and boat house provides the City a valuable recreational asset.
- Moving boat storage from the current outbuilding to the dock will provide TRC additional space for the public to utilize weight and exercise equipment.

Recommendation

Recommendation:

Staff recommends extending Contract # R000011 between the City of Austin and the Texas Rowing Center for the operation of rowing and sculling concession on Lady Bird Lake for the remaining one (1) five year option period.
