Dear Fire Professional,

For 32 years, the State Fire Marshal's Office, through the Texas Fire Incident Reporting System, has published fire summary reports to help the Texas fire service and other interested individuals and entities understand the fire problem and how it impacts our state and its citizens. This copy of the *Fires in Texas* is published with that goal in mind.

For calendar year 2013, TEXFIRS participating fire departments documented 1,816,692 fire and non-fire incidents. These 970 fire departments reported 71,119 fires, a fire occurring every seven minutes, 167 civilian fire deaths, 866 civilian fire injuries and \$621,601,964 in property loss. Cooking was the most frequently (29%) identified cause in all residential structure fires and most fire-related civilian deaths (61%) occurred in residential structure fires.

The injuries, loss of life and property damage resulting from all fires remains a source of great concern to us all. TEXFIRS data helps identify areas at risk and target effective prevention programs at the local and state level. I appreciate the continued effort of all participating fire departments to actively participate in TEXFIRS reporting. This annual report would not be possible without their dedication and commitment to prevention.

Three safety initiatives incorporated in our SFMO prevention efforts are *We're Out to Alarm Texas*, *Have an Exit Strategy* and the *Texas Fire Sprinkler Coalition*. The *We're Out to Alarm Texas* program's focus is the installation of smoke detectors in the homes of elderly and low income residents, those most vulnerable to fire loss. The *Have an Exit Strategy* program urges Texans to practice fire escape planning by learning at least two ways out of any room or building. The *Texas Fire Sprinkler Coalition*, comprised of the National Fire Protection Association and various Texas stakeholder groups, is dedicated to educating Texans on residential fire sprinklers.

The Texas fire service is making great strides with proactive wildfire preparations involving education, suppression operations, training, and coordinated responses through the Texas Intrastate Fire Mutual Aid System (TIFMAS). To minimize future losses, additional attention must be given to fire and building codes in the wildland urban interface and wildfire mitigation, including the use of prescribed burns and the removal of fuel sources near structures.

I call upon you to join me in promoting fire safety throughout your community. With your help, I know we can reduce fire loss in our state and make it a safer place for everyone. Don't hesitate to call our office if I can assist you with your fire safety concerns.

Sincerely,

Chris Connealy
State Fire Marshal

(blank page)

ABOUT THE STATE FIRE MARSHAL'S OFFICE

The State Fire Marshal's Office (SFMO) develops and promotes methods of preventing and reducing fire losses, through fire cause and origin investigations, building inspections, code enforcement, fire service industry regulation, investigation of firefighter line of duty deaths, Public Protection Classification oversight, and fire prevention programs. In collaboration with private sector entities, the regulated fire service industry, the Texas fire service, local and state agencies, and the public, the SFMO seeks to create communities well-prepared to protect themselves against fire.

Services offered by the State Fire Marshal's Office include, but are not limited to:

- Fire origin and cause investigations;
- Canine teams;
- Forensic Arson Laboratory;
- Firefighter fatality investigations;
- Licensing and regulation of the fire alarm, extinguisher, sprinkler, and fireworks industries;
- Licensing investigations;
- Fire safety inspections;
- Fire-standard compliant cigarettes oversight;
- Fire prevention education;
- Texas Fire Incident Reporting System (TEXFIRS);
- ISO PPC oversight and technical assistance with the Fire Suppression Rating Schedule; and
- Youth Fire Prevention and Intervention.

Fire Origin and Cause Investigations

Fire investigators investigate fire scenes throughout the state upon request. They assist local law enforcement and fire service authorities with determining origin and cause, and with criminal investigations, when appropriate.

Arson Hotline

A toll-free number is available to the public for reporting suspicious fire activity. The hotline, 1-877-4FIRE45 (1-877-434-7345) is staffed 24 hours a day.

Canine Teams

Canine teams assist fire investigators with evidence collection. Each team consists of a handler, who is a certified peace officer/arson investigator, and a canine certified and trained to detect hydrocarbon accelerants. Upon request, canine teams work with SFMO investigators, as well as outside law enforcement and fire service agencies.

Forensic Arson Laboratory

The Forensic Arson Laboratory, based in Austin, provides accelerant testing services and analysis of fire-scene debris to law enforcement and public safety organizations at no charge. The lab is accredited by the American Society of Crime Laboratories Directors.

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Firefighter Fatalities

The SFMO is responsible for investigating the circumstances surrounding the death of a firefighter who dies in the line of duty or in connection with an on-duty incident in Texas. These investigations are conducted in cooperation with fire-service organizations such as the State Firemen's & Fire Marshals' Association, Texas Fire Chiefs Association, Texas Association of Firefighters, Texas Fire Marshals' Association, Texas Commission on Fire Protection, Texas A&M Forest Service, Texas Chapter International Association of Arson Investigators, Emergency Services Training Institute and Texas metropolitan fire departments (including Austin, Dallas, El Paso, Fort Worth, Houston, and San Antonio). All fire departments in Texas should immediately report any such firefighter death or life-threatening injury to the State Fire Marshal's Office by calling 512-305-7900, option No. 2.

Licensing Services

The SFMO is charged with issuing registrations, licenses and permits to people and companies working in the fire alarm, extinguisher, sprinkler and fireworks industries. The program verifies an applicant's qualifications, provides customer assistance, performs criminal background checks, reviews insurance certificates, maintains records, and collects the appropriate fees.

Licensing Investigations

Licensing investigators respond to complaints about the illegal, improper and unsafe installation of fire alarm, extinguisher and sprinkler systems by licensed entities. They also provide daily assistance to local fire marshals and building officials regarding the application of the codes for the installation and service of fire protection systems. Investigators also perform periodic inspections of fireworks retail sites to ensure compliance with adopted laws and safety standards.

Fire Safety Inspections

Fire safety inspectors conduct inspections of public and private buildings and facilities, including 24-hour care facilities, state buildings, detention centers, day-care centers, hotels and motels and other assembly and educational-type property. The division also conducts comprehensive fire safety inspections of all state-supported institutions of higher learning. Inspections are based on need or in response to a request or complaint. Inspections of storage facilities, and the handling and use of flammable liquids at retail service stations, are performed upon request or in response to a complaint.

Code interpretation and consulting services to city and county fire protection agencies, private individuals, state agencies and business owners are provided, as well as, research, reporting and recommendations for improvement to counties regarding fire prevention and protection.

Fire-Standard Compliant Cigarettes Oversight

All cigarettes sold in Texas must be certified as fire standard compliant. Fire-standard compliant cigarettes are designed to reduce the amount of time that a cigarette continues to burn when not being smoked, meaning it is less likely to ignite furniture, bedding or other flammable materials. The SFMO is in charge of all rulemaking and certifications relating to fire-standard compliant cigarettes, in accordance with Health and Safety Code Chapter 796. The program registers manufacturers, maintains certifications of cigarette tests, collects the appropriate fees, and performs inspections of distribution centers and retail outlets to ensure compliance on a complaint received basis.

ABOUT THE STATE FIRE MARSHAL'S OFFICE

Outreach, Policy and Research

The Outreach, Policy and Research section develops and promotes fire safety campaigns that target all ages and demographic audiences. It also offers *Fire Safety for Texans*, a series of fire and burn prevention curriculum guides, available at <http://www.tdi.texas.gov/fire/fmcurric.html>. Each guide, kindergarten through high school, includes lesson plans, teacher materials, and student materials.

Educational Conferences

This section also produces public information programs, seminars and conferences. The annual Fire Marshals' Conference and the biennial Youth Fire Prevention and Intervention Conference are two such major educational events.

Texas Fire and Life Safety Educators Program (TXFLSE)

This program offers resources to statewide fire and life safety public educators for community education programs and initiatives.

Texas Fire Incident Reporting System (TEXFIRS)

The TEFIRS section collects data from fire departments and compiles statistics to determine the impact of fire on lives and property throughout the state. Each year, *Fires in Texas*, a summary of the fires reported to the SFMO, is published and made available to the fire service and the general public. This data is a valuable tool for developing laws, standards and prevention programs. TEFIRS data is forwarded to the U.S. Fire Administration for inclusion in the national incident database, NFIRS.

Public Protection Classification (PPC) Oversight

PPC Oversight assists fire departments with their ISO PPC and the Fire Suppression Rating Schedule, when requested. The program approves or disapproves proposed PPC ratings for communities.

Youth Firesetting Prevention and Intervention

This program helps fire departments establish a community-based youth firesetting prevention and intervention program modeled after the US Fire Administration's Juvenile Firesetter Intervention Specialist I and II courses. Fire departments are also provided a database software program developed by the SFMO that facilitates the collection and maintenance of records about juveniles participating in local youth fire prevention and intervention programs.

Fires In Texas

This 2013 *Fires in Texas* annual report presents summarized fire incident data reported to the Texas Fire Incident Reporting System, TEXFIRS, by 970 participating fire departments. Incident reporting in Texas is voluntary. Consistent and routine reporting by all departments is necessary for a more complete and accurate summary of fire activity in the state.

For 2013, Texas fire departments participating in the Texas Fire Incident Reporting System reported:

- 71,119 total fires
- 866 civilian fire injuries,
- 167 civilian fire deaths,
- 102 civilian fire deaths in residential structure fires,
- 32 percent of civilian deaths in residential structure fires involved the elderly (age 65 and over)
- 22 percent of residential structure fires had smoke detectors present and operated,
- 27 percent of fatal residential structure fires did not have smoke detectors present,
- \$621,601,964 reported property loss due to fire, an increase of 29 percent,
- 5,259 incendiary/suspicious fires,
- 868 firefighter injuries at all types of calls,
- 448 firefighter injuries at fire calls,
- 11 firefighter deaths.*

This report is intended to help policy makers, members of the fire service and the public better understand Texas fire losses, with the goal of reducing the loss of life and property resulting from fire.

* See page 43 for additional information.

Uses of Data

Since 1982, Texas has collected fire department incident information through TEXFIRS, the only statewide uniform system of fire and non-fire incident reporting.

Fire departments use this reporting system to uniformly code incident information. Accurate and complete information about fires and other incidents can help a fire department:

- **allocate limited resources;**
- **justify budget needs;**
- **review the need for personnel training; and**
- **focus the direction of fire education/prevention programs.**

State lawmakers, the press, the general public, insurance companies, and fire service administrators and leaders request TEXFIRS summary reports to help address fire safety concerns and new legislation issues.

Texas adopted the National Fire Incident Reporting System, NFIRS 5.0, as the TEXFIRS reporting system, without modification.

Year 2008 and earlier TEXFIRS data includes incidents captured in the NFIRS Version 4 format and converted to Version 5. Code conversion tables should be reviewed when considering trends and analyzing data.

TEXFIRS/NFIRS data is forwarded to the National Fire Data Center (NFDC) at the U.S. Fire Administration each year. The NFDC can then compare and contrast statistics from states and large metropolitan departments to:

- **develop national public education campaigns;**
- **make recommendations for national codes and standards;**
- **guide allocation of federal funds;**
- **ascertain consumer product failures;**
- **identify the focus for research efforts; and**
- **support federal legislation.***

NFIRS data is used as the basis for the USFA's publication *Fire in the United States*, the single most comprehensive reference on the nature and scope of the fire problem in the United States.

NFIRS data is also used by the

- U.S. Consumer Product Safety Commission (CPSC)
- International Association of Fire Chiefs (IAFC)
- International Association of Fire Fighters (IAFF)
- National Association of State Fire Marshals (NASFM)
- National Fire Protection Association (NFPA)
- National Highway Traffic Safety Administration (NHTSA)
- National Volunteer Fire Council (NVFC)*

All Fires

In 2013, fire departments reported a total of 71,119 fires, a decrease of 184 (.3 percent), including 20,339 structure fires, an increase of 709 (3.6 percent), 11,971 vehicle fires, a decrease of 537 (4.3 percent), and 38,809 outside or other types of fires, a decrease of 356 (.9 percent) from 2012.

Type of Fire	2009	2010	2011	2012	2013
Structure	19,796	20,595	23,672	19,630	20,339
Vehicle	12,341	12,435	12,928	12,508	11,971
Outside and Other	48,824	43,751	66,199	39,165	38,809
Total Fires	80,961	76,781	102,799	71,303	71,119

The number of fire departments reporting should be considered when reviewing data comparisons between years.

Overview of Year 2013 Texas Fires

All Fires

In 2013, there were	71,119 fires,	178 deaths,	1,275 injuries, and	\$621,601,964 in property loss.
Each month, there were	5,927 fires,	15 deaths,	106 injuries, and	\$51,800,164 in property loss.
Each week, there were	1,368 fires,	3 deaths,	25 injuries, and	\$11,953,884 in property loss.
Each day, there were	195 fires,	0.5 deaths,	3 injuries, and	\$1,698,366 in property loss.
Each hour, there were	8 fires,	0 deaths,	0 injuries, and	\$70,765 in property loss.
Each minute, there were	0.14 fires,	0.00 deaths,	0.00 injuries, and	\$1,179 in property loss.
A fire occurred approximately every 7 minutes.				

Structure Fires

In 2013, there were	20,339 fires,	125 deaths,	1,096 injuries, and	\$518,589,077 in property loss.
Each month, there were	1,695 fires,	10 deaths,	91 injuries, and	\$43,215,756 in property loss.
Each week, there were	391 fires,	2.4 deaths,	21 injuries, and	\$9,972,867 in property loss.
Each day, there were	56 fires,	0 deaths,	3 injuries, and	\$1,416,910 in property loss.
Each hour, there were	2 fires,	0 deaths,	0 injuries, and	\$59,038 in property loss.
Each minute, there were	0.04 fires,	0.00 deaths,	0.00 injuries, and	\$984 in property loss.
A fire occurred approximately every 26 minutes.				

Residential Structure Fires

In 2013, there were	15,822 fires,	106 deaths,	774 injuries, and	\$315,639,510 in property loss.
Each month, there were	1,319 fires,	9 deaths,	65 injuries, and	\$26,303,293 in property loss.
Each week, there were	304 fires,	2 deaths,	15 injuries, and	\$6,069,991 in property loss.
Each day, there were	43 fires,	0 deaths,	2 injuries, and	\$862,403 in property loss.
Each hour, there were	2 fires,	0 deaths,	0 injuries, and	\$35,933 in property loss.
Each minute, there were	0.03 fires,	0.00 deaths,	0.00 injuries, and	\$599 in property loss.
A fire occurred approximately every 33 minutes.				

Incendiary/Suspicious Fires

In 2013, there were	5,259 fires,	13 deaths,	97 injuries, and	\$43,579,007 in property loss.
Each month, there were	438 fires,	1 death,	8 injuries, and	\$3,631,584 in property loss.
Each week, there were	101 fires,	0.3 deaths,	2 injuries, and	\$838,058 in property loss.
Each day, there were	14 fires,	0 deaths,	0 injuries, and	\$119,068 in property loss.
Each hour, there were	1 fire,	0 deaths,	0 injuries, and	\$4,961 in property loss.
Each minute, there were	0.01 fires,	0.00 deaths,	0.00 injuries, and	\$83 in property loss.
A fire occurred approximately every 100 minutes.				

Total Fires, Casualties and Dollar Loss by Fire Type

The following table shows the types of fires and the associated casualties and dollar loss.

Types of Fires	Fire		Fire		Civilian		Total Casualties	Dollar Loss
	Total Fires	Service Injuries	Service Deaths	Civilian Injuries	Civilian Deaths			
Structure fires	20,339	350	11	746	114	1,221	\$518,589,077	
Vehicle fires	11,971	14	0	60	48	122	\$75,379,841	
Natural and cultivated vegetation fires	18,996	26	0	11	1	38	\$2,415,650	
Outside rubbish fires	14,821	12	0	8	2	22	\$719,562	
Fires, other	2,748	2	0	23	1	26	\$11,100,796	
Special outside fires	2,244	5	0	18	1	24	\$13,397,038	
Total	71,119	409	11	866	167	1,453	\$621,601,964	

Types of Fires by Percentage of Total

Total Fires, Casualties and Dollar Loss by Month

The following table shows all fires by month, with the associated casualties and dollar loss.

Month	Total Fires	Fire Service Injuries	Fire Service Deaths	Civilian Injuries	Civilian Deaths	Total Casualties	Dollar Loss
January	6,027	35	0	56	16	107	\$42,416,179
February	5,925	24	2	47	10	83	\$38,319,685

Most Frequently Identified Area of Origin

The primary use of the area where the fire started within the property is defined as the area of fire origin. The tables below list the top seven of more than ninety descriptive codes available to document this area used to determine fire cause. The area of origin may be a room, a portion of a room, a vehicle, a portion of a vehicle, or an open area devoted to a specific use.

Assembly Structure Fires

Area of Origin	No. of Fires	Percent of Fires
Cooking area, kitchen	302	42%
Undetermined	106	15%

Fatal Residential Structure Fires

Automatic Extinguishing Systems in Structure Fires

In 2013, fire departments reported 20,339 structure fires in the state. Of these fires, 13,265 were reported to involve either enclosed buildings or portable/mobile structures. Only these types of incidents include Automatic Extinguishing Systems AES information.

Eighty-five percent (11,228) of the enclosed or portable structures were reported as not having an AES present, six percent (873) had an AES system or partial system present and nine percent (1,164) had no determination reported.

	No. of Fires	Percent
No AES Present	11,228	85%
AES Present, including partial system	873	6%
Undetermined	1,164	9%
	13,265	100%

AES Operation

Below is a breakdown of those 873 incidents where an AES was present in the structure, along with the associated property/contents value and dollar loss.

	No. of Fires	Percent	Property Value	Fire Dollar Loss
Operated/effective	223	26%	\$ 800,619,548	\$ 4,127,737
Operated/not effective	10	1%	\$ 13,329,000	\$ 455,000
Fire too small	186	21%	\$ 1,519,967,549	\$ 2,831,786
Failed to operate	55	6%	\$ 19,906,145	\$ 1,097,154
Undetermined/other	46	5%	\$ 9,890,139	\$ 640,632
Operation not reported	353	41%	\$ 584,711,620	\$ 8,692,009
Total	873	100%		

The chart below displays the effectiveness of AES in all reported structure fires.

Vehicle Fires

Fire departments reported 11,971 vehicle fires during this period. These fires caused an estimated \$75,379,841 in property damage, 48 fire-related civilian fatalities, 60 fire-related civilian injuries and 14 fire service injuries. Fire service injuries and deaths include all injuries resulting from duty-related activity. The following table shows the percentage of fires in different types of vehicles.

2013 Fires by Mobile Property Type

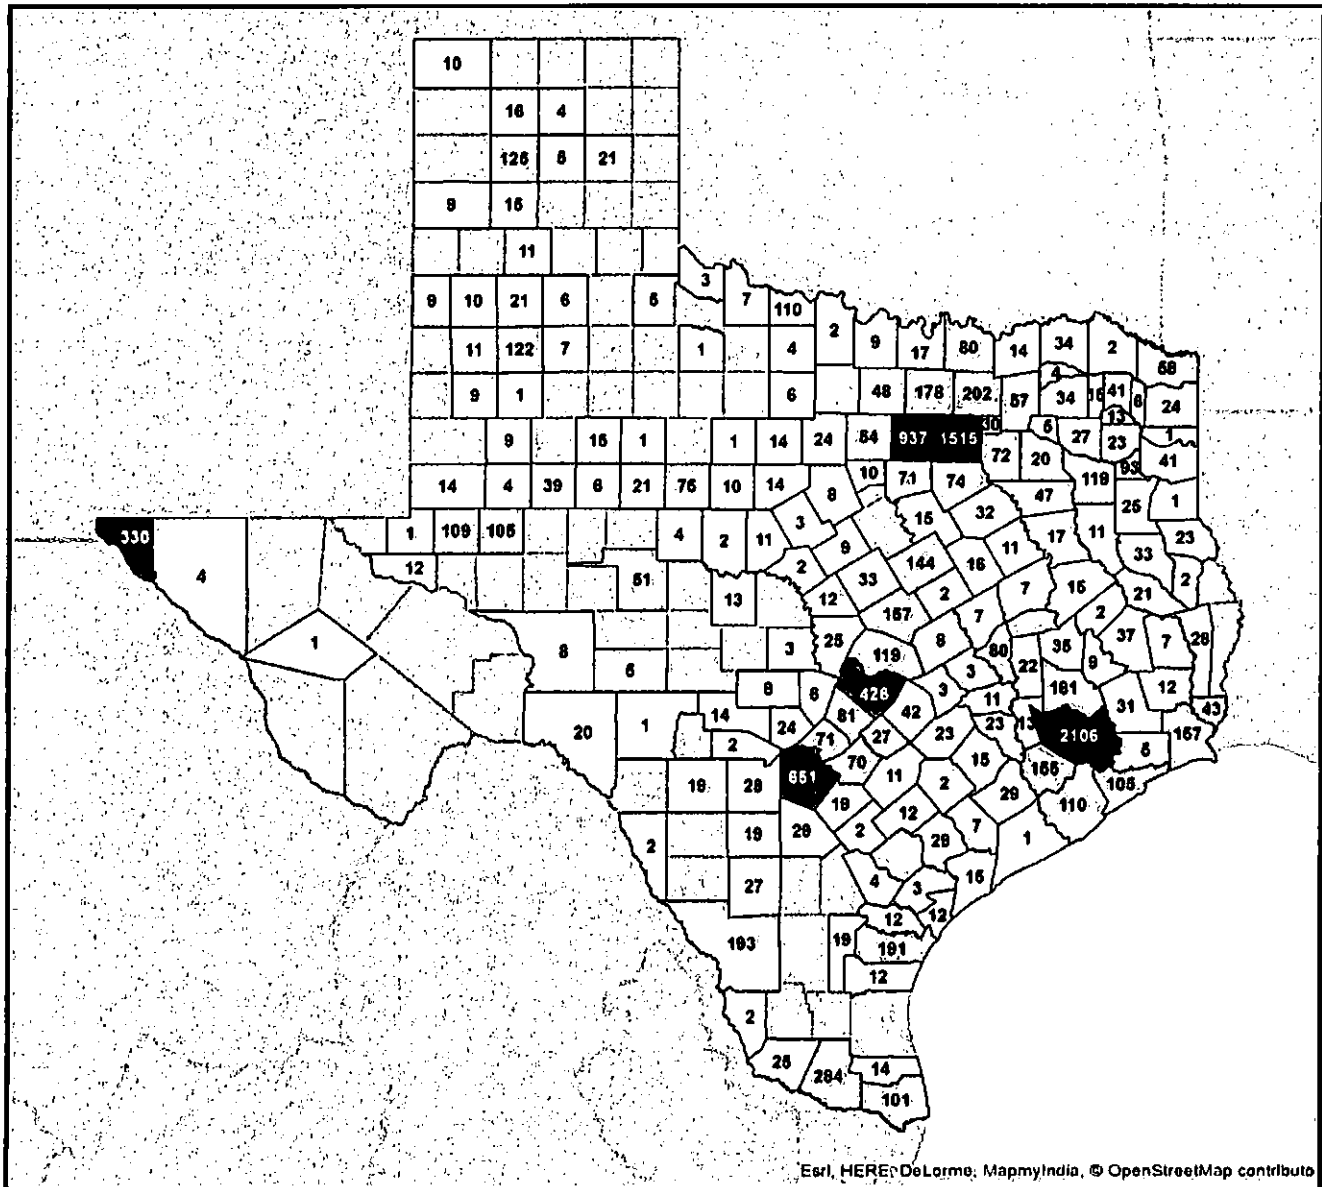

Mobile Property Type	No. of Fires	Percent of Fires
Passenger or road transport vehicles	9,470	79.1%
Freight road vehicles	1,271	10.6%
Unknown	802	6.7%
Industrial, agricultural, construction vehicles	286	2.4%

Heat Source	No. of Fires
Undetermined	6,274
Heat from powered equipment, other	1,327
Arcing	1,058
Radiated, conducted heat from operating equipment	875
Heat source: other	474
Spark, ember or flame from operating equipment	404

Outside and Other Fires

Fire departments reported 38,809 outside and other fires for this period, the most fires in any single fire category. This type of fire includes rubbish, trees, brush and grass fires, as well as any other type of fire not considered a vehicle or a structure fire. Five civilian fatalities, 60 civilian injuries, 45 fire service injuries and property loss estimated at \$27,633,046 resulted from outside and other fires.

Fire Cause	Total Fires	Percent	Fire Service Injuries	Fire Service Deaths	Civilian Injuries	Civilian Deaths	Loss

Heat Source in Outside and Other Fires

The table below shows the most frequently reported forms of heat of ignition in outside and other fires.

Heat Source	Total Fires	Percent
Spark, ember or flame from operating equipment	685	2%
Hot or smoldering object, other	994	3%
Heat source: other	1,141	3%
Arcing	1,185	3%
Hot ember or ash	1,567	4%
All Other Determined	6,695	17%
Undetermined	26,542	68%
Total	38,809	100%

Heat source was reported as undetermined in **68 percent** of all outside and other fires.

Most Frequently Identified Heat Source in Outside and Other Fires

Incendiary/Suspicious Fires

During 2013, there were 5,259 fires determined to be incendiary/suspicious (inc/susp). These fires accounted for seven percent of all reported fires, eight percent of all fire-related injuries, seven percent of all fire-related deaths and eight percent of all fire-related dollar loss.

An incendiary fire is a fire that was determined to have been deliberately set to destroy property. A suspicious fire is a fire that was suspected of having been deliberately or maliciously set to destroy property. An unknown fire is a fire for which the cause was undetermined. In many cases, fires of unknown cause are later determined to have been incendiary or suspicious.

In this report, a fire set by a property owner to destroy or incinerate trash, grass, brush, or other property without value is not classified as incendiary or suspicious unless the fire was set with malicious intent.

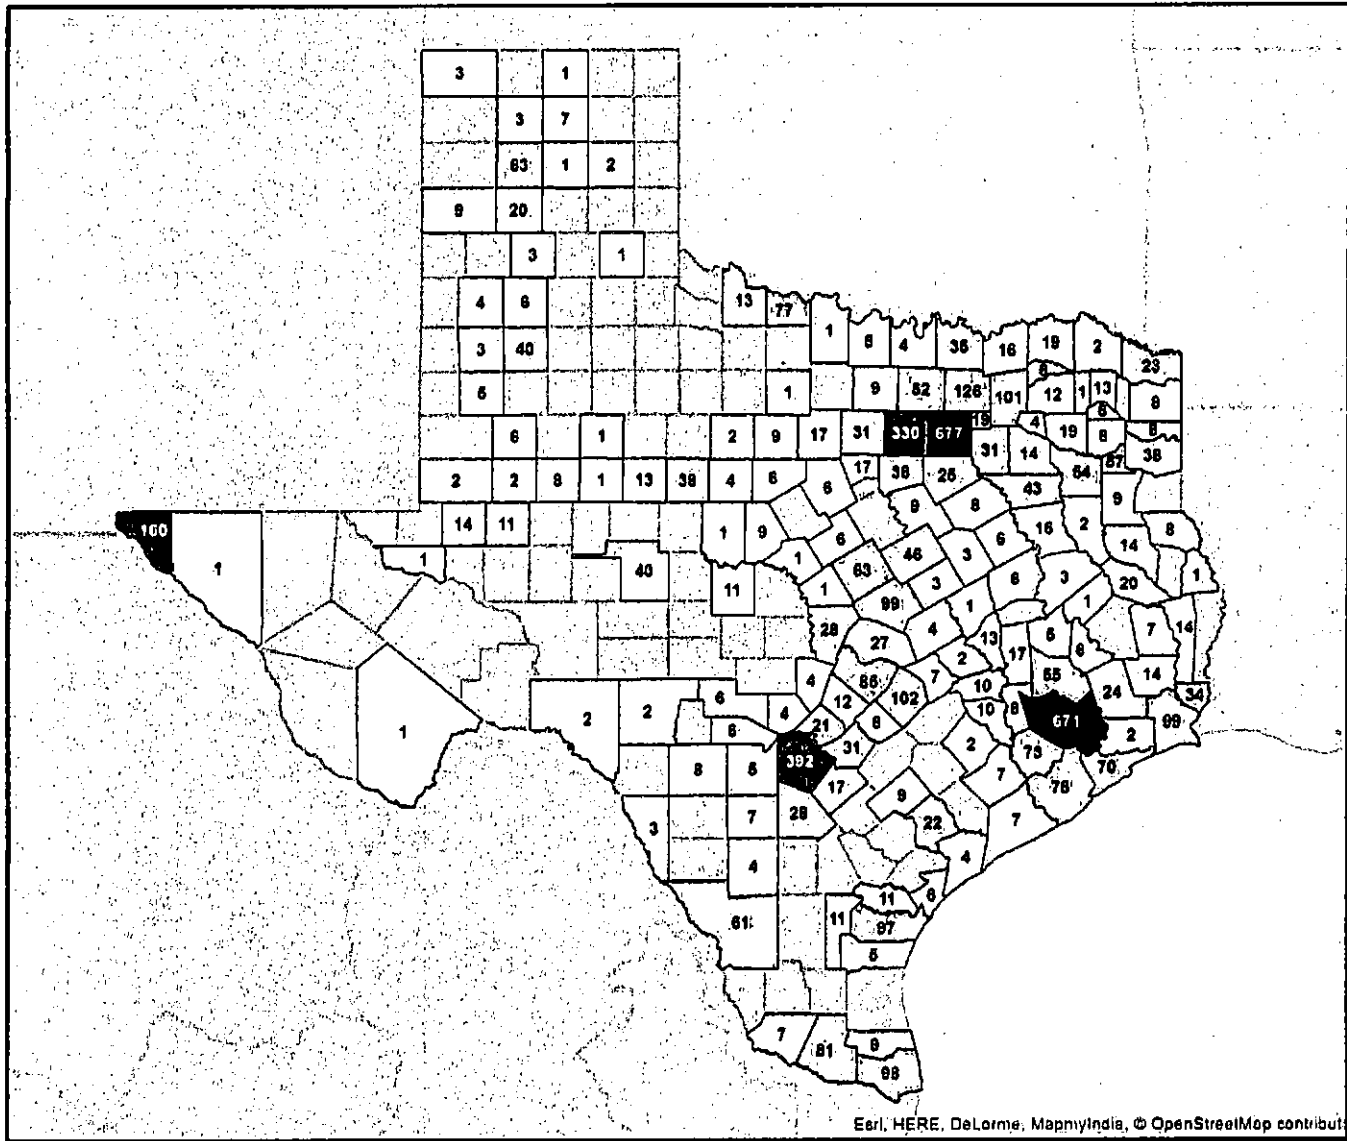

Note: Primary fires sometimes spread to other properties, resulting in "exposure fires." Fire loss data for exposure fires are not included in this section of the report. Therefore, total fire losses that might be attributed to specific fire causes may be greater than indicated.

All Incendiary/Suspicious Fires 2009-2013

Year	Inc/Susp Fires	Percent of all Fires	Dollar Loss	Fire Service Injuries	Fire Service Deaths	Civilian Injuries	Civilian Deaths

Alarm Time Intervals

Seven percent of all structure fires were identified as incendiary/suspicious. Most (22 percent) occurred between the hour of 4:01p.m. and 8:00p.m.

Incendiary/Suspicious Residential Structure Fires

Year	Total Fires	Dollar Loss	Civilian Injuries	Fire Service Injuries	Civilian Deaths	Fire Service Deaths
2013	996	\$ 24,222,453	35	24	9	0

Years 2009 - 2013

Heat Source in Incendiary/Suspicious Outside and Other Fires

The table below shows the number of incendiary/suspicious outside and other fires by heat source.

Heat Source	Total Fires	Percent
Undetermined	1,212	39%
Match	423	14%
Cigarette lighter	317	10%
Heat source: other	229	7%
Heat from other open flame or smoking material	167	5%
Flame/torch used for lighting	161	5%
All Other	633	20%
Total	3,142	100%

Heat source was reported as **undetermined** in **39 percent** of all **incendiary/suspicious** outside and other fires.

Matches continue to be the most frequently identified heat source in **incendiary/suspicious** outside and other fires.

Casualties

During 2013, fire departments reported 167 civilian deaths, 866 civilian injuries, 448 fire service injuries and 11 fire service deaths in fires. This chapter provides information on the deaths and injuries suffered by civilians and fire service personnel.

Since each fire department is responsible for reporting their own personnel casualty information on all their calls, including mutual aid given calls, fire service counts in this section may differ from other sections in this report.

The fire service also experienced 420 injuries in non fire-related incidents reported to TEXFIRS.

Civilian Casualties by Type of Fire

Of all civilian injuries, 746 (86 percent) occurred in structure fires, 60 (7 percent) occurred in vehicle fires and 60 (7 percent) occurred in outside and other fires. Of the 167 civilian fatalities, 114 (68 percent) occurred in structure fires, 48 (29 percent) occurred in vehicle fires and five (3 percent) occurred in outside and other fires.

Civilian Casualties 2009 – 2013

Civilian Injuries in All Fires

The following table shows the number of fire-related civilian injuries by age and gender.

Gender	4 and under	5-14	15-24	25-34	35-44	45-54	55-64	65 and over	Unknown	Total
Male	8	19	57	60	66	59	32	31	12	344
Female	6	10	41	39	36	44	37	46	9	268
Unknown	0	0	0	0	0	0	0	0	254	254
Total	14	29	98	99	102	103	69	77	275	866

Most civilian injuries (200) occurred during the April 17, 2013 ammonium nitrate fire incident in West, Texas.

Type of Fire	Injuries
Structure Fires	378
Vehicle Fires	14
Outside and Other Fires	56

Fire Service Injuries in Structures by Property Use

The following table shows the number of fire service injuries in structures by identified property type.

Property Use	Injuries
Residential	285
Storage	19
Mercantile, Business	19
Assembly	12
All other	14

Fire Service Fatalities

The State Fire Marshal's Office investigates the death of a firefighter who dies in the line of duty or if the firefighter's death occurs in connection with an on-duty incident in this state. These investigations are conducted under statutory authority conferred upon the Texas Department of Insurance. For more information see our website at <http://www.tdi.texas.gov/fire/fmloddinvesti.html>.

2013 Reported Fire Service Fatalities

TEXFIRS participating fire departments reported eleven fire service personnel fatalities.

Incident Type	Property Use	Fire Cause	Date	Age	Gender

Fire is
Everyone's
Fight™

The fire problem in the state is an ongoing and continuous battle for the fire service and the public alike. We rely on the fire service to fight fires once they occur; however, the prevention of fires is up to all of us ...
