Taylor I went and looked at the house at 2007 E12th to be moved. The house is in very poor shape it has no 2X4 framing in the exterior walls, makes it very difficult to move. To move the house the roof has to be demoed because it is too tall to go down city streets there for it weakens the house even more. Also it will need to be cut in half because it's wide to go down City Street's. There is a Heritage tree between the house and the street makes it almost impossible to get off the lot.

My advice to you is demo the house.

Thank You Junior Brown
