**Subject:** Questions for Follow-Up

Dear Liz,

This email is per your request to me to remind you of the questions we are still awaiting answers on concerning electricity usage by Austin Energy's CAP customers.

1. What is the average monthly kWh usage of CAP customers? A monthly average would be best. If an annual monthly average is provided it would be useful to have an average for one or more summer months to illustrate seasonal differences in usage.
2. What is the average monthly kWh bill for CAP customers? A monthly average would be best. If an annual monthly average is provided it would be useful to have an average for one or more summer months to illustrate seasonal differences in the amount CAP customers pay.
3. What is the total amount of revenue paid by all residential customers and all CAP customers to Austin Energy over the past calendar and/or fiscal year? What is the total amount of revenue paid by all residential customers and all CAP customers to pay the energy efficiency portion of the community benefit charge?

Please let me know if you have questions or need any additional clarification of this request.

Sincerely,

Carol Biedrzycki
