* Remaining Authority includes two previously granted variances. A “variance” is an established process related to a rotation list assignment that requires a deviation or “variance” from the standard rotation list assignment methodology. In the rare instances when a variance is used, it is due to one of the following reasons: a firm is unable to perform the assignment due to their current workload, the firm does not have sufficient funding authorization to cover the assignment, or a firm has a unique expertise critical to an assignment.
