

Mayor Steve Adler,

2390 people have signed a petition telling you to Say Yes to Springdale Farm.

Here is the petition they signed:

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property.

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay.

You can view the petition signers below.

Thank you,
Glen and Paula Foore

I attended a wedding at Springdale and it was one of the nicest and most unique that I have ever been to. On top of that, their produce is top notch!

If we want Austin to continue to be a world class town that residents value and visitors enjoy the we need more places like springdale farm and fewer condo developments at the expense of our cultural institutions.

Dear Mayor Adler and fellow council members, at what point do we stop look around and realize that it's easier to destroy something that is beneficial for our city. When do we wake up and trust that places like Springdale are here for a reason, we the people want them. I love that fact that I live in a city where I can go and get farm fresh produce direct from the farm, yes it may not supply you with extra tax dollars as say another whole foods, but really with in the influx of people moving to Austin daily that shouldn't be a problem. Where else can a family take there kids to see what real food looks like and where it comes from, we should embrace places such as Springdale for the services they provide, the food they supply, and the heathy ideals they grow with in there urban soil.

Please take a look at what's good for the people and less at what's good for the cities pockets.

Dear mayor,

To me, access to local, naturally grown food is of the utmost importance to the future health of our bodies and our environment, both locally and nationally.

To deny citizens both young and old of education and opportunity to local food is a mistake. Please consider the value that farms like Springdale bring to the citizens of Austin, as well as setting examples for future farms across the state.

Thank you.

While I live in DC now, I consider Austin home and will be moving back there soon. Please, you MUST support the farm, allow them to host special events, and not send the wrong signal by closing them down for all the wrong reasons. It's hard enough being a farmer making ends meet as it is, without your city council potentially putting you out of business. Please weigh the harm versus the good, the policy to encourage, not discourage, small businesses like Springdale Farms that are valued by your constituents. Springdale farm is a very special place. They employ local residents. They provided a sustain food source to the community. Of which I buy for my locally sourced Restaurant, also located in 78702. They also provided a unique event space that should not be overlooked.

Myself a somewhat displaced "country boy" wanted to be married in a natural setting. On May 9th this year Springdale hosted 75 ppl, quietly, and made my wedding unforgettable. Nearly every guest commented about how unique and beautiful the setting was. To find a space so beautiful and rustic in

the middle of downtown Austin is worth saving.

The owners Glen and Paula are genuine people with their hearts in the right place. They are the kind of people that should make up the bedrock of the community. To lose Springdale farm and the people that make it up would be a travesty. It would also greatly diminish my trust in the mayor and city council governing right now. I would also add this matter has, IMO, already been decided by voters in last elections. I hope the city council does the right thing.

The family farm is an asset to our city and the many micro communities within. Education and experiences the urban farm provides is the connection between humans and the earth. Please support the education of our community, perhaps a community that has an education with the planet through food, will look to understand experience more about vital issues confronting our community, such as water conservation, recycling, air pollution to name a few. By limiting the urban farm business to extinction, are we teaching our children that where our food comes from doesn't matter, or education only comes from sitting in a chair listening to a lecture? Austin supports all sorts of music venues bringing 1,000's of people here, disrupting everyone on all sides of the town. Why should you deny an organic gardener who provides great fresh food to these visitors, the right to also share their lovely space with Austinites who appreciate being able to be in such an environment as often as possible. We need the respite of going there for R&R without having to drive or fly to some place like this. It's here, it's local let us enjoy it more often!!!

This family and their urban farm has done more for local food awareness than any program around. Know why? They get people out to the farm firsthand and have guests see for themselves just what a working farm looks like. People can dine, socialize and truly absorb the experience that leads to an appreciation that cannot be understood without that interaction.

It's not easy to make a living in Austin selling organic food when the farm is in an area where property taxes are unfairly burdensome and eat the profit right from the ground. The conditional use permit allows for additional weddings, dinners and family friendly events that will contribute to the farm's bottom line and make them a more profitable farm that can sustain the rising costs of urban farming. Without these events, the farm will be pushed out of business and we will have yet another high rise where the pulse of the local food scene once stood.

Please, ensure that your priorities are in the right place. Stand with the farmers, foodies, and local entrepreneurs and let these guys have their conditional use permit. Any vote otherwise is a vote for developers and outsiders.

Thank you for your careful consideration and deliberation.

For kids who grow up in urban and grass intensive suburban neighborhoods, centers like Springdale Farm are essential to educating them about where food really comes from!

I travel to Austin to Visit Springdale Farm. Keep this place alive and let it host events for people to attend. It is part of the heartbeat that is Austin. My favorite thing about Houston is Austin.

494. Mary Jane Minehart (*zip code: 78723*)

The practical aspect of a working farm that employs it's neighbors and provides a bucolic setting in a rapidly developing area is immeasurable. The City Council should be supporting local small

businesses especially one that has been rooted in the community. It also should take a investigative look at one of the main antagonist, her real estate holdings and duplicitous views on community and business that appear to be very self serving. Springdale Farms is a green space that contributes to not only it's immediate community but the City of Austin everyday by providing food and a gathering place for all to enjoy.

496. Corey Ferguson (*zip code: 78723*)

I am a local business owner, a home owner close to the farm and a patron. As Austin develops this is they good type of change we want to have in lower income neighborhoods. Please support the farm in having a positive impact on my burgeoning community. This neighborhood has tuff crime issues and houses the largest percentage of halfway houses in Austin. We need things like this to balance out and uplift the neighbor. Respectfully, Corey Ferguson. Owner of Blue Hammer, home owner in N.E. Windsor Park

We're close neighbors of Springdale Farm and love what they bring to the neighbourhood and community. They should be able to hols the events they need to in order to support their farm in a part of town where people are having to leave every day as prices go up. They are always respectful and inclusive with their events.

To: Mayor Steve Adler and The Austin City Council

From: Creede Fitch

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay._

Allowing the farm to have continued events will support the farm as well as increase awareness of their effect on the community.

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay.

Any space that uses Austin land and soil to build community and grow healthy food needs to be supported by all. I own a home two houses away from the farm and I love having healthy nutrient-rich food as medicine available at my doorstep as well as education opportunities and neighborhood events. They have ALWAYS been mindful and respectful of their neighbors. I am a Hispanic medical professional in East Austin and I support the community hub of Springdale Farm wholeheartedly. I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property.

I've been living in East Austin for 12 years and have witnessed so much change. Springdale Farms (and Eden East) represent the kind of healthy, socially-minded neighbors we need as they advance access to healthy food, sustainable agriculture and community education. I don't understand why these good people and their valuable economic, cultural, and environmental contributions to our community are being criticized while outside housing developers and chain stores (fast food, pawn shops, dollar stores) remain unchecked.

Farms. Before the seated dinner we were free to roam the grounds and admire the planting season, chickens in coop and observe natural wildlife. I made new friends attending these functions, and made it a regular stop thereafter to purchase their delicious organic produce.

You have a treasure in this city with Springdale farms, a treasure that is not made of concrete, macadam and glass of the choking kind.

Please save this treasure and support their green oasis in this over-developed city. Please.

Thank you,

I teach science at Austin Discovery School and our neighbor farm is very important to our school's mission and what keeps Austin on the progressive cultural map. Adults raised in earlier eras also continually learn about health and land use as we were educated on very unsustainable models in our youth and need to retrain our brains. We can do that only if our local farms can survive their current economic challenges.

To: Mayor Steve Adler and The Austin City Council

From: Jonathan Lewallen

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

I recently had my wedding at Springdale Farm and everyone who attended remarked on how much they liked the venue. Our guests were able to experience an important part of Austin's culture and community.

Springdale worked with us at every step of the way to make sure that our event would not be intrusive to its neighbors, from the volume of our music to where our guests parked. It was wonderful to be able to hold our event at Springdale Farm, and allowing the farm to continue to hold community events would allow more Austinites to have that same opportunity.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay.

To the Mayor, and City Council,

My name is Joshua Jones and I am a patron and neighbor of Springdale farm. I have been shopping there for my personal and professional life as a chef for many years. I also live across the street from the farm and couldn't ask for better neighbors. I hope that at some point in these proceedings you have all actually gone to the farm and checked it out. It is a beautiful sanctuary in the middle of our city.

I know many of the issues that have arisen during this process have included alcohol use, noise, and parking. As far as alcohol and noise complaints go, there are two bars on our block within five hundred feet of Springdale farm, they play music loudly on their patios and serve alcohol until 2 AM, seven days a week. I don't see how the farm, whose events don't run past 10 PM is even remotely as invasive as these two bars. I challenge you to come over to our neighborhood on a weekend night and listen to the racket caused by these places. As far as the rest of the neighborhood we have a Segovia Distribution facility within one block as well and they start loading their trucks around three o'clock in the morning. Last but not least there is a police station also within a block that has police cars racing up and down our street at all hours of day and night. So my point is that our neighborhood is kinda noisy. We live in a city, these things happen. Why would we persecute one small business that is trying to make ends meet and do the right thing for our food system?

I hope that you will do your own due diligence and actually come and see what our neighborhood is all about. I think you will see that Springdale Farm is the best thing in our neighborhood. We would be at a loss as a city and a community if they aren't allowed to move forward.

Josh Jones

I have had the opportunity to visit Springdale Farm during the East Austin Farm Tour and for a jam-making class with Confituras. Having a working farm that engages with the local community is one of the things that makes East Austin special. Further, their engagement strengthens the fabric of thick democracy in a city that is growing. By thick democracy, I mean social engagement - this farm is a space for people to engage with one another, something that is more and more difficult to do IN PERSON in today's society. Please support Springdale Farm's place in our community.

1222. Katie Taylor (*zip code: 78724*)

It's community-oriented, urban farms like Springdale Farm that make Austin the unique, livable, desirable city it is. My husband and I were married at Springdale Farm. We regularly purchase Springdale Farm produce to feed our family. We Austinites have an obligation to support local businesses like Springdale Farm if we want our city to continue to be the best city it can be.

Steve Adler & Council

Please do the right thing here. I shop at Springdale every weekend and patronize restaurants that use their produce - they are very important to our community, and farming is hard and expensive. I cannot believe that we would give a tax break to Apple and turn our back on local food producers trying to sustain their business with special events. Do what we voted for you to do not that long ago.

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

I was at the June 2015 landing commission meeting where the Springdale farm plan was shot down. They have a comprehensive plan. They arranged parking with AISD Allan. There was concern over weddings conflicting with classes at Allan. Allan elementary is a pre-k center. Pre-k in AISD gets out at 2:45, and Springdale farm clearly had a plan with operating hours where they could not start a weekday wedding until 5pm - well after the pre-k kids are home for the day. They made a great plan and it can't get much better. They deserve to use their space commercially within the limits they've agreed to in the last plan.

Springdale Farm has been and continues to be a cultural and educational asset to its neighborhood and to the city as a whole. As an urban Eden in a rapidly growing city, there are invaluable benefits to Springdale's initiative to showcase the importance of sustainable living and respecting natural beauty. They bring a greater and necessary balance to the inevitable building up of small neighborhoods throughout our city. How lucky are we that someone has the courage and tenacity to fight to maintain a clean and sustainable food-growing business in a beautiful location with the goal of bringing betterment to its community? I support Springdale Farm, the warm-hearted and well-meaning team behind it, and their vision to maintain and grow a respect and sense of caring for farming and food education.

Springdale Farms is owned and operated by people that care about Austin and give back to the community in countless ways. They are connected with the land and it's history and their neighbors and neighborhood. They stand for good, quality food, a dedication to taking care of their land for themselves and generations to come. Further, they have been located in East Austin for many years, long before it was a trendy or desirable place.

They open their land and space to the community in countless ways. Limiting their ability to continue to do so would be a disservice to the entire unique, diverse community of Austin.

Mayor Adler, say YES to Springdale Farm's permit!

Dear Mayor Adler and City Council: For the six years I've lived in Austin, Springdale Farms has been a regular part of my life here. I've attended numerous events, many of them free and solely for the

benefit of the community. They're on a lovely street and their trees and farm and old farmhouse make it all the lovelier. I am saddened by everything that has happened surrounding them. I live near Burnet, where everything is a perpetual construction zone, with restaurants, condos, and apartments being added on a literal daily basis. While I'm grateful for the growth in my area, what I would give to have as wonderful a place as Springdale next door to me. Their commitment to sustainable farming and to sharing their knowledge with the community is a rare treat within city limits. I ask that you allow them to continue hosting events at their farm. It is a piece of Austin that deserves to fully make sure of their commercially zoned property. I can assure you that they have a heck of a lot more respect for the community than most commercially zoned places!

Best,
Martha

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay._

This farm is apart of Austin, it's a part of my family and most importantly it's a part of our health. This past Spring, Springdale Farm donated their farm to allow the autism community of Austin to have a fundraiser for the Austin Autism Society of Central Texas. Everyone had a blast. Springdale Farm's open their arms and hearts to everyone. One of the main reasons I do not want to leave this over crowded city is because of our urban farm community. Please give Springdale Farm their permit, they are doing such amazing things for our Austin community.

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay._

Austins' farms, especially on the east side of the city, are gems! They are uniquely Austin and Springdale Farms is no exception. From education, community building & empowerment and providing locally grown/sourced to individuals and businesses alike, Springdale Farms and those farms like it must remain a permanent fixture of the Austin landscape for as long as there are people dedicated to preserving the land and way of (farming) life. Like many other area residents, I treasure their events. Please approve the conditional use permit for Springdale Farms

To: Mayor Steve Adler and The Austin City Council

From: Paige Oliverio

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm owners, Paula and Glenn, work tirelessly alongside neighboring residents to ensure they operate their farm and related events in a manner that's compatible with their neighborhood surroundings even though they are on a large commercial property rather than single family. Paula and Glenn have always been driven by a sense of "community first" - balancing that with working from home to make a sustainable family living (which all of us must do to continue to live in Austin). They are an example for how to do it right.

Springdale Farm is a part of the heart of Austin, and it is upsetting that a minority of activists with personal agendas, who can be counted on one hand, have exerted so much manipulative control over the sustainability of our communities and our local food system.

I want to urge you all to maintain a sense of maturity, decorum, and practicality about the current and

future needs of our city and continue to support Springdale Farm by voting to approve their conditional use permit without delay._

To take away the lively hood of a productive business like an urban farm is shameful. When is enough enough? They bring so much education and culture and food to the city. Why force them out of business to sell off their land to another high rise. The cities actions on this matter have been disgusting. And it seems like you're making a profit off their land if they lose it. What makes Austin great is small things like this. We are losing our heart and soul to big business.

To: Mayor Steve Adler and The Austin City Council

From: Robert E. Jones

Mr. Mayor and Honorable Council Members I urge you to approve the conditional use permit for

Springdale Farm.

They are providing local, sustainable produce for restaurants, a great educational experience for under-served children and a fantastic community oriented venue for events. They have followed the rules, given back to the neighborhood and done everything asked of them. As Austin grows and evolves we should look to reward those local businesses that preserve the best of Austin and Springdale Farm is a model on that list.

Thank you for moving expeditiously to correct this error and for your support of this community treasure.

Sincerely,
Robert E. Jones

Dear Mr. Mayor and Councilwomen and Councilmen,

My husband and I were so fortunate to have our wedding at Springdale Farm in April of this year. Paula and Glenn were (and have always been) kind, hardworking and compassionate to their community. I've known the Foore's since 2010, so I say this with confidence.

As we planned for our big day, Paula was sure to stress the importance of honoring the neighbors and the neighborhood, ensuring we had everything we needed and knew all of the expectations so we would not interfere with the day to day lives of their neighbors. I know this family has the utmost respect for the unique position their farm is in.

Also, it felt like a privilege to give money to our "venue" because it is a cause we support. We are fortunate, but not wealthy by any means. So when it came to planning our day, we carefully chose to support community-based and friend-driven organizations and businesses.

Our neighborhood (we live in the Govalle neighborhood a few blocks from the farm), would not be what it is without this farm. Their stewardship for the earth, attention and focus on health and community are truly irreplaceable. It would be a devastating blow to our community to lose Springdale simply because they cannot operate their business as they have been doing for years.

Thank you for your attention,
Sarah Jones

These urban farms on the Eastside give so much to the community and neighborhood and limiting the events cause that to decrease. We live in a city thriving, especially the food sense. People are learning to eat healthier because of it. Also local cuisine was never really something Texas was able to thrive on (and was left states with different weather conditions like California. These farmers are starting a Texas Food revolution, and as a Chef, and likewise someone with low income, these farmers are doing great things and shouldn't be limited.

I am a volunteer at Springdale Farms. I am a chef and mother and have lived in Austin for almost twenty years. I have been a vital component in the foodie scene in our city. I feel passionately about how vital urban farms are to local community. I help with educating children about how an organic farms works here at the farm. Local schools. Thinkery. Kids from every neighborhood. I have personally seen children finally comprehend where food actually comes from. Why growing food without pesticides is so much better for not only their bodies but for the world. The future.

Please help us keep this community treasure up and running.

As a side note. I also am a Lyft and Uber driver. I have also worked and frequented many of the bars and restaurants we are vein grouped with in this dispute. And I can absolutely assure you that the weddings and supper clubs that Springdale Farms needs to continue holding to subsidize the farms overall operations are not similar. At all. Quiet. Tasteful and so unique.

To: Mayor Steve Adler and The Austin City Council

From: Tami Pharr

I urge all Austin City Council members and Mayor Adler to approve the conditional use permit for Springdale Farm so that they may continue to hold community events on their property._

Springdale Farm is a hub that supports education, heirloom plant cultivation and family events that reflect the best facets of our Austin community.

Springdale Farm is a part of the heart of Austin - the produce they raise provides organic food for our

vibrant local businesses and restaurants, as well as hungry Austinites across the city.

We urge all our Austin City Council members and Mayor Adler to continue to support Springdale Farm and vote to approve their conditional use permit without delay._
