

This message is from David Schanzle. [REDACTED]

I have a history in Health Effects for toxic and airborne wastes. If you continue to poison our water we will have no choice but to sue for the damages you are doing to us and our families.

DO NOT DOUBT YOUR LIABILITY!!!! Previous votes to contaminate our drinking water are criminal acts and people have suffered including children, infants and the elderly. Fluoride is clearly a toxic waste and destroys the pineal gland in the brain and lowers the IQ of those to unfortunate to be able to afford water purification systems to remove the contaminates you are voting to put in the water.

Let's be clear, you are an employee of the people, a Public SERVANT, stop serving corrupt dark hearted genocidal monsters of business who wanted to reduce population and make money doing it. What a foulness added to our water source. Disgusting business this is, there is no medical reason to add fluoride and where exactly did you get to add something without our consent.

You better do the right thing and stop the poisoning today.
