Additional Backup Information

The contract will provide one-inch river rock for Austin Water that is used in the repair of waterlines as a bedding material for pipe to prevent sagging and movement of pipe once the repairs have been completed.

Austin Water is required to wrap plastic around waterlines to protect them from corrosion. The river rock is used to cover the plastic because its smooth and rounded shape prevents tearing of the plastic cover. The rock will be delivered to the Tim Louvier, Glen Bell, and North Service Centers for storage until needed. In addition, the contract provides for the pickup of approximately 5,400 tons of rock at the vendor's site.

The current contract expired on February 13, 2016.
