Austin Water Mission and Goals for 2017

Mission

The mission of Austin Water is to provide safe, reliable, high quality, sustainable, and affordable water services to our customers so that all community needs for water are met.

Goals

Strengthen customer value and stakeholder understanding and support:

- Minimize loss of water. Respond to 90% priority 1 leaks within 3 hours.
- Reduce customer service complaints. Keep customer service complaint rate to no greater than 0.08%.

Protect the water supply and promote community sustainability:

- Contribute to the conservation of the region's water supply by reducing growth of potable water demand. Maintain total water pumpage per capita per day at 123 gallons.
- Reduce demand for potable water. Provide 1.1 billion gallons of reclaimed wastewater for beneficial purposes.
- Protect water quality and conserve habitat for endangered species. Conduct planned conservation practices or compliance monitoring on at least 25,000 acres of Austin Water's wildlands.

Protect the public health and safety by providing high quality water services:

- Maintain quality of drinking water to a higher standard than regulatory requirements. Ensure drinking water quality turbidity is no greater than 0.10 Nephelometric Turbidity Units.
- Maintain quality of wastewater effluent being discharged to the environment by maintaining higher quality than permitted standard. Ensure carbonaceous biological oxygen demand of 3.0 in treated wastewater.
- Reduce the number and volume of Sanitary Sewer Overflows. Keep number of reportable wastewater overflows per 100 miles of sewer lines at 3 or less.
- Maintain city-wide fire protection. Return fire hydrants back to service within 14 days, 90% of the time.

Maintain strong financial viability to ensure balanced cost structure and affordable rates:

- Ensure continued strong financial position by maintaining AA bond rating.
- Keep dollar amount of revenue recovery above \$2.5 million.
- Control total operating costs. Keep total operating costs at or below 98% of budget.
- Minimize utility debt. Keep percentage of cash funding of capital improvement spending above 20%.
- Maintain annual average water and wastewater bill of less than 1.2% of median household income.

Ensure infrastructure stability and operational optimization:

- Improve effectiveness and efficiency of Capital Improvement Program project delivery. Achieve 80% of planned Capital Improvement Program spending each fiscal year.
- Maximize energy efficiency. Use no more than 2,278 kilowatt hours (kWh) per million gallons of water, wastewater and reclaimed water services provided.

Austin Water

Message from the Director

Austin Water (AW) provides water, wastewater, reclaimed water, conservation and environmental protection services to a population of over one million retail and wholesale customers spanning over more than 540 square miles. AW draws water from the Colorado River into three regional water treatment plants that have a combined maximum capacity of 335 million gallons per day. Drinking water is pumped from the plants into Austin's water distribution system, which has a total reservoir storage capacity of approximately 170 million gallons. AW also operates a collection system where wastewater is treated and safely released into the Colorado River to augment environmental flows or recycled into reclaimed water for uses such as irrigation or industrial cooling. Austin Water's Hornsby Bend biosolids facility has gained national recognition for its management of the waterways and lands, leading to its recognition as a national birding sanctuary. In addition, AW manages over 40,000 acres of wildlands to protect water quality and endangered species habitat. Austin Water's award-winning Water Conservation division offers public outreach and incentive programs.

Balcones Canyonlands
Preserve

Austin Water accomplishments and awards in 2016 include:

- Partnership for Safe Water: Director's Award for exceptional performance and standards at both the Ullrich and Davis Water Treatment Plants
- National Association of Clean Water Agencies: Silver Award to South Austin Regional Wastewater Treatment Plant and Walnut Creek Wastewater Treatment Plant
- Improved bond ratings by bond rating agencies for Austin Water's financial outlook, from Negative to Stable
- Texas Living Waters' Inaugural Water Conservation Scorecard: Highest score amongst 300 utilities in the state for Water Conservation

Austin Water continues to deliver high-quality water and wastewater services to its customers. Reliable water and wastewater services are essential to the health and welfare of the community. While AW has been recognized for the excellence of utility services and management practices, the Utility continues to face challenges including water supply sustainability, resiliency and diversification; aging infrastructure risk management; balancing financial stability with service reliability, quality and customer affordability; maintaining service levels for a growing service area; and managing regulatory requirements.

Austin Water is confident that we will meet all of the challenges we face. We continue to be a leader in our industry and will adapt to changing conditions. Our vision is to be recognized as the best water utility in the nation, in a city that strives to be the best managed city in the nation. Our team is committed to achieving these lofty goals, while providing safe, reliable, high quality, sustainable and affordable water to our customers and protecting the environment through sustainable practices.

Greg Meszaros, Director Austin Water

Budget Highlights

The FY 2016-17 Budget for Austin Water addresses major operating and capital improvement issues while allowing the Utility to continue to provide high quality water and wastewater services. reliable water supply, quality customer services, appropriate and timely investment in infrastructure and affordable rates remain the Utility's priorities. The combined storage water supply of Lakes Travis and Buchanan reached a critically low level in November of 2014, a threshold not seen since the 1950's drought of record. In 2015, the region saw an increase in rainfall that was almost double the annual average, and the amount of water flowing into the Highland Lakes was higher than any year since 2007. The combined storage of Lakes Travis and Buchanan increased by more than 1.2 million acre-feet from the 2015 to 2016 spring seasons (one acre foot is equal to 325,851 gallons). In May 2016, the City Manager lifted the Stage 2 watering

restrictions and implemented the Council approved Conservation stage. The new stage includes

Line Cleaning

updated residential watering days and a comprehensive Austin Water campaign to educate and engage the community regarding restrictions during this stage. Even with lifting of Stage 2 restrictions, the upcoming fiscal year continues to present challenges for the Utility including balancing its financial needs while pursuing affordability for its customers, increasing service needs due to growing population and service area, maintaining and improving its infrastructure, and managing regulatory requirements.

Austin Water's FY 2016-17 Budget projects total available funds of \$604.1 million and total requirements of \$571.6 million. A system-wide rate increase of 3.0% is necessary in FY 2016-17 to ensure that AW meets its cost burden while maintaining the level and quality of service it provides to its customers.

Revenue

A 2016 report published by The Living Waters Project ranked the City of Austin's water conservation policies and ongoing efforts as best in the state among more than 300 Texas utilities. The environmental consortium reviewed state reports regarding water quality standards, the amount of water loss throughout the pipeline infrastructure, and evaluated water restriction guidelines. Water conservation initiatives prolong the "trigger" to purchase additional water under the existing Lower Colorado River Authority (LCRA) supply agreement and defer the need to expand capital infrastructure in the long term, a goal the utility genuinely supports. AW aspires to lead the state and the nation in innovative ways to sustain our natural resources.

Water service revenue is inherently volatile because of extreme weather conditions and the success of Austin's water conservation programs. However, AW has strengthened its financial position through a series of business model changes recommended by several commissions and adopted by the Austin City Council. Starting in 2015, Austin Water began to collect a greater percentage of fixed revenue from its customer base and also introduced a water reserve fund volumetric surcharge. These innovative changes have not only improved the utility's financial metrics, but reinforced the City of Austin's position as a leader in conservation based pricing.

For FY 2016-17, AW is projecting an increase in revenue of \$12.8 million or 2.3%, from \$567.3 million in the current year estimate to \$580.1 million. The increase is the result of the projected growth in customers and the projected system-wide revenue rate increase.

Rates

In FY 2016-17, the projected revenue increase needed to cover operating requirements, debt service, and transfers out is higher than the projected increase in base revenue from system growth, necessitating increases in water, wastewater, and reclaimed water rates. A 2.9% rate revenue increase for water service, a 3.0% rate revenue increase for wastewater service, and a 10.0% rate revenue increase for reclaimed water for a combined rate revenue increase of 3.0% are included in the budget. In addition, the Water Reserve Fund volumetric surcharge is projected to remain at \$0.19 per 1,000 gallons in FY 2016-17. AW projects to collect \$7.3 million in Surcharge Revenue.

Annual water consumption in the residential customer class peaked in FY 2010-11, and has steadily dropped each year as the combined effects of Stage 2 water restrictions and prolonged drought weather conditions changed customer behavior. AW reduced the FY 2015-16 residential annual average per account to 5,600 gallons of water because of lower than anticipated monthly consumption over the financial forecast period. However, with the ease in water restrictions implemented in May 2016, AW anticipates for the annual average to increase to 5,800 gallons for the current and next fiscal year.

The table below reflects the proposed average residential customer annualized bill impacts for FY 2016-17. The average residential water and wastewater bill is based on 5,800 gallons of water usage and 4,000 gallons of wastewater per month with a 5/8" meter. Additional information on rates can be found in the fee schedule in Volume II of the Budget Document.

Average FY 2016-17 Residential Customer Bill Impact					
	Current 2016 Rates ¹	Proposed 2017 Rates	\$ Variance	% Variance	
Water Service ²	\$40.26	\$41.59	\$1.33	3.3%	
Wastewater Service	\$39.98	\$41.60	\$1.62	4.1%	
Total Revenue	\$80.24	\$83.19	\$2.95	3.7%	

Notes:

- 1. Bills based on 5,800 gallons of water and 4,000 gallons of wastewater discharge
- 2. Bills includes the Reserve Fund Surcharge

Requirements

Total requirements in FY 2016-17 proposed budget is projected to be \$571.6 million, which represents an increase of \$35.1 million or 6.5% from FY2015-16 amended budget of \$536.5 million. This increase is due to a rise in Citywide cost drivers such as wage adjustments, insurance costs, market study, fleet preventive maintenance and fuel cost, and departmental cost drivers necessary to support service needs and infrastructure maintenance. Departmental cost drivers include Austin Energy billing and customer care, additional staffing, increase in contractual costs, Public Works charges, street cuts, pipeline maintenance, and chemicals. Approximately half of the increase is due to transfers to CIP, General Fund, Support Services Fund and Debt Service.

AW's staffing levels have remained relatively flat in the last two fiscal years. AW's growing service area and customer base has resulted in increasing workloads for operational and maintenance staff and requires additional staff to adequately manage increased demands, improve response times, and meet efficiency goals. For FY 2016-17, Austin Water is proposing to add 22.5 new positions for the following purposes:

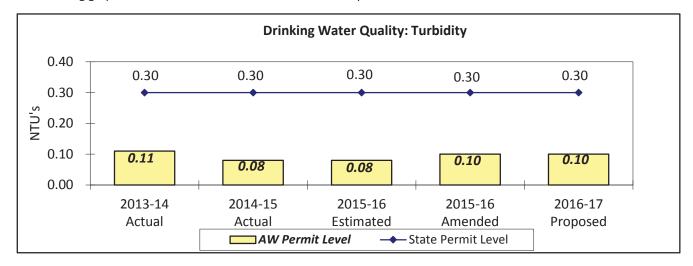

Work related to the newly annexed Lost Creek and River Place package plants and water systems: 5.0 4.0 Distribution system maintenance, small meter exchange program, and large meter testing: Supporting Supervisory Control and Data Acquisition for engineering system needs: 1.0 Providing engineering support for large diameter transmissions and large valve operations: 1.0 Instrumentation and automation support for expanded service area: 1.5 Strengthening internal controls for debt management, external agreements and annexation process: 1.0 Addressing security, tap sales, lab systems, accident injury prevention, records management: 5.0 Administrative support for Public Information Requests and Utility Development Services: 2.0 Expedited Plan Review program: 2.0

FY 2015-16 budget was amended to include a transfer to debt service for Capital Recovery Fee defeasance in the amount of \$18.2 million. The transfer was made out of Capital Recovery Fee or Impact Fee revenue to set up an escrow account used to defease outstanding bond issues. A defeasance is a method of paying off outstanding bond issues early.

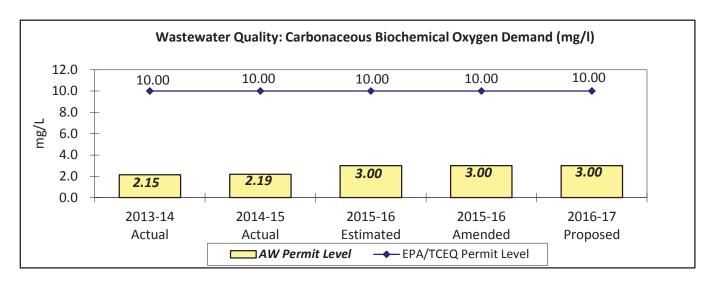

The current 5-year Capital Improvements Program (CIP) spending plan for FY 2017-21 is \$886.1 million. The emphasis is on replacement and rehabilitation of critical assets throughout the water and wastewater systems, which consist of horizontal assets (pipes, valves, etc.) and vertical assets (treatment plants, pump stations, reservoirs, lift stations, etc.). The focus on rehabilitation and replacement of older assets can reduce operating costs by increasing the efficiency of the system.

Key Performance Indicators

The following graphs indicate that both water and wastewater qualities exceed state standards.

One way of assessing drinking water quality is to examine its turbidity, or the relative clarity of a liquid. Turbidity is measured in Nephelometric Turbidity Units (NTU) and it is an excellent measure of plant optimization to ensure maximum public health protection. NTUs of 1.0 or less generally are not detected by the naked eye. Per the Safe Water Drinking Act, the permit level for drinking water turbidity is less than 0.30 NTU's 95% of the time. Austin Water projects turbidity for FY 2016-17 at 0.10 NTU's.

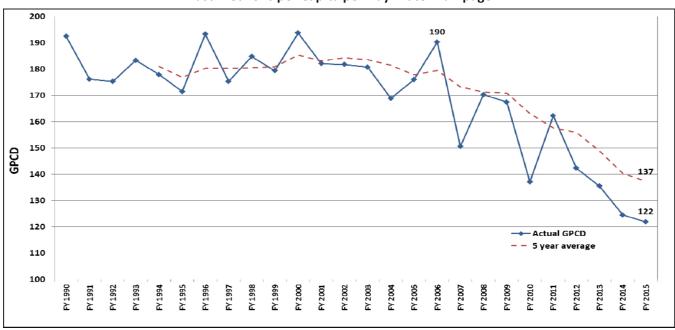

One way of assessing the quality level of treated wastewater effluent is to compare the actual level of Carbonaceous Biochemical Oxygen Demand (CBOD), in milligrams per liter (mg/L), to the permitted level mandated by the Environmental Protection Agency (EPA) and the Texas Commission on Environmental Quality (TCEQ). Austin's wastewater treatment measures have historically been well below the permitted level of 10.00 mg/L. Austin Water projects CBOD for FY 2016-17 at 3.0 mg/L.

Water Conservation

Continuing initiatives in the Water Conservation program for FY 2016-17 include incentives for outdoor water use reduction, commercial equipment upgrades, and a mobile app to allow customers to better understand water use. Austin Water is exploring additional opportunities for conservation under the umbrella of the Water Forward Task Force, including projects to promote reclaimed and auxiliary water use. Recent increased rainfall has refilled storage reservoirs, allowing the lifting of drought restrictions for the first time in five years. Lessons learned from the drought led to a revision of water use codes in 2016, relaxing restrictions for car washing and hose-end sprinklers, but permanently limiting automatic irrigation to one day per week. As a result of these changes, the FY 2016-17 budget includes a slight increase in water use compared to previous years. Austin Water's long-range conservation efforts preserve environmental flows in the Colorado River and delay additional water supply costs, while reducing average water use per day. In FY 2014-15, gallons of water pumpage per capita per day (GPCD) reached 122, continuing a slow downward trend, as shown in the following graph.

Austin Gallons per Capita per Day Water Pumpage

Austin Water

Background

Austin Water's (AW) vision is to be recognized as the best water utility in the best managed city in the country. AW is committed to achieving this goal, while providing safe, reliable, high quality, sustainable, and affordable water services to our customers so that all community needs for water are met while protecting the environment through sustainable practices.

Reliable water and wastewater service is essential to the health and welfare of the community. Continued investment in the utility system is a prerequisite for economic growth and prosperity in the future. AW is a very capital-intensive enterprise, which requires continuous investment in extensive above and below ground infrastructure necessary to serve new growth, ensure system reliability, comply with regulatory requirements, and accommodate the roadway improvements in AW's service area. AW has been recognized for excellence of its services and management practices but faces important challenges in continuing to serve the community. These challenges include financial stability, implementation of a capital improvement program (CIP), and the revenue and cost impacts resulting from increased water conservation.

AW has three utility systems: Water, Wastewater, and Reclaimed. The AW's capital program includes projects defined as rehabilitation of existing infrastructure or new infrastructure, and is organized into thirteen project types which include the following: annexed area, lift station, pump station, rehabilitation, relocation, reservoir, Service Extension Request (SER) reimbursements, transmission/distribution, treatment plant, vehicles and equipment, water reclamation initiative, wastewater collection, and other.

Prior Year Accomplishments

AW spent approximately \$120 million on infrastructure improvements in FY 2014-15 compared to \$202 million in FY 2013-14. AW anticipates spending approximately \$154 million in FY 2015-16 with significant progress in the Treatment Plant, Wastewater Collection, and Water Reclamation project types including the renewal and enhancement of the aging Medium Service Pump Station and electrical infrastructure at the Davis Water Treatment Plant. Wastewater project type milestone accomplishments include the Parmer Lane Interceptor project, which involves the installation of over two miles of large diameter wastewater pipeline along Parmer Lane between Anderson Mill and McNeil roads. AW continued to expand the reclaimed water system in FY 2014-15, starting construction on the reclaimed water main that will serve the downtown area, including the Capitol Complex, Waterloo Park, Austin Community College, and various State of Texas office buildings.

FY 2016-17 Spending

The FY 2016-17 work plan emphasizes replacement and rehabilitation of critical assets throughout the water and wastewater systems, which consist of horizontal assets (pipes, valves, etc.) and vertical assets (treatment plants, pump stations, reservoirs, lift stations, etc.). Furthermore, the work plan continues to emphasize the growth of reclaimed water assets. The focus on rehabilitation and replacement of older assets can reduce operating costs by increasing the efficiency of the system.

Operations and Maintenance Impact

The operating and maintenance costs of the CIP program to the AW FY 2016-17 operating budget are minimal.

Funding Sources

AW Capital Improvements Program projects are financed largely by issue of commercial paper that is later refinanced with long-term debt serviced by AW's revenues. From FY 2012-16 AW has averaged \$23.7 million in annual appropriations, while spending down prior appropriation to accomplish average annual spending of over \$200 million from FY 2012-15. In FY 2012-

13 AW started to limit spending in the CIP due to loss of revenue in the operating fund related to drought conditions. With drought relief in FY 2015-16 more projects are moving forward and a significant appropriation is needed to support the multiyear nature of CIP projects. Full appropriations for capital projects are required for contract awards to ensure adequate funding even though that appropriation will most likely not be fully spent in the same fiscal year. The construction industry has also seen an increase in construction cost index of 11% from 2011 to 2015. In FY 2016-17 AW is appropriating \$545.2 million that will cover estimated expenses and encumbrances over the next 3-5 years. Future annual appropriations are expected to be more in alignment with annual spending.

The funding source for \$167.2 million of the \$545.2 million is from the Texas Water Development Board (TWDB). The appropriation request to cover TWDB estimated encumbrance provides AW the option to apply for a low interest loan through TWDB's State Water Implementation Fund for Texas (SWIFT) program. This option allows AW to convert current and future project expenditures normally financed with 30-year revenue bonds to a 20-year low interest loan with a reduction in interest rates based on TWDB's AAA bond rating with a 35% discount applied to their market interest rate. The interest rate reductions will save ratepayers financing costs for the funding of projects as compared to the traditional revenue bond financing. Council authorized approval to submit a multi-year loan application to TWDB in April of 2016. AW will bring forward the authorization to execute and negotiate a financing agreement to Council in August 2016 and approval of the loan transaction to Council in November 2016.

AW's CIP is reviewed annually by the Water and Wastewater Commission and Budget Subcommittee of the commission. The Budget Subcommittee meets approximately five times per year to review AW's 5-year financial forecast, proposed budget (if available), and detailed proposed 5-year CIP plan. The Budget Subcommittee will make a recommendation to the full commission for approval of the annual proposed budget. Additionally, the Water and Wastewater Commission recommends approvals for Drinking Water Protection Zone (DWPZ) projects to be included in the proposed 5-year CIP plan as part of our Financial Policies and are briefed on major CIP projects throughout the year.

Financial Policies — 2016-17

Policy Current Status

20. Current revenue, which does not include the beginning balance, will be sufficient to support. In compliance current expenditures (defined as "structural balance"). However, if projected revenue in future years is not sufficient to support projected requirements, ending balance may be budgeted to achieve structural balance.

21. A Non-Nuclear Plant Decommissioning Fund shall be established to fund plant retirement. The In compliance amount set aside will be based on a decommissioning study of the plant site. Funding will be set aside over a minimum of four (4) years prior to the expected plant closure.

Austin Water Financial Policies

1. The term of debt generally shall not exceed the useful life of the asset, and shall not generally In compliance exceed 30 years.

2. Capitalized interest shall only be considered during the construction phase of a new facility, if the In compliance construction period exceeds 7 years. The time frame for capitalizing interest may be 3 years but Austin Water not more than 5 years. Council approval shall be obtained before proceeding with a financing that does not use includes capitalized interest.

capitalized interest

Principal repayment delays on revenue bonds shall be 1 to 3 years, but shall not exceed 5 years.

In compliance

- Each utility shall maintain a fully funded debt service reserve for its existing revenue bond issues In compliance and future issues, in accordance with the Combined Utility Systems Revenue Bond Covenant.

Debt service coverage of at least 1.50x shall be targeted.

In compliance

Short-term debt, including tax-exempt commercial paper, shall be used when authorized for In compliance interim financing of capital projects. The term of short-term debt shall not exceed 5 years. Commercial paper will be converted to refunding bonds when appropriate under economic and business conditions. Total short-term debt shall generally not exceed 20% of outstanding longterm debt.

7. Commercial paper may be used to finance new water and wastewater plants, capital expansions, In compliance and growth-related projects as well as to finance routine capital improvements required for normal business operation. Commercial paper for the necessary amount may also be used to finance improvements to comply with local, state and federal mandates or regulations.

8. Capital improvement projects for new water and wastewater treatment plants, capital expansions, In compliance and growth-related projects that are located in the Drinking Water Protection Zone (DWPZ) will be identified and submitted, as part of the annual budget process, to the following Boards and Commissions: Water and Wastewater Commission, Resource Management Commission, Environmental Board, Planning Commission, and the Zoning and Platting Commission.

Financial Policies — 2016-17

Policy Current Status

These Boards and Commission will review growth-related DWPZ capital projects spending plans, obtain Board and Commission and citizen input, review consistency with Imagine Austin Comprehensive Plan, review effect on growth within the DWPZ, and make recommendations on project approval for inclusion in Austin Water Utility's 5-year capital spending plan.

A public hearing will be held during the City's annual budget review process to provide citizens an additional opportunity to comment on growth related projects located within the DWPZ.

9. Ongoing routine, preventive maintenance should be funded on a pay-as-you-go basis.

In compliance

10. Capital projects should be financed through a combination of cash, referred to as pay-as-you-go In compliance financing (equity contributions from current revenues), and debt. An equity contribution ratio of at least 20% is desirable.

- 11. The Austin Water Utility shall maintain a minimum guick ratio of 1.50 (Current Assets less In compliance inventory divided by Current Liabilities). Source of information shall be the Comprehensive Annual Financial Report.
- 12. The Austin Water Utility shall maintain operating cash reserves equivalent to a minimum of 60 In compliance days of budgeted operations and maintenance expense.
- 13. Revenue generated by the Austin Water Utility from Debt Service Coverage requirements shall be In compliance used for General Fund transfers, capital investment, or other Austin Water Utility requirements such as working capital reserve or non-CIP capital.
- 14. Austin Water Utility rates shall be designed to generate sufficient revenues to support the full cost In compliance (direct and indirect) of operations and debt, provide debt service coverage and meet other revenue bond covenants, if applicable, and ensure adequate and appropriate levels of working capital.
- 15. The General Fund Transfer shall not exceed 8.2% of the Austin Water Utility three-year average In compliance revenues, calculated using the current year estimate at March 31 and the previous two years' actual revenues.

Revenue collected from the Reserve Fund Surcharge will be included in the General Fund Transfer calculation, however any use or transfer of the reserve fund back into the operating fund in the future due to revenue loss will not be included in the total revenues to calculate the General Fund Transfer.

16. A Water Revenue Stability Reserve Fund shall be created and established for the purpose of In compliance offsetting current year water service revenue shortfalls below budgeted revenue levels.

The target funding level for the Reserve Fund is 120 days of the budgeted water operating requirements of Austin Water Utility, which includes operations and maintenance, and other operating transfers, but excludes debt service and other transfers. In the event that any portion of the Reserve Fund is used, the balance will be replenished to the target level within 5 years.

Austin Water Significant Changes

Austin Water Utility Fund - Combined	
Revenue Changes	Dollars
Increase in Water Service revenue from the combined impact of water consumption projections, which includes moving from Stage 2 Water restrictions to Conservation Stage Water restrictions and a proposed 2.9% water rate revenue increase.	\$13,749,884
Increase in Wastewater Service revenue from the combined impact of an increase in base revenues, an increase in wastewater averages, and an increase in revenue resulting from a proposed 3.0% wastewater rate revenue increase.	\$16,406,522
Increase in Reclaimed Water Service revenue from a proposed 10.0% system-wide base reclaimed water rate revenue increase.	\$735,307
Increase in Reserve Fund Surcharge revenue due to increased consumption from moving from Stage 2 Water restrictions to Conservation Stage Water restrictions.	\$90,698
Decrease in revenue from industrial wastewater discharge permit fees and contractual agreements for cellular network towers on Austin Water ground space.	(\$120,800)
Increase in Capital Recovery Fees due to a projected increase in growth-related expenses.	\$1,964,000
Expenditure Changes	FTEs Dollars
Citywide Cost Drivers Additional funding to cover the cost of 2% Pay for Performance and \$0.29 across-the-board wage increases in FY 2016-17, increase the living wage to \$13.50 per hour, annualize the cost of a Citywide market study approved in FY 2015-16, and	\$4.224.4C0
increase City contributions for health insurance by 8%.	\$4,331,468
Decrease in Accrued Payroll and Workers' Compensation.	(\$500,279)
Increase in fleet fuel charges and fleet preventative maintenance costs.	\$714,913
Increase in the Communication Technology Management support allocation.	\$399,487
Increase in the City Administrative Support Transfer.	\$241,988
Funding methodology change in the Capital Project Management Fund allocates administrative costs for project management activities to operating budgets and discontinues practice of directly charging capital projects. Increase to operating

Program: Treatment

Activity: Process Engineering

The purpose of Process Engineering is to provide support to the water, wastewater and biosolids treatment facilities by optimizing process control, troubleshooting problems, advising on design and construction of projects, and assisting in keeping the plants in regulatory compliance.

	2013-14 Actual	2014-15 Actual	2015-16 Estimated	2015-16 Amended	2016-17 Proposed

Austin Water Budget Detail by Activity

Program: Water Resources Management Activity: Utility Development Services

The purpose of the Utility Development Services Division is to: 1) review engineering plans, tap plans, and service extensions requested from developers and landowners in order to assist them in obtaining water, wastewater and reclaimed water utility services for existing and future development while meeting Austin City Code and Texas Commission on Environmental Quality rules and regulations; 2) regulate on-site sewage facilities and private wastewater laterals in order to protect the public's health and safety; and 3) perform contract negotiations and customer management services for Austin Water in order to assist developers, other municipalities, districts, corporations, and other entities with the provision of contracted City water and wastewater services.

Austin Water Revenue Stability Reserve Fund

Purpose and Nature of Fund

The Austin Water Revenue Stability Reserve Fund (Water Reserve Fund) was created for the purpose of offsetting current year water service revenue shortfalls below budgeted revenue levels.

The target funding level for the Water Reserve Fund is 120 days of the budgeted water operating requirements of Austin Water, which includes operations and maintenance and other operating transfers. In the event that any portion of the Water Reserve Fund is used, the balance will be replenished to the target levels within 5 years.

The goal is to reach the target funding level of 120 days of budgeted water operating requirements within 5 years. If the fund is drawn down prior to reaching the 120 day target during the first 5-year development period, the Water Reserve Fund surcharge shall not be lower than it was during the year in which the draw down occurred until such time as the fund reaches its 120 days of operating costs. If the fund is drawn down after reaching the 120 day target, the fund will be replenished within a 5-year period.

The Water Reserve Fund shall only be used to offset a current year water service revenue shortfall where actual water service revenue is less than the budgeted level by 10% or greater. The maximum use of the Water Reserve Fund in any fiscal year is 50% of the existing balance at the time of request for Council action.

When the target levels of the Water Reserve Fund are reached, any Water Reserve Fund surcharge shall be reduced to levels sufficient to only maintain the goal of 120 days of operating requirements as may be necessitated by changes in budgeted operating costs over time.

All interest earned by the Water Reserve Fund account shall remain in the Water Reserve Fund in order to offset funding and replenishment requirements and to minimize rate impacts for water customers.

Factors Affecting Revenue

Sources of funding for the Water Reserve Fund includes a Water Reserve Fund volumetric surcharge charged to all customer classes, operating reserves in excess of 60 days of operating requirements and any available net water service revenue after meeting all obligations of Austin Water. The FY 2016-17 Budget includes projected revenue from the Water Reserve Fund volumetric surcharge.

Factors Affecting Requirements

Requirements are costs related to offsetting a current year water service revenue shortfall where actual water service revenue is less than the budgeted level by 10% or greater. The maximum use of the Water Reserve Fund in any fiscal year is 50% of the existing balance at the time of request for Council action.

The FY 2016-17 Budget does not include a transfer out from the Austin Water Revenue Stability Reserve Fund.

Wildland Conservation Fund

Purpose and Nature of Fund

The Wildland Conservation Fund is responsible for the management of the Balcones Canyonlands Preserve (BCP) which preserves over 13,000 acres of City-owned property. The preserve is where the land and ecosystem can function in its natural condition and is not disturbed for purposes of agriculture, urban, or industrial use.

Program activities for BCP are covered under a federal Endangered Species Act section 10(a) permit, issued in May 1996. An interlocal Agreement between Austin and Travis County specifies that funding for implementation of the Balcones Canyonlands Conservation Plan (BCCP) Shared Vision and the permit is shared between the City of Austin and Travis County while each entity is independently responsible for operations and maintenance of preserve lands that they own or acquire. Additionally, revenue generated through sales of BCCP Participation Certificates (mitigation credits) are split evenly between the City and County.

The BCP provides management and administration for a regional preserve system for endangered species. The preserve protects eight endangered species, two neotropical migratory songbirds (the golden-cheeked warbler and black-capped vireo), six karst-dwelling invertebrates, and twenty-seven species of concern living in western Travis County. Management of BCP also allows these areas to act as a sponge and filter; absorbing rainfall; filtering it through plants communities; layers of soil and roots; and releasing it into watershed areas.

Benefits of wildlands:

- · Absorb rainfall and reduce flooding
- Protect habitat for a wide variety of wildlife
- Conserve native plants as a genetic seed bank for the future
- · Enhance air quality through presence of vegetation
- Filter pollution and dilute impacts of development
- Preserve aspects of cultural history
- Serve as locations for research
- Provide access on some tracts for recreation and education
- Store and slowly release water into creeks, prolonging their flow
- Provide mitigation of public service infrastructure activities that disturb Endangered Species habitat
- Provide an alternative process for private property owners to mitigate their activities that disturb habitat
- · Offer beautiful views adding to Austin's quality of life and reputation as a community that values its environment

Factors Affecting Revenue

The Wildland Conservation Fund is funded by payments of permit fees. Fees are collected when private property owners or non-signatory public entities elect to mitigate their projects through BCCP. The fees are based on a schedule established by the BCCP Coordinating Committee, City Council, Travis County Commissioners Court, and U. S. Fish and Wildlife Service.

Factors Affecting Requirements

Requirements for the maintenance of the Balcones Canyonlands Preserves are \$428,455. This year's expenditures will include \$53,455 for hiring two seasonal temporary employees to complete the United States Forest Service Research study, \$25,000 for planning and researching to develop a long-range ecosystem management plan for the Balcones Canyonlands Preserves and \$350,000 to purchase fencing.

Residential

Single-Family Residential Monthly Tiered Minimum Charge:

This fee is charged in addition to the Retail Monthly Meter Equivalent Minimum Charge.

The residential monthly tiered minimum charge is applied based on the total billed consumption for the billing period as it falls within a rate block, not as a volumetric charge per 1,000 gallons.

Customer Assistance Program (CAP) customers may qualify for a waiver of the monthly tiered minimum charge.

Residential customers will be assessed a monthly tiered minimum charge for each meter when water consumption has registered, or for service of at least

10 days of the monthly billing period based on billed consumption for the billing period.

Annual fee the Austin Water Utility (AWU) charges customers with water wells to recoup the costs incurred to implement, manage, and enforce the new Water Code. The fee is per AWU customer site with active water well(s) that are required to be registered under Ch. 15-12. This fee is charged on a monthly basis at according to approved standards. The requirement to register AWU customers with certain types of active water wells is in Chapter 15-12 of the Austin City Well Program that is designed to ensure that the public water supply is adequately protected and, if applicable, alternate wastewater billing is applied 1/12 of the annual fee during the month(s) the customer's account is active.

Wastewater Service Rates

For all bills and charges rendered on or after November 1, 2016 these rates are applicable to all service for wastewater treatment to retail customers served by the City of Austin. In the absence of measured sewage volume by a means acceptable to the City, the volume service charge for retail customers will be based on their wastewater average.

Note FY 2016-17 FY 2015-16 Austin Water - Wastewater Utility Operating Fund

Wastewater Service Rates for Retail Customers:

xisting Customers:

(A) Retail Customers with Water Service

the designated three (3) month wastewater averaging period; or monthly water consumption, whichever is lower. If there is zero usage during one of the calculation. If there is zero usage for two or all three months of the averaging period, a default wastewater average of 5,000 gallons will be assigned for These rates are applicable to all retail customers who have metered water connections. Wastewater billing is based on the average water usage during residential customers until the next wastewater averaging period. For all other retail customers if there is zero usage for two or all three months of the three months in the averaging period, the month with zero usage is eliminated, and the remaining two months are used in the wastewater averaging averaging period, the monthly wastewater volume will be based on actual metered water usage monthly until the next wastewater averaging period.

B) Wastewater Billing for Domestic Alternate Water Sources

average, the City will impute a wastewater average of 5,000 gallons. The customer has the option to install private water metering acceptable to the City Wastewater volumes for Single Family Residential customers will be based on a historical wastewater average. In the absence of a historical wastewater to measure alternate water discharged into the sewer system and report meter reads as required. Non-residential customers must install approved private metering acceptable to the City to measure alternate water discharged into the sewer system and report meter reads as required.

(C) Non-Residential Customers with associated Irrigation Meters (Multifamily, Commercial, Large Volume and Wholesale)

property other than a water meter solely for a City Supported Community Garden or Urban Farm as defined in Chapter 14-7 of the City Code, the City will For those non-residential customers that have a separate City of Austin irrigation water meter for irrigation or alternative irrigation water source on the base wastewater billing for domestic usage on actual monthly water consumption. Any property that has an irrigation meter requirement will base wastewater billing for domestic usage on actual monthly water consumption.

D) Non Residential Customers without irrigation needs or requirements on the property

Non Residential Customers without irrigation needs or requirements on the property will base wastewater billing for domestic usage on actual monthly water consumption.

lew Customers:

A) Residential

The City will impute a wastewater average of 5,000 gallons to new residential accounts until they have established a wastewater average. The Director of the Austin Water Utility or the Director's designee has the discretion to adjust the 5,000 gallon average when the customer has had an established wastewater average at another City of Austin service address.

(B) Non-Residential Customers without irrigation meter(s) (Multifamily, Commercial, Large Volume and Wholesale)

(1) Except as provided by subsection (2), if a non-residential customer establishes a new account at a service location where an earlier account established a wastewater average, the City will use the earlier wastewater average for wastewater service billing purposes until the new account establishes its own wastewater average.

(2) If in the judgment of the Director of the Austin Water Utility or the Director's designee, the new customer will place a substantially different demand on the wastewater collection and treatment system, the City will bill the new non-residential customer for wastewater service based on actual metered water consumption until the new non-residential customer has established a wastewater average.
