CONCEPTUAL VIEW FROM CHARLOTTE STREET

July 27, 2016

MATTHEWS RESIDENCE
1102 Charlotte

The main criteria for this design are: aesthetics (contemporary architecture appropriate for today and compatible with existing rooflines and designs in Clarksville); security (primary issue with the female owner living alone); easy maintenance; sustainability; and appropriate size/scale for the site and the neighborhood.

Since we met with CCDC and the NHLC, we have made major changes to accommodate requests from these two community organizations and to improve the overall sustainability and functionality of the house:

1. Gabled roofs were added above the living room and the carport facing Charlotte St.
2. The square footage of the house has been decreased.
3. The original two-story design is now a one-story.
4. The garage now functions as a ventilated carport to minimize its street-facing view.
(There is no room on this lot for a side or rear entry garage).
5. A porch has been added to the front of the house.
6. The eight-foot wooden front wall has been reduced to a railing height of three feet.
7. The pitch and height of the rooflines on the entire house have been reduced.
8. A front door/gate with visibility from the street has been added.
9. Windows have been added to the front of the house and are visible to the street.

The house is now a single-story 2,000 SF design, with two bedrooms, two baths, and study.

The front walls of the house and carport will help create privacy and safety for the interior courtyard's reflecting pool. The house/wall are 25' from the street on Charlotte and will sit farther back than the houses on either side.

The rooflines are designed to conserve energy and provide natural light into the rooms, and to shield them where appropriate from west and south sun exposure.

Exterior materials will include a combination of masonry, windows, wood, metal, or similar natural materials.

In addition to existing trees, Japanese maples will be planted in front on Charlotte and more trees and other native landscaping in the back and side yards.

The entire house has been placed in and among the existing trees, so that it reflects the owner's desire for privacy and respect for the landscaping and historic nature of the neighborhood.

The house will conform to code, and no variances will be requested.

IMPERVIOUS COVER

| | |
|----------------------------------|-----------------------|
| SITE AREA: | 5,747 SQ FT |
| ALLOWABLE BUILDING COVER: | (40.0%): 2,298 SQ FT |
| TOTAL PROPOSED BUILDING COVER: | (39.6%): 2,277 SQ FT |
| ALLOWABLE IMPERVIOUS COVER: | (45.0%): 2,586 SQ FT |
| TOTAL PROPOSED IMPERVIOUS COVER: | (44.96%): 2,584 SQ FT |

BUILDING COVER BREAKDOWN:

| | |
|--|-------------|
| MAIN HOUSE - 1ST FLR: | 1,931 SQ FT |
| GARAGE: | 346 SQ FT |
