Additional Backup Information

This is a request to authorize negotiation and execution of an interlocal agreement with Capital Area Emergency Communication District (CAECD) in which the City will be reimbursed for 9-1-1 services provided within the region.

In 2013, the State of Texas created the Capital Area Emergency Communications District (CAECD) to establish and maintain Next Generation 9-1-1 emergency communications services within the 10 county District. The City established an ILA with CAECD at that time to continue maintaining the 9-1-1 database.

The 9-1-1 database is used in the Computer Aided Dispatch (CAD) system for identifying and locating emergency 9-1-1 callers throughout Travis County. The database contains landline and Voice over IP customer information, such as address and phone number, as well as the appropriate fire, police and EMS responder for each customer.

The interlocal is now expiring. With Council approval of this agreement, the City will be reimbursed for the resources used in maintaining the database, hence providing continued support to the Austin/Travis County 9-1-1 system.
