Austin Energy Downtown District Cooling Plant No. 3 On-Site Energy Resources

Austin Energy
Carol M. K. Stewart, PMP, Project Manager

COTERA+REED ARCHITECTS
Matt Catterall, Principal

District Cooling

- An underground network of pipes providing chilled water to meet the cooling needs of multiple buildings
- Gathering load generates superior energy savings, reliability and quality than stand-alone systems
- District Cooling has connected 68 customers
- Over 18.6 million square feet of facilities (165 City Halls)
