**WHEREAS:** Studies show that children who learn and play in nature are healthier, happier and perform better in school.

**WHEREAS:** Children who have safe access to parks, zoos, nature centers, lakes and rivers, and other public outdoor spaces are more resilient, have higher self-esteem, are more confident, are better problem solvers and are more creative.

**WHEREAS:** Communities in disadvantaged areas with access to nature benefit from greater health equity with lower rates of mortality and disease.

**WHEREAS:** Children who develop a positive relationship with nature are more likely to become tomorrow's stewards of our natural heritage.
