

# Homelessness Outreach Street Team (HOST)

Multi-agency team proactively the needs of  
people living on the streets in downtown  
Austin.

2 Austin Police officers  
1-2 EMS community health paramedics  
3 Integral Care behavioral health specialists  
1 Downtown Austin Community Court case manager

What do these needs look  
like?

# **HOST began on June 1, 2017, since then...**

703 individuals engaged (non-duplicated)

668 of 847 needs met

177 coordinated assessments completed

97 mental health services

95 shelter/housing services

94 medical services

**58 diversions**

25 ER Hospital Diversions

20 Jail Diversion

13 Psychiatric Hospital Diversions

What makes HOST effective?

# Right **intervention**, right **resource**, right **time**

- Resource triage
- Constant presence on the streets
- Immediate connection to resources when clients are ready to act

# Knowledge sharing & collaboration

- Resource availability
- Collective wisdom for problem-solving
- Client background and rapport
- Diversity and experience of team

# Connecting to Continuum of Care

- “Be on the lookout” for service and housing providers who are looking for clients
- Creating more seamless hand-offs with community partners and services

# HOST meets “Bernard”

## Result/Outcome

**5 agencies, 70 minutes  
Life saved**

*Meanwhile, CommUnity Health Street Med team plans for his future by securing follow-up wound care for when he is discharged.*

*“At the hospital, they found blood clots in his leg, determined that he had congestive heart failure. The Doctor said being admitted to the hospital saved his life; he may have been dead within 72 hours had he not encountered us and was offered help.”*

Why does HOST work?

# “Meeting people **where they’re at**”

- **On-going** engagement & follow-up
- **Flexibility** to keep client cases open
- **Network** follows up with clients
- Work with clients **wanting change**

A blurred background image showing a group of people in a meeting or office setting. In the foreground, two individuals are shaking hands, symbolizing agreement or partnership. The scene is brightly lit, suggesting a professional and collaborative environment.

# **“Building relationships and trust.”**

- With clients, new and old
- With clients’ families & friends
- Between public safety agencies & service providers

# “David’s” Journey

- On the streets of Austin for years
- Known to APD officer and has established relationship
- Long history of substance dependency

## ◆ HOST intervention

- Approaches APD officer, discloses his recent heroin overdose; asks for help
- Officer connects with Medic who connects David to Community Court’s 90-day treatment program
- HOST works on post-treatment housing
- David’s friend reaches out to HOST for help

# Learnings from a systems lens: 30,000 ft view

# Needs unmet

*When resources are unavailable, insufficient, full, or not enough*

- Shelter (all types of housing)
- IDs
- Transportation
- Hygiene/laundry
- Veterinary care
- Lockers/storage

# System Gaps

*Failure of a connection point or an intervention; a disconnect between clients' needs and delivered services*

- Mental Health Services
- Jail entry/release
- Medical Services
- Detox & substance treatment

# Barriers to Service

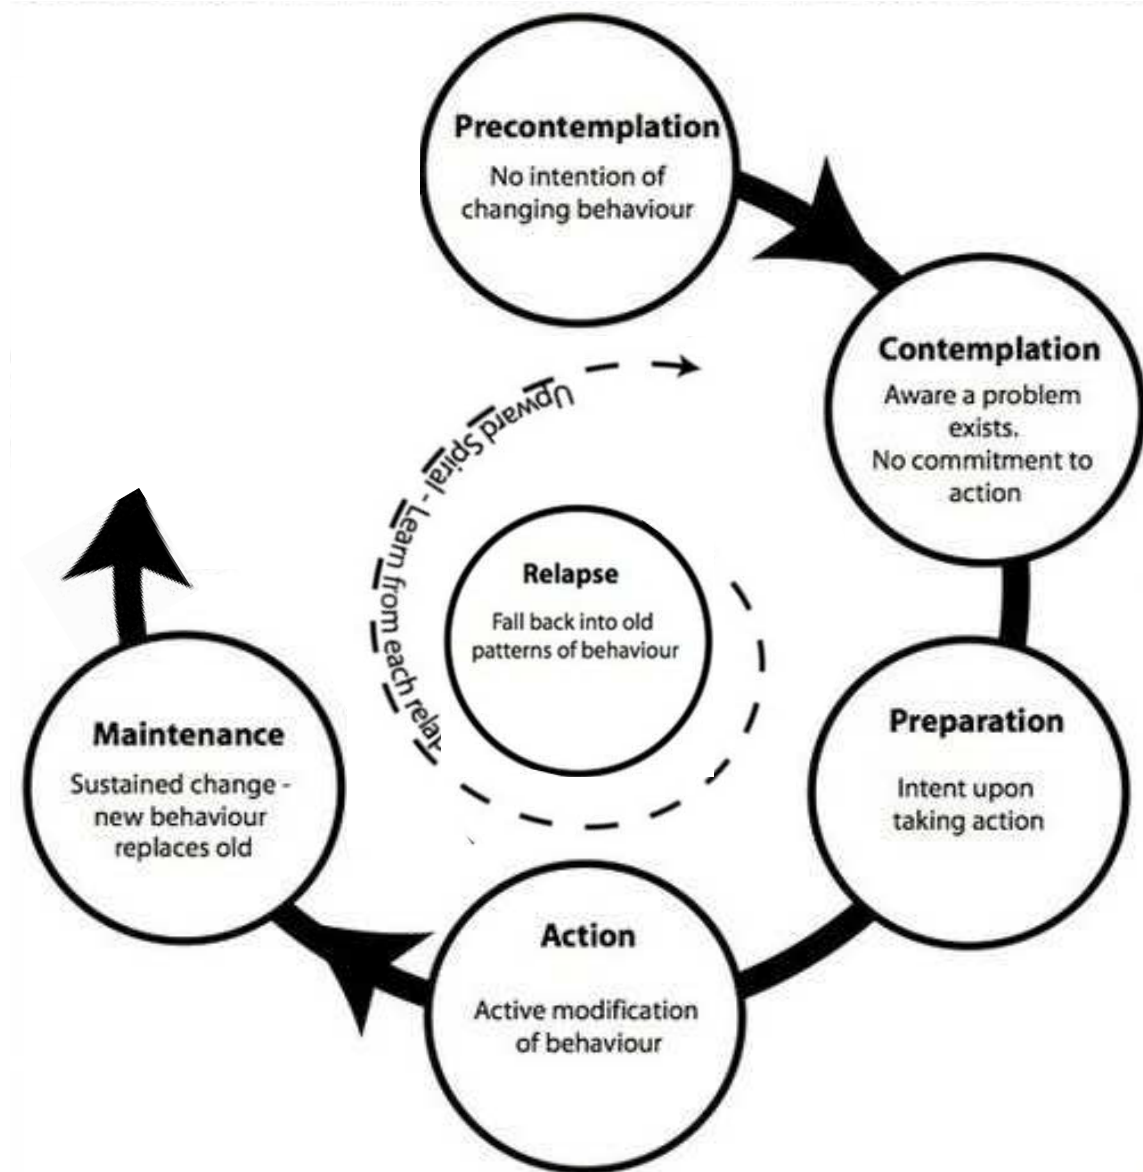

*Conditions, requirements, policies, or attitudes that block the accessibility of services, amenities, and information*

- Sobriety requirements
- Paperwork requirements and sequence
- Debt
- Criminal background

# Cycle of change

*A nonlinear process of overcome personal and social hurdles to make changes in daily life*

- Mental illness
- Trauma
- Substance dependency
- Lack of positive social support
- Distrust in others

# Unintended Consequences

*Outcomes not foreseen by purposeful action; hidden dynamics that are hard to see*

- Definitions affect service eligibility  
*i.e. Client stays one night in a motel and isn't eligible for housing because of HUD definition of "literally homeless"*
- Procedural requirements affect client care  
*i.e. Service provider closes out case for "no-show" client; client missed appointments because was sick in hospital; client has to get back on waitlist*

# Implications for the HOST model

	<b>Outreach</b> <i>(Various Service Agencies)</i>	<b>HOST Model</b> <i>(APD, EMS, Austin Travis County Integral Care, Downtown Austin Alliance)</i>	<b>Intervention</b> <i>(Crisis Intervention Team, Mobile Crisis Outreach Team, Psychiatric Emergency Services)</i>
<i><b>Deploy</b></i>	Ongoing, standard schedule; enter safer places	Meet people where they are; “Be on the look out” calls; enter potentially precarious situations	Referrals and on call for precarious situations; persons whom are of imminent danger to themselves/others
<i><b>Collaborate</b></i>	Agency specific: connect clients through referrals	Research and handoffs: have shared resources, data, knowledge, networks, wisdom; quickly refer and connect	Research, planning, paperwork, and sequenced activities
<i><b>Interact with clients</b></i>	Meet, engage, & build trusting relationship	Consistency on streets; tailoring interactions to meet needs, nudge motivations to change	Execute heavy-weight intervention
<i><b>Follow-up</b></i>	Agency-specific protocols; tracking in databases; time frame to close-out if no progress	Track clients see how they are and their needs; ensure interventions have intensity and duration necessary for change	Emergency crisis response only

# Optimum use of Resources

*What we are learning from EMS's Community Health Paramedic Program:*

## Goal

- Prevent the individuals from reaching a point where the 9-1-1 system is their only option by...
- Collaborating with resources to develop comprehensive solutions to...
- Connect individuals to resources that benefit their well being

## Approach

- Recognize that unconventional individuals have needs that require unique solutions
- Consider alternative measures in developing a solution
- Collaborate to streamline efforts and provide swift, effective solutions

## Target

- Frequent system users
- Vulnerable individuals at risk of deteriorating
- Provide additional system response resource

AUSTIN-TRAVIS COUNTY  
**EMS**

# Lessons from APD's Crisis Intervention Team

- Liaison between mental health agencies and APD
- Crisis intervention and involuntary confinement
- Links individuals to community resources
- Partnership with EMCOT

# Lessons from Restore Rundberg

- “Walk the beat”- deploy and adjust schedule and beat by factoring in where crime is most prevalent
- Have a strategy with a continuum of approaches from enforcement, prevention, intervention and complementary social services
- Offer ongoing community engagement

# Scaling

Next steps - how might we determine the best method to scale these types of interventions?

- How can technology help?
- What kind of experience/expertise is required?
- Can we work with what we have - adapted roles, new scripts, better connection to others in the system?

How does HOST fit into the  
larger system?

# We help build shared reasoning

## 1 ON THE EDGE

### Endure

### Struggle

**HOUSING INSECURITY:**  
Anxiety about losing home

## 2 LOSS

### Reach out

### Exhaust

**STRAINED RELATIONSHIPS:**  
Reliance on family members and friends for survival strains relationships

## 3 SURVIVAL

### Engage

### Disengage

**HOPELESSNESS:**  
Rejection and worsening circumstances erodes belief in the future

### Re-engage

**DECLINING HEALTH:**  
Deterioration of physical and mental health

## 4 RECONNECTION

### Reconnect

### Rebuild

IMPACT to person

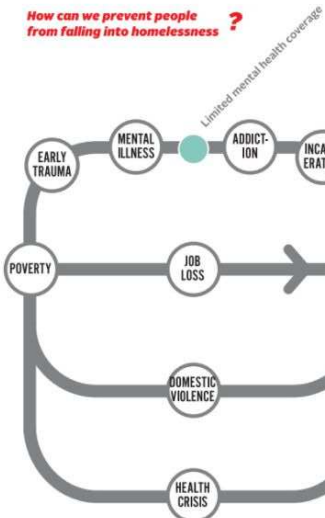

Hypothetical journey of person experiencing homelessness (from the outside)

IMPACT to community

How can we prevent people from falling into homelessness?

IDENTIFY + ADDRESS ROOT CAUSES

Why is homelessness increasing in our community?

No family resources: Age out of foster care  
Unaware of services

LOSE NETWORK

What is keeping people from getting the right services for their needs?

**A. IMPROVE SERVICE DELIVERY**

Resource Coordination  
Targeted Service Design (before housing)

**FRUSTRATION WITH PRESENCE ON STREET (MOSTLY DOWNTOWN)**

MINDSETS TOWARDS VISIBLE POVERTY DRIVE EMOTIONAL APPRAISAL: FEAR, GUILT, ANGER, DISGUST, DESPAIR, SCORN, HELPLESSNESS, etc...

**ECONOMIC IMPACT: FEEL UNSAFE**  
Presence on street and disruptive behaviors (such as aggressive panhandling) is damaging Austin's reputation

**INCREASED CRIME + DISORDER**  
Hidden and predatory drug trade  
In 20% of murders downtown victims are homeless.  
High consumption of public resources (APD + EHS)

**THREAT TO PUBLIC HEALTH**  
Human waste is on sidewalks, risks spread of disease, contamination of waterways

Moving to Austin after falling into homelessness elsewhere

Why are people migrating to downtown from elsewhere?

Not worth it

cycle of crisis

How do we manage challenges while people wait for housing without criminalizing homelessness?

**IMPROVE SAFETY: DISRUPT CLIMATE OF FEAR**

What is preventing us from scaling solutions that work?

**B. IMPROVE SERVICE DELIVERY**

Resource Coordination  
Targeted Service Design (after housing)

RE-LAPSE

Criminal record prevents employment  
Miss community

Transition from prison: *Loss of apartment*  
Criminal record prevents housing  
Rehousing bottleneck: *Backlog*

GET HOUSED

# A Community Approach

Photos courtesy of Downtown Austin Alliance

# “Patsy’s” Journey

- Known to be homeless since 10 years old
- Known to HOST members before pilot - she had completed a Coordinated Assessment
- A talented artist; built a relationship with her by providing art supplies
- Has mental health needs; struggled with substance dependency

## HOST intervention

- When her name came up for housing, HOST medic knew where to find her
- Was afraid and reluctant to go into housing - HOST encouraged and supported her
- HOST moved her into home at Community First Village

# “Patsy’s” Journey

## Change Mechanism

- Barrier Busting
- Trust and Supportive Relationships

## Result/Outcome

- Post move-in, medic: “Can I have a water from **your** fridge?” Patsy tears up, grateful for **her** home
- Registered as a vendor for selling her artwork
- HOST will follow up until confident in her stabilization
- Patsy’s partner of 7 years reached out to HOST to change his life

Are we ready to change the  
way things are?
