Portion of the City of Austin Land Development Code applicant is seeking a variance from:

Chapter 25-10-124-B.2

Section 2: Variance Findings

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. In order to grant your request for a variance, the Board must first make one or more of the findings described under 1, 2, and 3 below; the Board must then make the finding described in item 4 below. If the Board cannot make the required findings, it cannot approve a sign variance.

Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

I contend that my entitlement to the requested variance is based on the following findings:

1. The variance is necessary because strict enforcement of the Article prohibits any reasonable opportunity to provide adequate signs on the site, considering the unique features of the site such as dimensions, landscaping, or topography, because:

There is a line of trees that block any view of the low profile sign allowed in the scenic roadway.
The roadway is lower on the opposite side of the
road.

—OR—

2. The granting of this variance will not have a substantially adverse impact upon neighboring properties, because:

This pylon will not impact the neighboring properties, but will make it easier for the traffic to
locate this parking area.

—OR—

3. The granting of this variance will not substantially conflict with the stated purposes of this sign ordinance, because:

This variance will not conflict with the purpose of the ordinance

AND,

4. Granting a variance would not provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated, because:

There have been other sign variances in this area of Hwy 71
