Portion of the City of Austin Land Development Code applicant is seeking a variance from:

25-2-492 (D) (Site development regulations) to decrease side and rear setbacks in order to maintain the existing garage/accessory structures with a replat of the property to memorialize the long-standing ownership lines of the property pre-dating the construction of the structures. See page 8 for specific setback requests.

#### **Section 2: Variance Findings**

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

NOTE: The Board cannot grant a variance that would provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated.

I contend that my entitlement to the requested variance is based on the following findings:

#### **Reasonable Use**

The zoning regulations applicable to the property do not allow for a reasonable use because:

they prevent maintanence of the original and historic accessory structures at 1816 and 1818 Kenwood Avneue and the primary structure at 1814 Kenwood Avenue.

#### Hardship

a) The hardship for which the variance is requested is unique to the property in that:

the location of the accessory structures correlates to the ownership lines of the properties rather than the plot lines for the properties. The ownerhip lines and structures have existed in this configuration since between 67-87 years ago (Refer to deed report research attached).

b) The hardship is not general to the area in which the property is located because:

It is common practice for ownership lines as well as improvements to correspond with platted lot lines.

#### **Area Character**

The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because:

The properties and built improvements have existed in this configuration for decades and contribute to the character of the neighborhood as it existed over 67 years ago. Additionally, adjacent properties to the subject tracts have existed alongside this configuration for decades. The variance will not allow new/additional construction to what is existing in the setback but will allow the structures to be maintained.

Parking (additional criteria for parking variances only)

Request for a parking variance requires the Board to make additional findings. The Board may grant a variance to a regulation prescribed in the City of Austin Land Development Code Chapter 25-6, Appendix A with respect to the number of off-street parking spaces or loading facilities required if it makes findings of fact that the following additional circumstances also apply:

 Neither present nor anticipated future traffic volumes generated by the use of the site or the uses of sites in the vicinity reasonably require strict or literal interpretation and enforcement of the specific regulation because:

N/A			

2. The granting of this variance will not result in the parking or loading of vehicles on public streets in such a manner as to interfere with the free flow of traffic of the streets because:

N/A

3. The granting of this variance will not create a safety hazard or any other condition inconsistent with the objectives of this Ordinance because:

N/A

4. The variance will run with the use or uses to which it pertains and shall not run with the site because:

N/A

Area Character:

The structures were built in 1950, 1930, and 1947. The architecture and configuration of the structures are indicative of the character of this original neighborhood as it was established many decades ago. To rectify ownership configuration AND meet City Code requirements for re-platting would cause for some of these structures to be demolished. Travis Heights is one of the City's oldest neighborhoods that retaines a signifcant amount of integrity and character as many of the original structures still exist in the original configuration or with modifications that do not interfere with the visibility of the original configuration. The City of Austin is experiencing a significant rise in demolitions of older, orignal homes and it is important to provide support to intact neighborhoods where it makes sense to do so. This neighborhood is home to dozens of City and National Historic Landmark properties. In the absense of a local historic district, this is a neighborhood that should be supported and encouraged to retain the historic character and integrity when and where possible.

Board of Adjustments C/O Leane Heldenfels City of Austin PO Box 1088 Austin, Texas 78767

RE: Board of Adjustment, 1814, 1816, 1820 Kenwood Avenue

Members of the Board,

This firm represents the Owner of the property for the above referenced addresses located in the Travis Heights Neighborhood. The properties subject to this case consist of lots 7, 8, 9, 10 of Block 34 of the Travis Heights Subdivision, recorded in recorded in 1913. These 4 lots have only ever been developed as 3 single-family homes, each with a rear accessory structure.

While the properties have always existed in the configuration of 4 lots, according to deed history, ownership lines have not followed the plat lines since 1930 when the first house and accessory structure was built straddling two of the lots, now known as 1816 Kenwood Avenue. Similarly, 1820 Kenwood Avenue was built in 1947 straddling two lots. Improvements at 1814 Kenwood Avenue were built in 1950. The ownership lines of the three addresses have existed in this configuration, built atop lot lines and with accessory structures located in the present-day building setback areas.

The scenario is unique in that ownership and construction typically follows lot lines. Memorializing the ownership lines of the properties requires an amended plat to create 3 lots from the long standing, 4-lot configuration. However, the accessory structures challenge the approval of the amended plat since they are located within the rear and side-yard setbacks. Without an amended plat, future ownership transactions will be encumbered for these properties.

A successful variance to the rear and side-yard setbacks will allow the accessory structures to be maintained in the original, historic configuration on the lots with the amended plat.

We respectfully request a favorable review by the Board of Adjustment to allow for a variance in this scenario. Doing so will help maintain the character that the Travis Heights Neighborhood has known for decades.

Should you have any questions or need additional information, please contact me at my office.

Sincerely,

a. Ron The

A. Ron Thrower
