# Urban Trails Master Plan

“Trails may cross a critical water quality zone (CWQZ) of any waterway. The ordinance restricts trail width to 12’ maximum unless a wider trail is designated in this Urban Trails Master Plan. The maximum width of a hard surface trail shall be 12 feet for Urban Trails located closer to a waterway than allowable by LDC 25-8-261. **The trails in this master plan that are within greenbelts are only recommended to be over 12’ in width if the density of the trail and number of potential users justifies needing a wider trail than the standard.** Urban Trail width will be determined on a case-by-case basis during the design phase of each project.”
