

ZONING CHANGE REVIEW SHEET**CASE:** C14-2017-0134 – Gardens 3.01**P.C. DATE:** January 9, 2018**ADDRESS:** 4310 James Casey Street**DISTRICT AREA:** 3**OWNER/APPLICANT:** 4310 Gardens Mob, LP**AGENT:** Bennett Consulting (Rodney Bennett)**ZONING FROM:** LO-V-NP**TO:** GO-V-NP**TOTAL AREA:** 3.017 acres (131,421 sq. ft.)**SUMMARY STAFF RECOMMENDATION:**

Staff recommends general office- vertical mixed use building- neighborhood plan (GO-V-NP) combining district zoning.

PLANNING COMMISSION RECOMMENDATION:

January 9, 2018 *Scheduled for Planning Commission*

ISSUES: None at this time.**DEPARTMENT COMMENTS:**

The subject site is approximately 3 acres, located on the west side of James Casey Street, approximately 1,000 feet south of Ben White Boulevard. It is currently developed with a medical office complex with four buildings; three are one-story and one is two-story. The applicant is seeking a rezoning to gain more development entitlements, such as height, building coverage, impervious cover, and FAR. The applicant would like to retain the medical office use on the site.

The site is located directly south of St. David's South Austin Medical Center, and is part of a larger district of medical offices. The site has one driveway providing access to James Casey Street. To the west, the site is bordered by a railroad ROW approximately 100 feet in width, which separates the site from a single family neighborhood further to the west. There are 4-5 single family residences remaining on James Casey Street to the south; the nearest single family structure is approximately 225 feet from the lot line of the subject site.

Staff supports the requested rezoning to GO-V-NP, increasing the base zoning from LO to GO. The location of the site within a large, established hospital district, the applicant's stated intention to retain the medical office use, and the relatively large distance separating the site from single family neighborhoods are reasons supporting staff's recommendation to rezone the site to a slightly less restrictive zoning category.

The South Austin Combined Neighborhood Plan (SACNP) recognizes the importance of the St. David's district as a health care provider and major employer. The plan states: "The Hospital Special District recognizes the unique land use requirements of a major medical center and related medical offices and businesses..." Granting additional entitlement to develop a medical office within the existing hospital district is seen as in accord with the SACNP (See Comprehensive Planning, page 7).

EXISTING ZONING AND LAND USES:

	ZONING	LAND USES
<i>Site</i>	LO-V-NP	Medical Office
<i>North</i>	PUD-NP	St. David's Hospital
<i>South</i>	LO-NP	Office, Single Family
<i>East</i>	James Casey St, then LO-V-NP	James Casey St, then Medical Office
<i>West</i>	Railroad track, then SF-3-NP	Railroad track, then Single Family

NEIGHBORHOOD PLANNING AREA: South Manchaca

TIA: No, however a TIA may be required at the time of site plan.

WATERSHED: West Bouldin Creek

BASIS FOR RECOMMENDATION

1. *The proposed zoning should be consistent with the purpose statement of the district sought.*

The purpose statement for General Office (GO) specifies offices and commercial uses predominantly serving community or citywide needs, such as medical or professional offices.

2. *The rezoning should be consistent with the policies and principles adopted by the City Council or Planning Commission.*

The South Manchaca Neighborhood Plan, Future Land Use Map includes this site as part of a Special District connected to the adjacent St. David's Hospital. The medical office is a part of the greater Hospital District. Retaining and expanding the use through a higher zoning category (GO) is acceptable in this context.

3. *Zoning changes should promote compatibility with adjacent and nearby uses and should not result in detrimental impacts to the neighborhood character.*

The rezoning allows for compatibility and an orderly pattern of land uses to be retained in the area. The nearby single family area is separated from the site by a wide (approximately 100 ft) railroad ROW.

EXISTING CONDITIONS***Site Characteristics***

The site is currently developed with a medical office complex. There are four buildings; three are one-story and one is two-story. There is one driveway providing access to James Casey Street. There are several large trees in planting strips in the parking lot. The site is relatively flat and the western 1/3 of the property has a slight depression, sloping down from east to west.

Impervious Cover

The tracts are located in an Urban Watershed and therefore the zoning district will determine the impervious cover limits. The existing LO zoning district allows 70% impervious cover. The proposed GO zoning district allows up to 80% impervious cover.

Comprehensive Planning – Kathleen Fox – 512-974-7877

The zoning case is located on the west side of James Casey Street, and is located within the boundaries of the South Austin Combined Neighborhood Planning Area, in the South Manchaca NP. The property is approximately 3.02 acres in size and contains a medical office complex. Surrounding land uses includes St. David's Medical Center to the north; a medical office complex to the south; a medical office to the east; and rail road tracks to the west. The applicant wants to zone the property from LO-V to GO-V, for the medical complex.

Connectivity

There are public sidewalks located intermittently along James Casey Street. A Capital Metro transit stop is located within walking distance to this site. The Walkscore is 36/100, Car Dependent, meaning most errands require a car.

South Austin Combined Neighborhood Plan (SACNP)

The SACNP identifies this property as being within the 'Hospital District' on the Future Land Use Map. Mixed use, including zone GO-MU, is permitted within the Hospital District.

Text and Actions Related to the Hospital District: (p. 73-74)

Hospital Special District

St. David's South Austin is an asset to the community, providing medical care and employment. Surrounded medical offices and related businesses, and separated from adjacent character districts by the railroad tracks, the Hospital Special District is distinct from other character districts. Located along Ben White Blvd., access to the hospital is primarily from the freeway. However, walking connections to the hospital, associated offices, and surrounding area should be developed where appropriate.

Vision: The Hospital Special District recognizes the unique land use requirements of a major medical center and related medical offices and businesses.

The following actions, located in other sections of the plan, relate directly to the Hospital Special District:

T A5: Create walkable connections to the neighborhood along the railroad tracks (exploring the possibility of a hike and bike trail along the unused railroad spur in the South Manchaca neighborhood).

T A20: Complete the sidewalk network, prioritizing these segments:

- Radam Lane (James Casey to S 1st)
- James Casey (missing segment north of St. Elmo)

T A24: Improve safety for all users at the following unsignalized intersections (e.g., by installing elements such as crosswalks, signage, roundabouts, curb bulb-outs, stop signs):

- St. Elmo Rd. and James Casey St.
- James Casey St. and Ben White Blvd.

CL A22: Develop a strategy for increasing collaboration between the neighborhood and businesses and private organizations within the community, including St. David's Hospital.

T P4: Promote walking and improving the sidewalk network.

T A15.15: James Casey Street (missing segment north of St. Elmo)

T A15.33 Radam Lane (James Casey to S. 1st Street)

T A19. Improve safety for all uses at the following unsignalized intersections (e.g. by installing elements such as crosswalks, signage, roundabouts, curb bulb-outs, stop signs):

T A19.2. St. Elmo Road and James Casey Street.

T A19.10: St Elmo Road and James Casey St./3rd St.

T A19.14: James Casey St. and Ben White Blvd.

The existing medical office complex, with an existing public sidewalk in front of the building, appears to be supported by actions and policies of the SACNP *and promote the vision for the Hospital District.*

Imagine Austin

The comparative scale of the site relative to the medical uses abutting this property, as well as the site not being located along an Activity Corridor or within an Activity Center, falls below the scope of Imagine Austin, which is broad in scope, and consequently the plan is neutral on the proposed rezoning.

Site Plan – Thomas Sievers – 512-974-1237

- SP 1. Site plans will be required for any new development other than single-family or duplex residential.
- SP 2. Any development which occurs in an SF-6 or less restrictive zoning district which is located 540 feet or less from property in an SF-5 or more restrictive zoning district will be subject to compatibility development regulations.
- SP 3. Any new development is subject to Subchapter E. Design Standards and Mixed Use. Additional comments will be made when the site plan is submitted.

Compatibility Standards

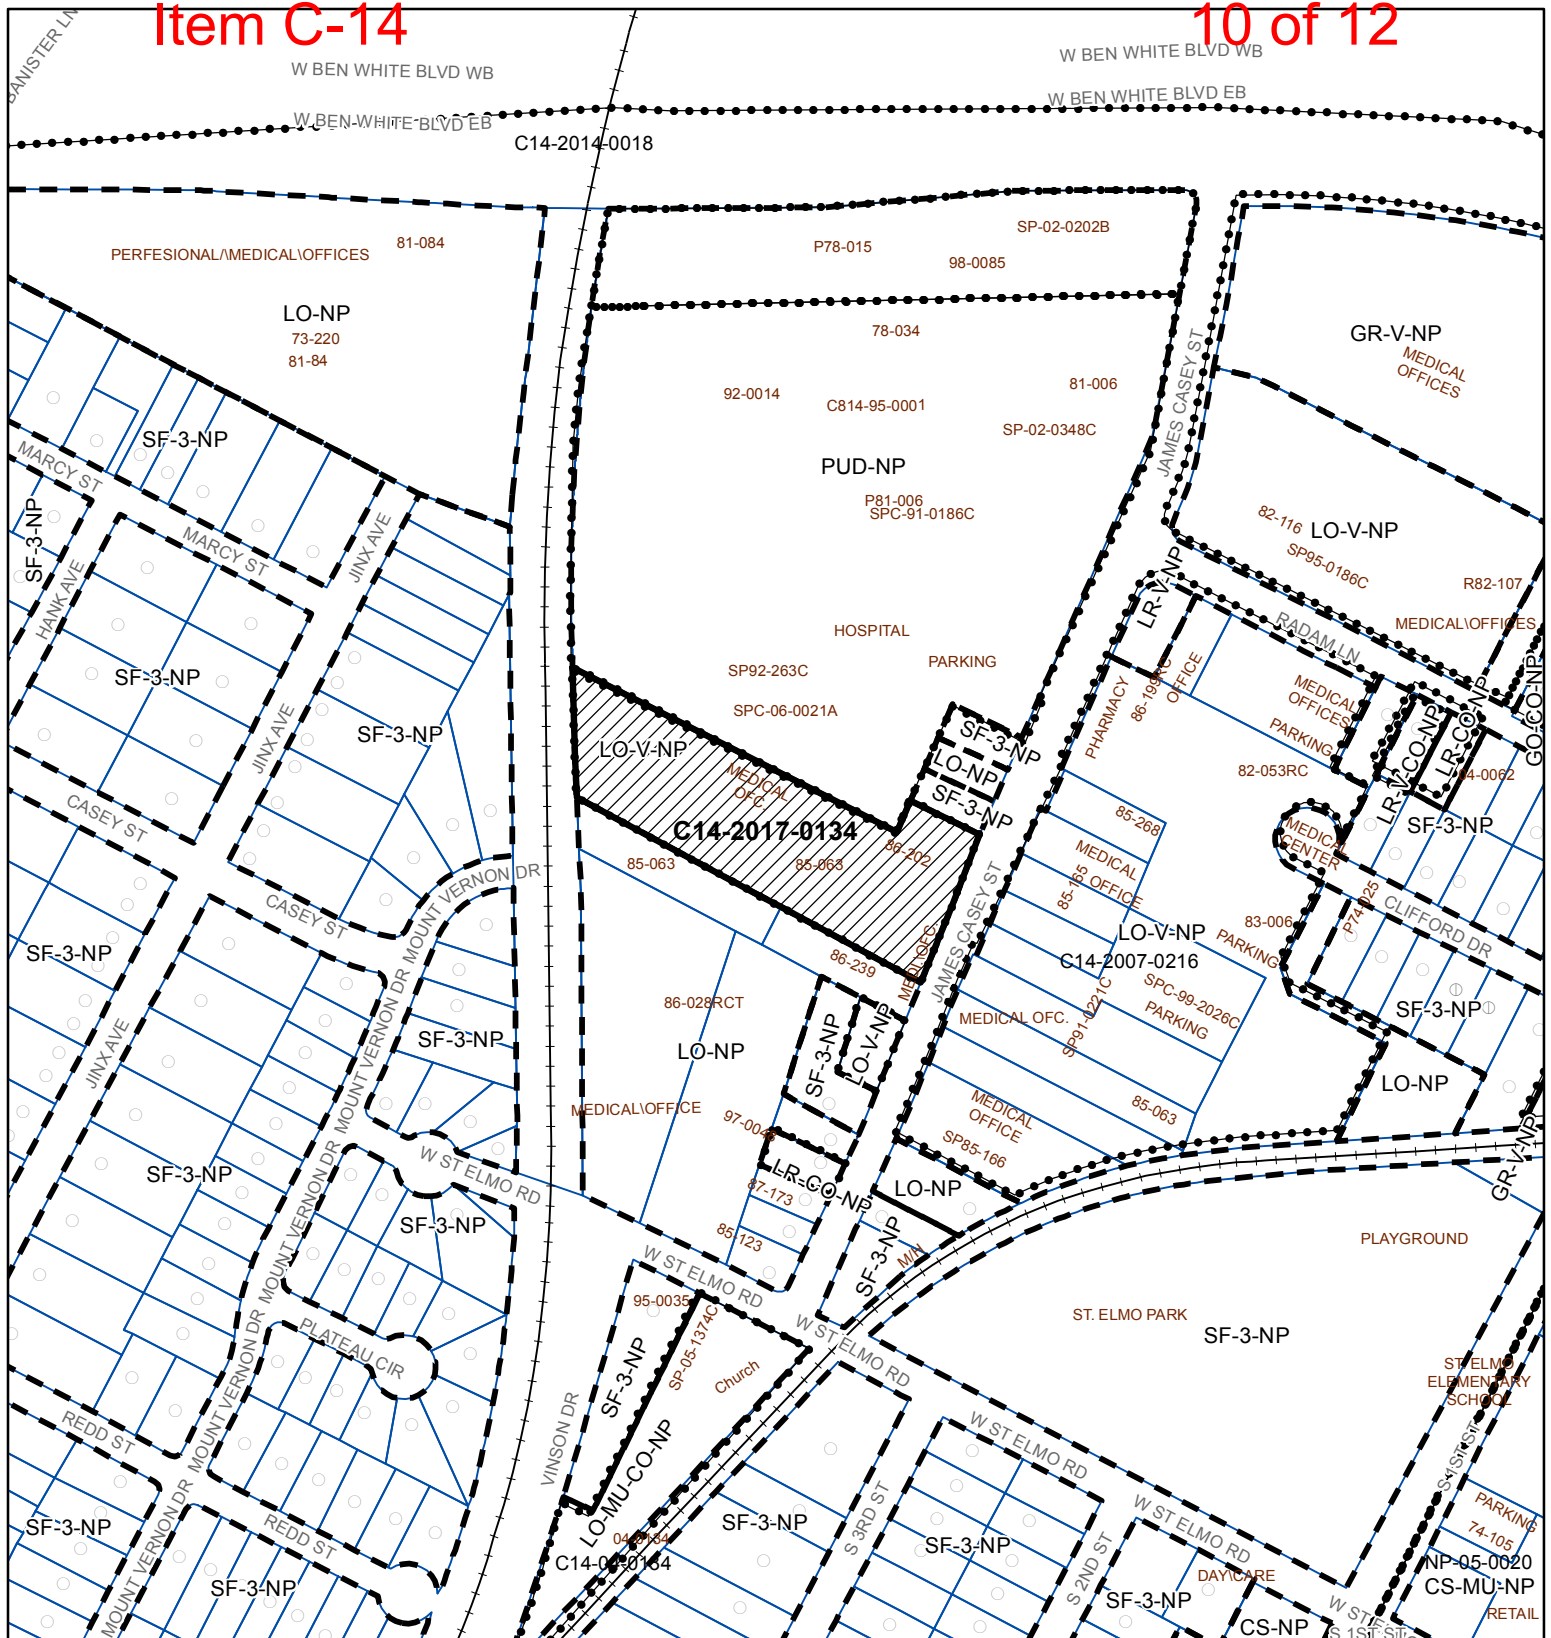

- SP 4. The site is subject to compatibility standards. Along the northeast property line, the following standards apply:
- No structure may be built within 25 feet of the property line.
 - No structure in excess of two stories or 30 feet in height may be constructed within 50 feet of the property line.
 - No structure in excess of three stories or 40 feet in height may be constructed within 100 feet of the property line.
 - No parking or driveways are allowed within 25 feet of the property line.
 - A landscape area at least 25 feet wide is required along the property line. In addition, a fence, berm, or dense vegetation must be provided to screen adjoining properties from views of parking, mechanical equipment, storage, and refuse collection.
 - For a structure more than 100 feet but not more than 300 feet from property zoned SF-5 or more restrictive, height limitation is 40 feet plus one foot for each 10 feet of distance in excess of 100 feet from the property line.
 - An intensive recreational use, including a swimming pool, tennis court, ball court, or playground, may not be constructed 50 feet or less from adjoining SF-3 property.
 - A landscape area at least 25 feet in width is required along the property line if the tract is zoned LR, GO, GR, L, CS, CS-1, or CH.

Environmental - Mike Mcdougal - 512-974-6380

1. The site is not located over the Edwards Aquifer Recharge Zone. The site is located in the West Bouldin Creek Watershed of the Colorado River Basin, which is classified as an Urban Watershed by Chapter 25-8 of the City's Land Development Code. It is in the Desired Development Zone.
2. Zoning district impervious cover limits apply in the Urban Watershed classification.
3. According to floodplain maps there is no floodplain within or adjacent to the project location.
4. Standard landscaping and tree protection will be required in accordance with LDC 25-2 and 25-8 for all development and/or redevelopment.
5. Trees will likely be impacted with a proposed development associated with this rezoning case. Please be aware that an approved rezoning status does not eliminate a proposed development's requirements to meet the intent of the tree ordinances. If further explanation or specificity is needed, please contact the City Arborist at 974-1876. At this time, site specific information is unavailable regarding other vegetation, areas of steep slope, or other environmental features such as bluffs, springs, canyon rimrock, caves, sinkholes, and wetlands.
6. This site is required to provide on-site water quality controls (or payment in lieu of) for all development and/or redevelopment when 8,000 s.f. cumulative is exceeded, and on site control for the two-year storm.
7. At this time, no information has been provided as to whether this property has any preexisting approvals that preempt current water quality or Code requirements.

Water Utility - Bradley Barron – 512-972-0078

The landowner intends to serve the site with City of Austin water and wastewater utilities. The landowner, at own expense, will be responsible for providing any water and wastewater utility improvements, offsite main extensions, utility relocations and or abandonments required by the land use. The water and wastewater utility plan must be reviewed and approved by Austin Water for compliance with City criteria and suitability for operation and maintenance. Depending on the development plans submitted, water and or wastewater service extension requests may be required. All water and wastewater construction must be inspected by the City of Austin. The landowner must pay the City inspection fee with the utility construction. The landowner must pay the tap and impact fee once the landowner makes an application for a City of Austin water and wastewater utility tap permit.
