Type of Sign: Freestanding Sign

Portion of the City of Austin Land Development Code applicant is seeking a variance from:

25-10-102: Signs Prohibited in All Sign Districts. Unless the building official determines that the sign is a nonconforming sign, the following signs are prohibited: (7) a sign within 12 feet of the public right-of-way that is more than 30 inches in height above street pavement grade or has a clearance of less than nine feet above street pavement grade.

Section 2: Variance Findings

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. In order to grant your request for a variance, the Board must first make one or more of the findings described under 1, 2, and 3 below; the Board must then make the finding described in item 4 below. If the Board cannot make the required findings, it cannot approve a sign variance.

Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

I contend that my entitlement to the requested variance is based on the following findings:

- 1. The variance is necessary because strict enforcement of the Article prohibits any reasonable opportunity to provide adequate signs on the site, considering the unique features of the site such as dimensions, landscaping, or topography, because:

The combination of the speed of traffic on Walsh Tarlton Lane, limited sight lines along property frontage due to topography, significant fall in grade from street level onto property, and heavy vegetation along north property line, coupled with 12-foot setback requirement, will not provide adequate visibility to queue motorists to only entrance to property from street.

—OR—

- 2. The granting of this variance will not have a substantially adverse impact upon neighboring properties, because:

The sign will not obstruct sight lines entering or exiting the property and its design reflects the project architecture.

—OR—

- 3. The granting of this variance will not substantially conflict with the stated purposes of this sign ordinance, because:

This is the only deviation from the sign ordinances we are requesting and is motivated by significant challenges to visibility of the sign, which marks the only entrance to the property from Walsh Tarlton Lane. Strict adherence to the 12-foot setback would render the sign essentially ineffective.

AND,

- 4. Granting a variance would not provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated, because:

The design of the freestanding sign otherwise meets all requirements of the City of Austin sign ordinances and sight lines to its location are atypical.
