FINDING:

- 1. The Zoning regulations applicable to the property do not allow for a reasonable use because: the existing boat dock on the property was designed and built more than**

60 years ago and is very small in relation to boat dock designs approved now to safely accommodate much larger modern day watercraft sizes and configurations.

2. (a) The hardship for which the variance is requested is unique to the property in that: the existing boat dock on the property was designed and built more than 60 years ago and is very small and unsafe, other similarity situated boat docks already developed in Bee Caves area
(b) The hardship is not general to the area in which the property is located because: the property on opposite shoreline has claimed several vertical and horizontal feet of land/shoreline unlawfully, creating a special and unique hardship limitation on the LDC channel width rule provision calculations for the 1615 Westlake Drive property
3. The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because: the proposed variance is the minimum departure from the rules to achieve a safe design
