Re: C15-2019-0043

Dear Bruce,

Austin Energy (AE) has reviewed your application for the above referenced property, requesting that the Board of Adjustment consider a variance(s) from Section 25-2-551 (C)(3)(a) to increase the maximum impervious coverage requirement from 35% to 38.5% in order to erect a single-family residence in "LA", Lake Austin zoning district.

Austin Energy does not oppose request provided any proposed and existing improvements are in compliance with AE clearance criteria requirements, The National Electric Safety Code and OSHA. Any removal or relocation of existing electric facilities will be at owners/applicants expense.

Note to applicant. Austin Energy does have existing facilities, which will need to be removed and relocated, as well as existing electric easements associated, which all will need to be released, at the owners/applicant expense, before the proposed structure is built at the above address(s).

Please use this link to be advised of our clearance and safety requirements which are additional conditions of the above review action:

I/We Bruce S. Aupperle, P.E. on behalf of myself/ourselves as
authorized agent for SKYLARK PARTNERS II LP, JOHN AND AMY PORTER affirm that on
Month June, Day 10, Year 2019, hereby apply for a hearing before the
Board of Adjustment for consideration to (select appropriate option below):

☒ Erect ☐ Attach ☐ Complete ☐ Remodel ☐ Maintain ☐ Other: _____

Type of Structure: Single Family Home

Portion of the City of Austin Land Development Code applicant is seeking a variance from:

Impervious Cover within LA zoning district, Section 25-2-551C)(3)

Section 2: Variance Findings

The Board must determine the existence of, sufficiency of, and weight of evidence supporting the findings described below. Therefore, you must complete each of the applicable Findings Statements as part of your application. Failure to do so may result in your application being rejected as incomplete. Please attach any additional supporting documents.

NOTE: The Board cannot grant a variance that would provide the applicant with a special privilege not enjoyed by others similarly situated or potentially similarly situated.

I contend that my entitlement to the requested variance is based on the following findings:

Reasonable Use

The zoning regulations applicable to the property do not allow for a reasonable use because:

Existing homes at 1704 and 1706 Channel Road are to be demolished and replaced with a single family home located on both lots. A Unified Development Agreement has been executed in order to utilize both tracts as a single site. A copy of the Unified Development Agreement is attached. The overall project proposes a unified impervious cover of 37.5%. Individually 1704 Channel Rd. is zoned LA and is allowed an impervious cover of 35% and proposes 38.5% at said address, whereas 1706 Channel Rd. is zoned SF2 and is allowed an impervious cover of 45% and proposes 36.1% at said address.

Hardship

a) The hardship for which the variance is requested is unique to the property in that:

Many of the existing trees located at 1706 Channel Rd. would need to be removed to accommodate an exact percent of Impervious cover allowed by address as listed above. We wish to use a unified % impervious cover of 37.5%, which is less than that envisioned under the unified development agreement.

b) The hardship is not general to the area in which the property is located because:

The unified single-family home site is unique because of its dual zoning; its location adjacent to a man-made channel from Lake Austin, which provides lake access and potable water to nearby homes inland from the lake; and the density of existing trees located on the site. The LA zoning setbacks from the man-made channel reduced the net site area thus reducing the allowed impervious cover. The proposed unified IC is approximately 540 s.t. short of the max. allowed.

Area Character

The variance will not alter the character of the area adjacent to the property, will not impair the use of adjacent conforming property, and will not impair the purpose of the regulations of the zoning district in which the property is located because:

The existing trees will be maintained to our best ability. The use will be maintained as a single family home. The proposed development will remain consistent with the surrounding neighborhood.

Parking (additional criteria for parking variances only)

Request for a parking variance requires the Board to make additional findings. The Board may grant a variance to a regulation prescribed in the City of Austin Land Development Code Chapter 25-6, Appendix A with respect to the number of off-street parking spaces or loading facilities required if it makes findings of fact that the following additional circumstances also apply:

1. Neither present nor anticipated future traffic volumes generated by the use of the site or the uses of sites in the vicinity reasonably require strict or literal interpretation and enforcement of the specific regulation because:

2. The granting of this variance will not result in the parking or loading of vehicles on public streets in such a manner as to interfere with the free flow of traffic of the streets because:

3. The granting of this variance will not create a safety hazard or any other condition inconsistent with the objectives of this Ordinance because:

4. The variance will run with the use or uses to which it pertains and shall not run with the site because:

Subject: RE: draft public hearing notice for 1704 Channel Road C15-2019-0043

From the Draft public notice you'll notice no mention of a UDA. The commission will only consider a variance for 1704 from 35% to 37.5%. Ignoring the existence of a UDA, which is what the 37.5% was based on. Without acknowledging the UDA we'll need 38.5% , if 1704 is computed separately.

Staff ignored our specific variance request. The prior email requests changing the variance request and becomes official evidence to the case and should be sent to all Board members. Thus providing us a springboard for discussion of the UDA, etc.

Assuming the BOA does not recognize the existence or functionality of a unified development agreement we would like to change the variance to state an impervious cover increase from 35% to 38.5%.

Without recognition of the unified development agreement we'll need 38.5% impervious cover at 1704 Channel Road.

Impervious cover at 1706 Channel Road will be well below its allowed impervious cover of 45%.

I-8/29

The unified impervious cover as envisioned by the unified development agreement is proposed to be 37.5% for the whole site of 1704 and 1706 Channel Road.

Please call if you have any questions.
