To modify or alter the existing speed limit of a street, Texas traffic laws require that a traffic engineering investigation be performed. An investigation of Cameron Road was conducted by the Transportation Engineering Division of the Austin Transportation Department in accordance with the procedures specified in the Texas Procedures for Establishing Speed Zones, 2015, including factors affecting roadway safety (street curvature, driveway density, crash history).

This ordinance change is part of ATD's initial group of speed modification reports to evaluate operating speeds and safety on the City's primary arterial streets to recommend appropriate speed limits based on factors affecting roadway safety. This effort is included in ATD's Vision Zero initiative and its emerging Speed Management Program. ATD is also evaluating the appropriateness of a citywide arterial speed limit alternative to discuss with Council at a later date.

The Transportation Engineering Division recommends making the following amendments to City Code Section 12-4-64 (D) (Table of Speed Limits) to establish a maximum speed limit of 35 miles per hour on a section of Cameron Road from 485 feet north of U.S. 290 to U.S. 183.
